

SK's New Journey for Tomorrow

2021 SK Inc. SUSTAINABILITY REPORT

About this report

SK Inc. is actively promoting ESG management to effectively pursue sustainable growth with our future growth portfolio. SK Inc. has published this sustainability report to share these activities and achievements with our stakeholders. To show the new side of SK Inc. as a ‘Sophisticated Value Investor’, SK Inc. will be sharing SK Inc.’s business strategies that will be developed to drive future growth along with philosophy and principles that SK Inc. will take as a direction for ESG management. This report is prepared based on the following standards.

Period and Scope

This report covers the financial and non-financial performances of SK Inc.’s major sustainability management activities from January 1 to December 31, 2020, along with some data in the first half of 2021. In order to portray the changes in trends for quantitative results, SK Inc. has incorporated the results of the past three years from January 1, 2018 to December 31, 2020.

Standards and External Verification

This report has been prepared according to the Core Option of the Global Reporting Initiative Standards and observes the principles of the UNGC CoP (Communication on Progress). SK Inc. also follow the recommendations of the Task force on Climate-related Financial Disclosures (TCFD) and the industry standards of the Sustainability Accounting Standards Board (SASB). To ensure the reliability of the reported content, this report has been verified by a professional sustainability report verification agency, and the results of the verification are included on page 150 of this report.

Reporting Boundaries

This report limits the major boundaries of the quantitative and qualitative performances to SK Inc. based on the separate financial statements of the Korean International Financial Reporting Standards (K-IFRS), considering the actual control power of SK Inc. and the extent of its impact on major issues that may arise. However, ESG management and Social Value activities, which are the basis of SK’s pursuit of DBL (Double Bottom Line), include qualitative performances at the group level, while sales amount, which are a core performance indicator to facilitate the comprehensive understanding of stakeholders, are based on the consolidated financial statements.

Communication with Stakeholders

The sustainability management of SK Inc. is based on communication with our stakeholders. SK Inc. publishes the annual sustainability reports to improve communication with our stakeholders. In 2021, we actively identified the needs of our stakeholders regarding sustainability management by conducting surveys and media research, etc., and we reflected the findings in our management activities.

DJSI World

Listed for 9 consecutive years

Industry Leader

Named for 2 consecutive years
(No.1 in Industrial Conglomerate category)

A⁺ rating

SK Inc.’s
Footsteps

We, at SK Inc., recognize the trust and support of our stakeholders throughout the company’s history. Their invaluable contribution laid the foundations of our corporate growth and allowed us to continuously pursue greater changes, challenges and growth.

We look at ourselves and ask ‘What should we do to address various social challenges?’ We feel a sense of heavy responsibilities for solving social issues and building a happy society. Going forward, SK Inc. will never stop from accelerating ESG management and delivering sustainable happiness to all stakeholders.

AA rating

2020 Presidential Commendation for
Sustainability Management

Comprehensive ranking

1st place

Environment

Do we live up to a strong sense of social responsibility as a corporation by exploring the best way to raise awareness about **environmental issues** and solving them?

Social

Do we practice a 'new model for entrepreneurship' by leveraging our expertise to recognize and address **social issues** and crisis?

Are we on the right path to develop **an advanced corporate governance** trusted by every stakeholder?

Overview of SK Inc.

SK Inc. is divided into the Investment Division that discovers and nurtures future growth engines and the Business Division that provides IT services. Based on the reliable profit base of energy and ICT, we have continuously secured new growth engines by expanding our investment sector to semiconductors and biotechnology.

Top management goal of SK Inc. is to increase the overall value of our portfolio by adding future growth potential to today's reliability.

SK Group and SK Inc.

SK Group is comprised of companies that share the management philosophy based on the SK Management System (SKMS) and agree to mutually cooperate in management activities according to their own needs and judgment, regardless of shareholding.

SK Group is managed by SK Inc., each member company, and the SUPEX Council.

All member companies including SK Inc. 'pursue ESG-based common values together' (united) while conducting 'independently responsible management centered on the Board of Directors' (independent).

CEO Message

SK Inc. will thrive as a ‘Sophisticated Value Investor’ and lead ESG management, thus **paving the way for a sustainable future.**

Jang, Dong Hyun President and CEO, SK Inc.

장 동 현

This year, SK Inc. announced our commitment to transforming into an ‘investment’ company. Despite the impact of the pandemic in 2020, SK Inc. has successfully built a virtuous investment cycle. For example, we realized substantial returns through a successful IPO of SK Biopharmaceuticals and a block deal of some of our stakes in the global logistics center ESR, etc. Building on these achievements and our strengths, we seek to become a ‘Sophisticated Value Investor.’

Our goal is clear. We will earn support from the capital markets by transforming our business portfolio. We have chosen to take a bold step to move away from the traditional approach of focusing on growth and efficiency. Our

portfolio will be reshaped to embrace ESG, centering on Core Sectors : Advanced Materials, Biopharmaceutical, Green, and Digital, etc.

We will also achieve greater change and growth by refining our ESG management system. Concrete action plans will be included in the Corporate Governance Charter, and the role of the Board of Directors will be expanded to include discussing ESG-incorporated mid-to long-term growth strategies and engaging in performance evaluation and compensation for internal directors. This will further solidify our Board of Directors-centered management system and help us build global top governance. And we will continue to reinforce ESG engagement in our portfolio management.

We, at SK Inc., believe that this is the way to contribute to making a ‘Better Tomorrow, Better Life,’ and to make our value to be recognized by investors. And we believe that this ultimately will put us on the path to making a ‘Sustainable Future.’

Dear stakeholders,

Now is the time for corporations to reflect upon our roles : How can we earn sincere support and trust from society? SK Inc., as a ‘Sophisticated Value Investor,’ will fulfill our role to the fullest to contribute to a sustainable future and the happiness of all stakeholders.

We look forward to your continued trust and support.

Thank you.

We will grow into a ‘Digital Transformation Partner’ to lead digital innovation for our customers and society.

Park, Sung Ha President and CEO, SK Inc.

박 성 하

Dear stakeholders!

The digital transformation we pursue should not be just about the advancement of technology but about making a better and happier society.

We invite your unwavering support and trust to our effort to create digital-driven Social Value and improve enterprise value.

Thank you.

Digital technologies are increasingly being adopted across every industry’s value chain. And rightly so. Indeed, digital technologies have proven its power to address various social issues as well as innovate traditional business models.

In an effort to fulfill the role as a corporation to serve our customers and society, SK Inc. has long been working to lay the groundwork for digital-centered technological innovation. And this year, SK Inc. has finalized our detailed visions, set mid-to long-term goals and action plans to grow as a digital leading company

In fact, we took our first step to lead environmental management by being the first Korean company to join the RE100 initiative and declaring a Net Zero emission target, etc.

Going forward, we will set the following sectors as core sectors : Environment, Safety, Health and Medical, etc., and develop related ESG platforms and solutions. And with a wide deployment to industrial sites, we will be able to help strengthening the social safety net while pursuing business growth.

We will also seek to improve the welfare of employees –embracing work-life balance and flexible work arrangements. At the same time, we will leverage our expertise to make social contribution, thus bringing greater happiness to the community by providing tech education and employment support for the people with disability.

Fundamental Story

Through reliable ESG management, **SK Inc. provides a corporate model** that the market and society desires.

Fundamental Story

- Premium Governance 30
- System-based ESG Management 32
 - KPI Management for Each of the ESG Areas 34
 - Social Value Performance Management 35
 - SK Inc.'s Social Value Performance 36
- ESG-centered Investment Process 38

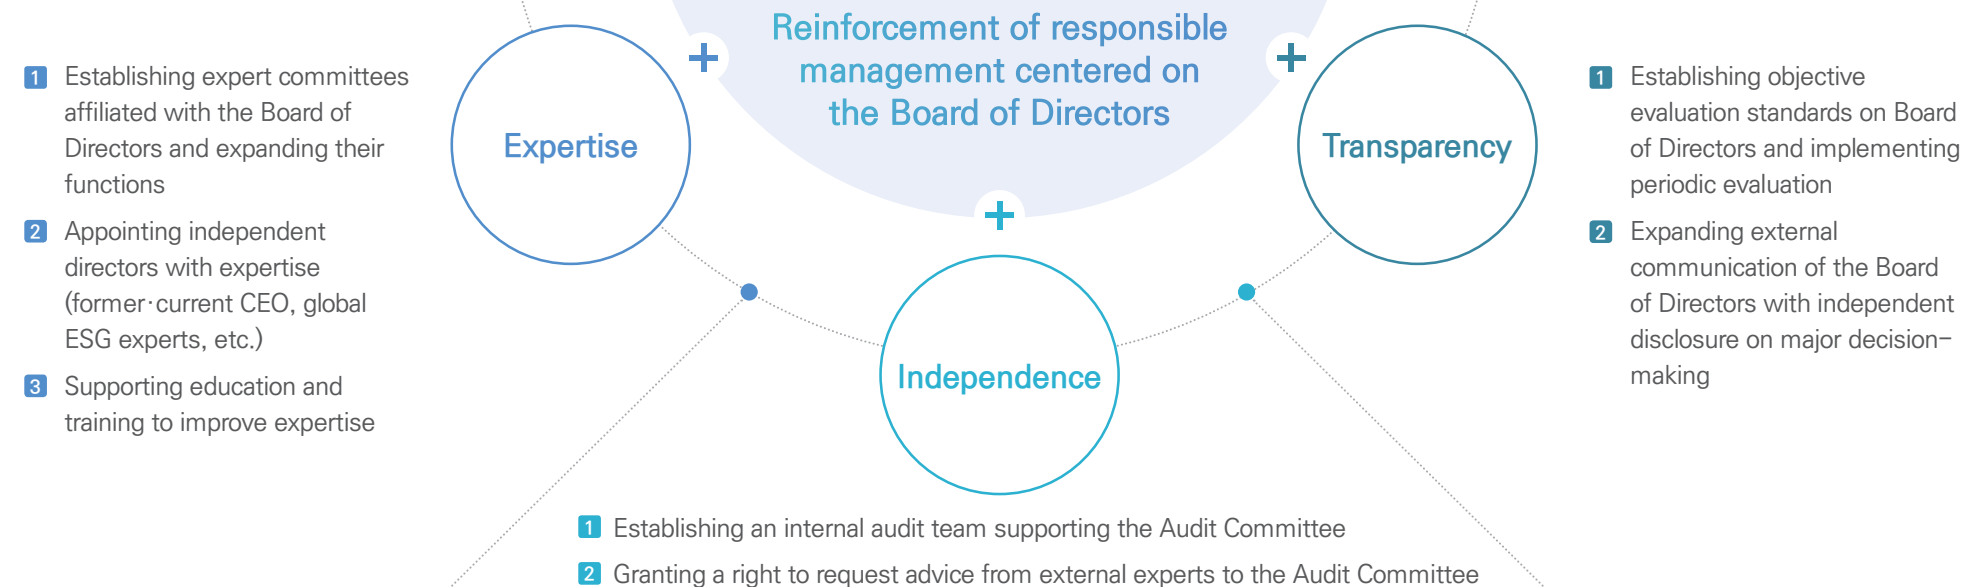

SK Inc. is **devoted to all of our stakeholders' happiness** through **the improvement of SK Governance**

SK Inc. aims to move into a global ESG enterprise through a different level of ESG management. To this end, SK Member companies including SK Inc. will further strengthen responsible management centered on the Board of Directors. SK Inc. will elevate the expertise, competency, independence and transparency of the Board of Directors as the highest decision-making body. SK Inc. will factor in the stakeholders' happiness as a litmus test of the most important management principles in all decision-making processes.

Establishment of a global first-rate **premium governance system**

Evaluating president and CEO, recommending candidates for independent director, deliberating compensation for internal director

Implementing prior deliberation related to governance including reorganization of governance, etc.

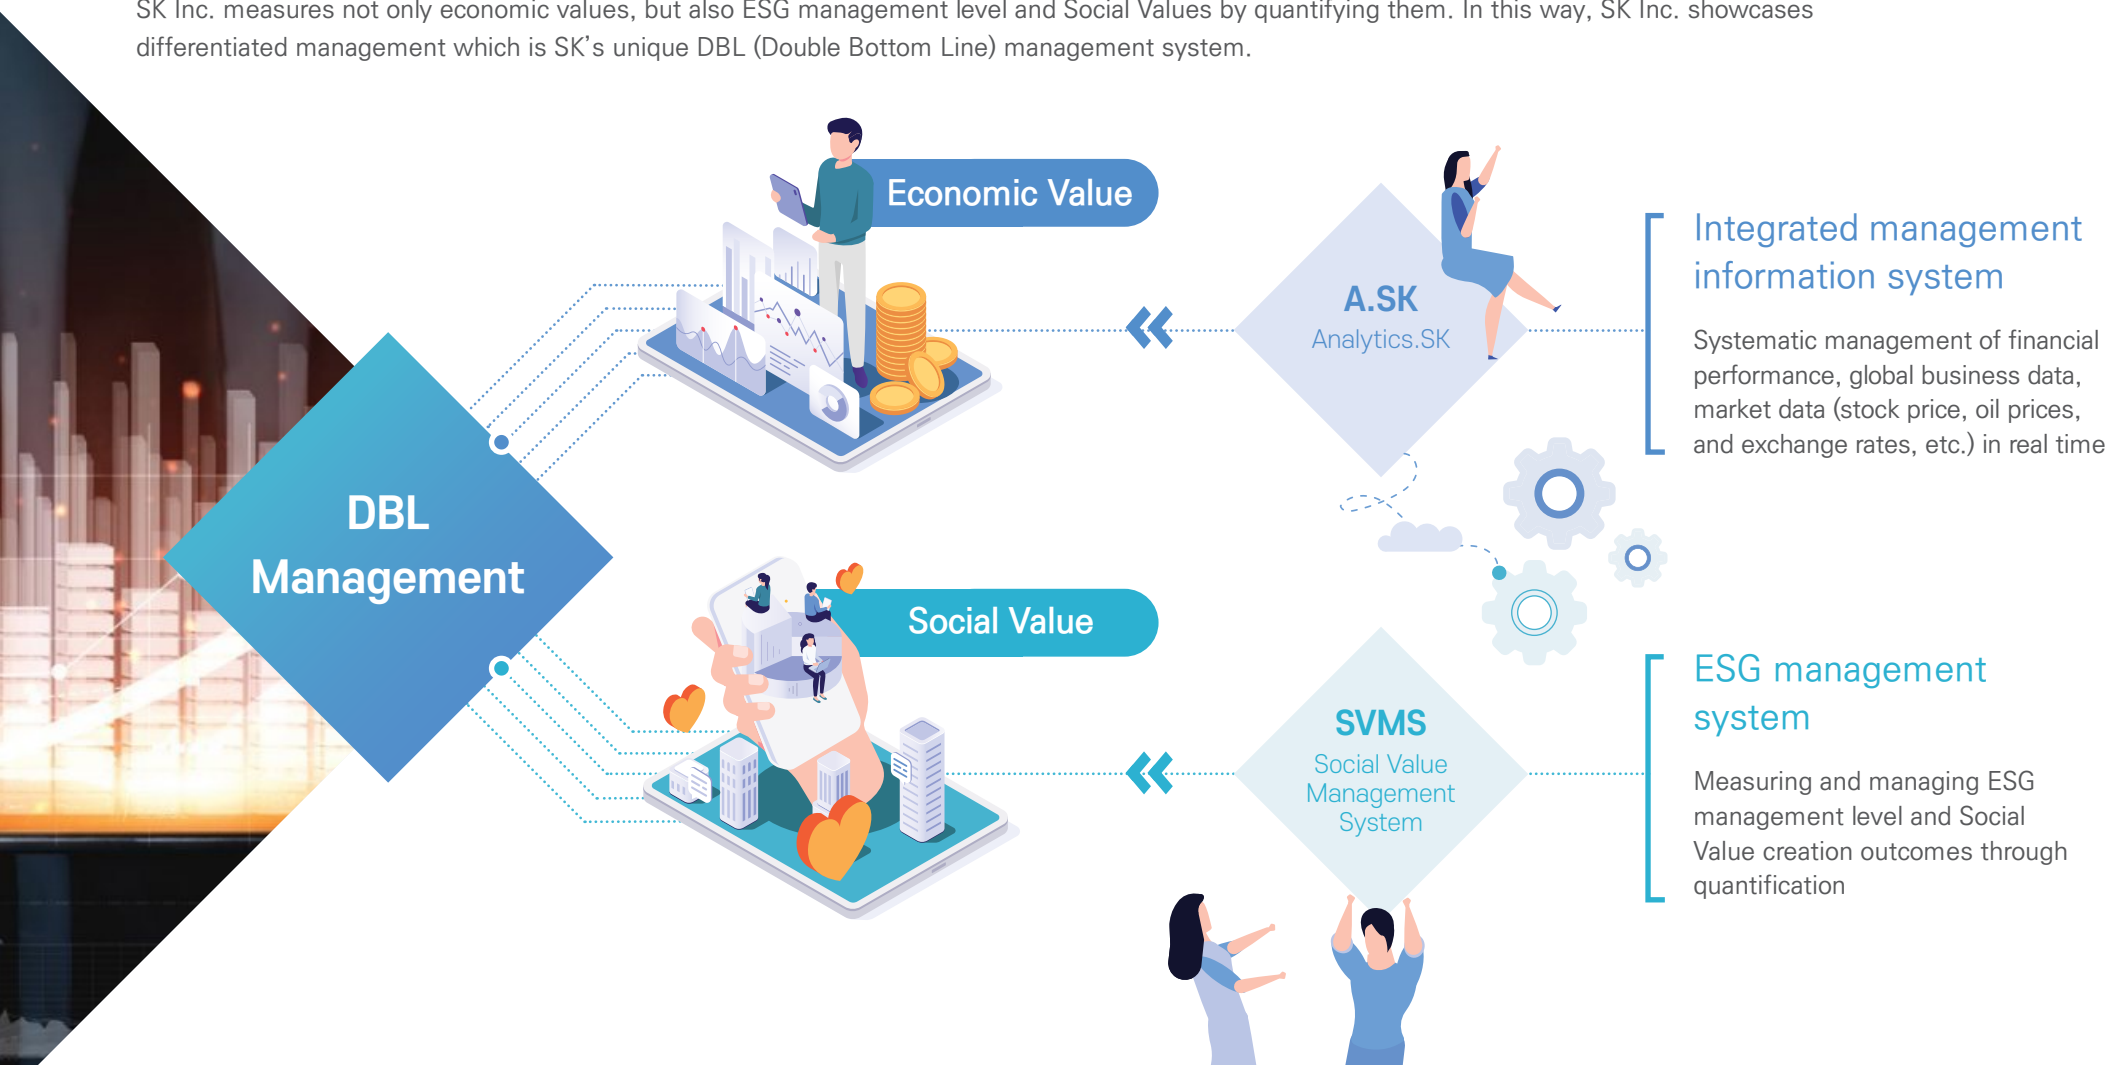

Designating dedicated teams by committees, regular evaluation and training of the Board of Directors → **SK Inc.**

SK Inc. preemptively builds exemplary governance. SK Inc. reinforces an institutional approach for core performance indicators of company management, including HR, strategy and audit, etc. to be shared and discussed with the Board of Directors. The comprehensive approach enables SK Inc. to be a benchmark for SK Group's governance improvement. Through this, SK Inc. will play a constant **role model for SK Group's governance improvement**.

SK Inc. **leads system-based ESG management** to **realize Social Value** for corporate sustainability

A major reason why SK's ESG management is differentiated from others' is that our system enables us to simultaneously pursue Economic and Social Value. SK Inc. measures not only economic values, but also ESG management level and Social Values by quantifying them. In this way, SK Inc. showcases differentiated management which is SK's unique DBL (Double Bottom Line) management system.

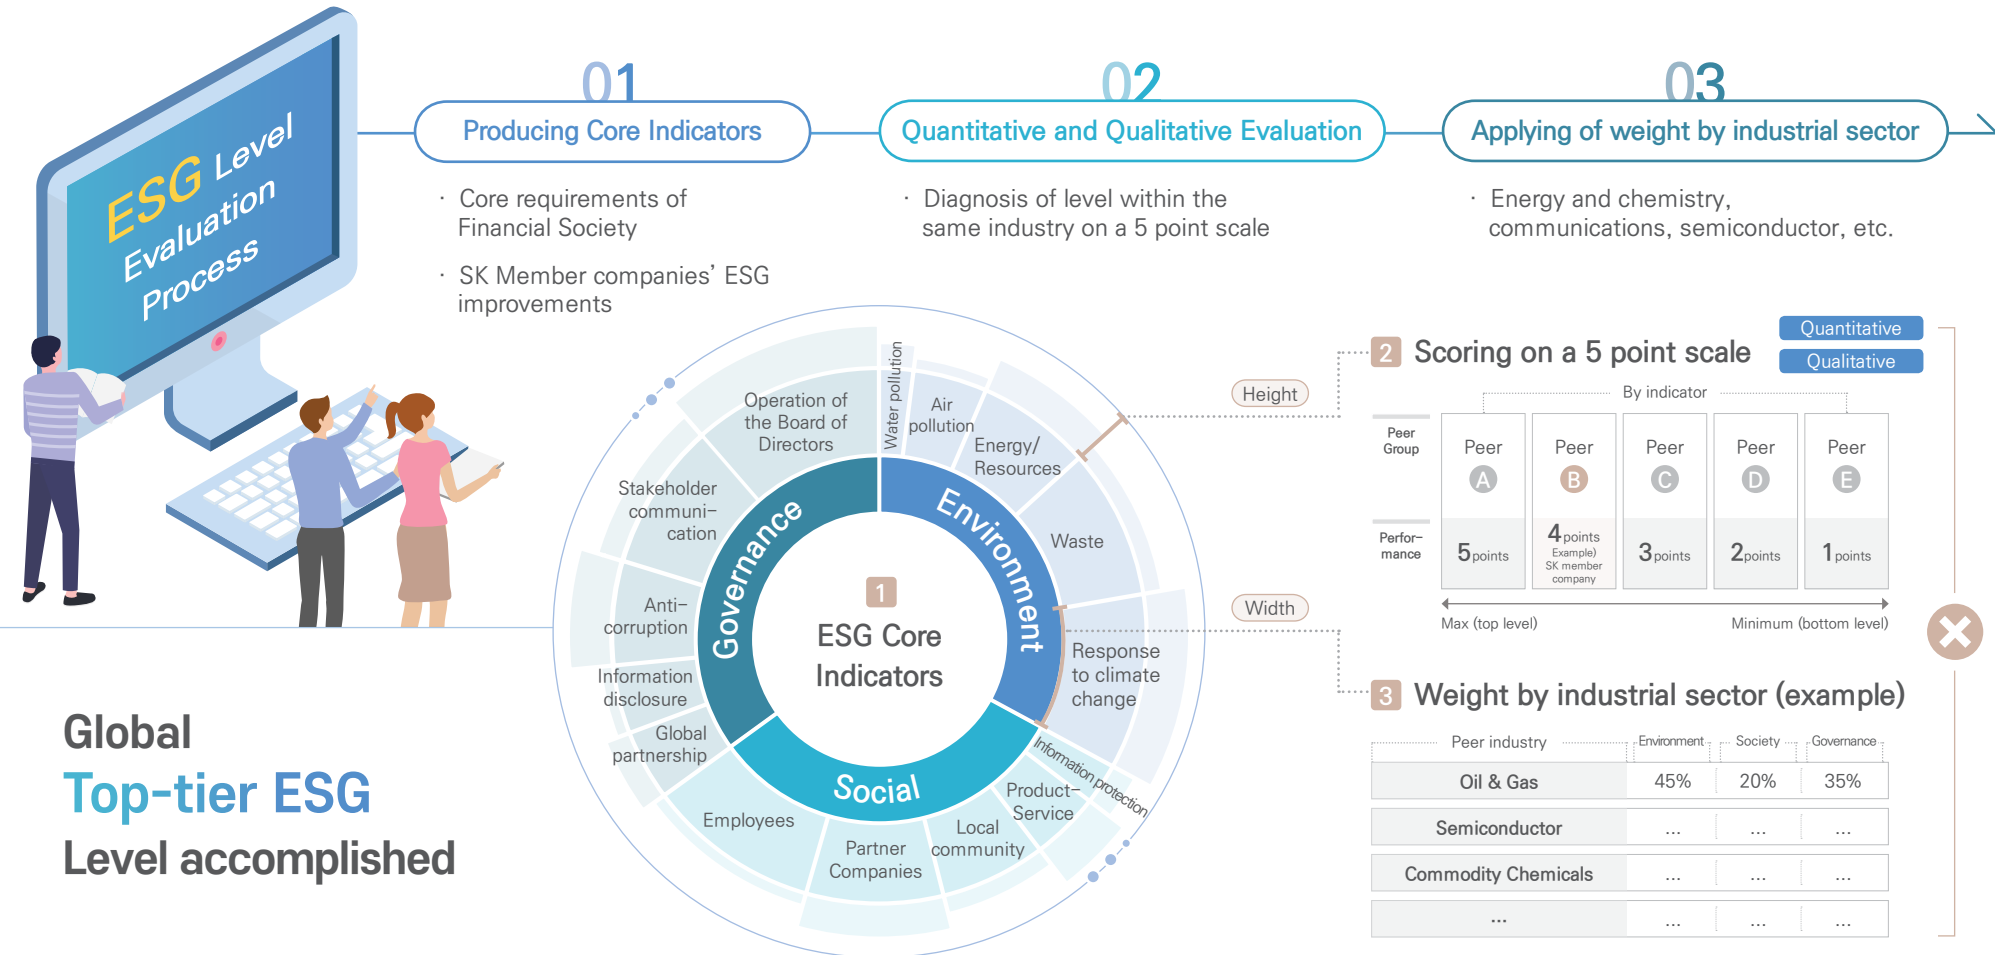

In 2020, SK constructed a Social Value Management System (SVMS) commonly throughout all SK member companies. **Based on SVMS, SK Inc. reflects ESG performance evaluation results in major decision-making process.**

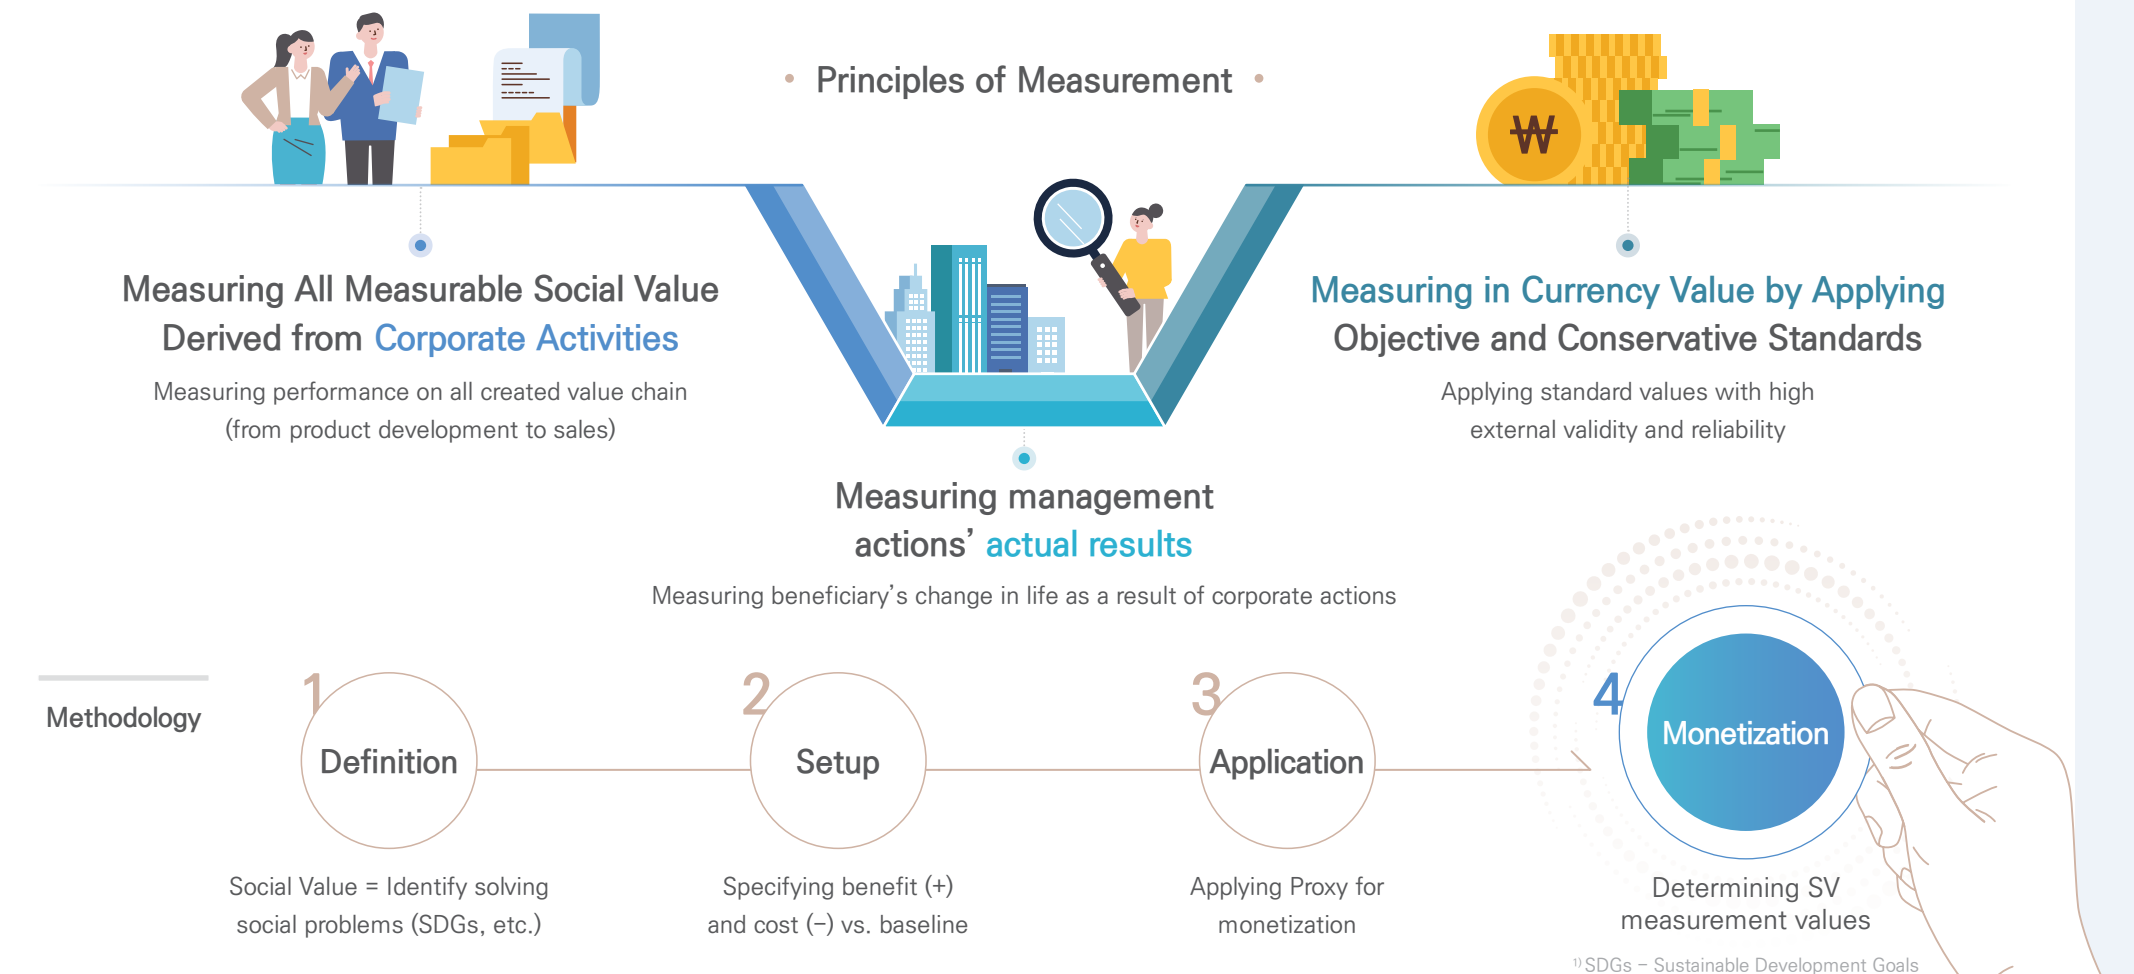

KPI Management for Each of the ESG Areas

The Financial Society has strong interest in SK's ESG management and demands addressing ESG-related core issues. In response, SK Inc. has produced the common ESG core indicators for SK member companies. SK Inc. aims to adopt ESG management at the global leading company level by each industry.

Social Value Performance Management

SK has been developing a Social Value measurement methodology since 2018 and measures SK member companies' Social Value creation performance with monetization values. This focuses on practices for Social Value creation, through which SK Inc. will ensure corporate sustainability and solve social problems in more active ways.

SK Inc.'s Social Value Performance

SK Inc. has been measuring Social Value creation performance since 2018 and has been reflecting the results into major internal decision making and management actions.

In 2020, SK Inc. created **KRW 942.1 billion**, **KRW 84.4 billion**, and **KRW 12.6 billion** of SV in three respective sectors of indirect contribution to economy, business activity, social contribution through the following : active stockholder return policy, pursuit of SV creation business model, and social responsibility activities, etc. in response to COVID-19.

2020

Indirect contribution to economy

Values indirectly contributing to economy through corporate activities

KRW **942.1** billion

Social performance in business activity

Values generated through product development, production, and sales

KRW **84.4** billion

Social performance in social contribution

Values created with social contribution activities in communities

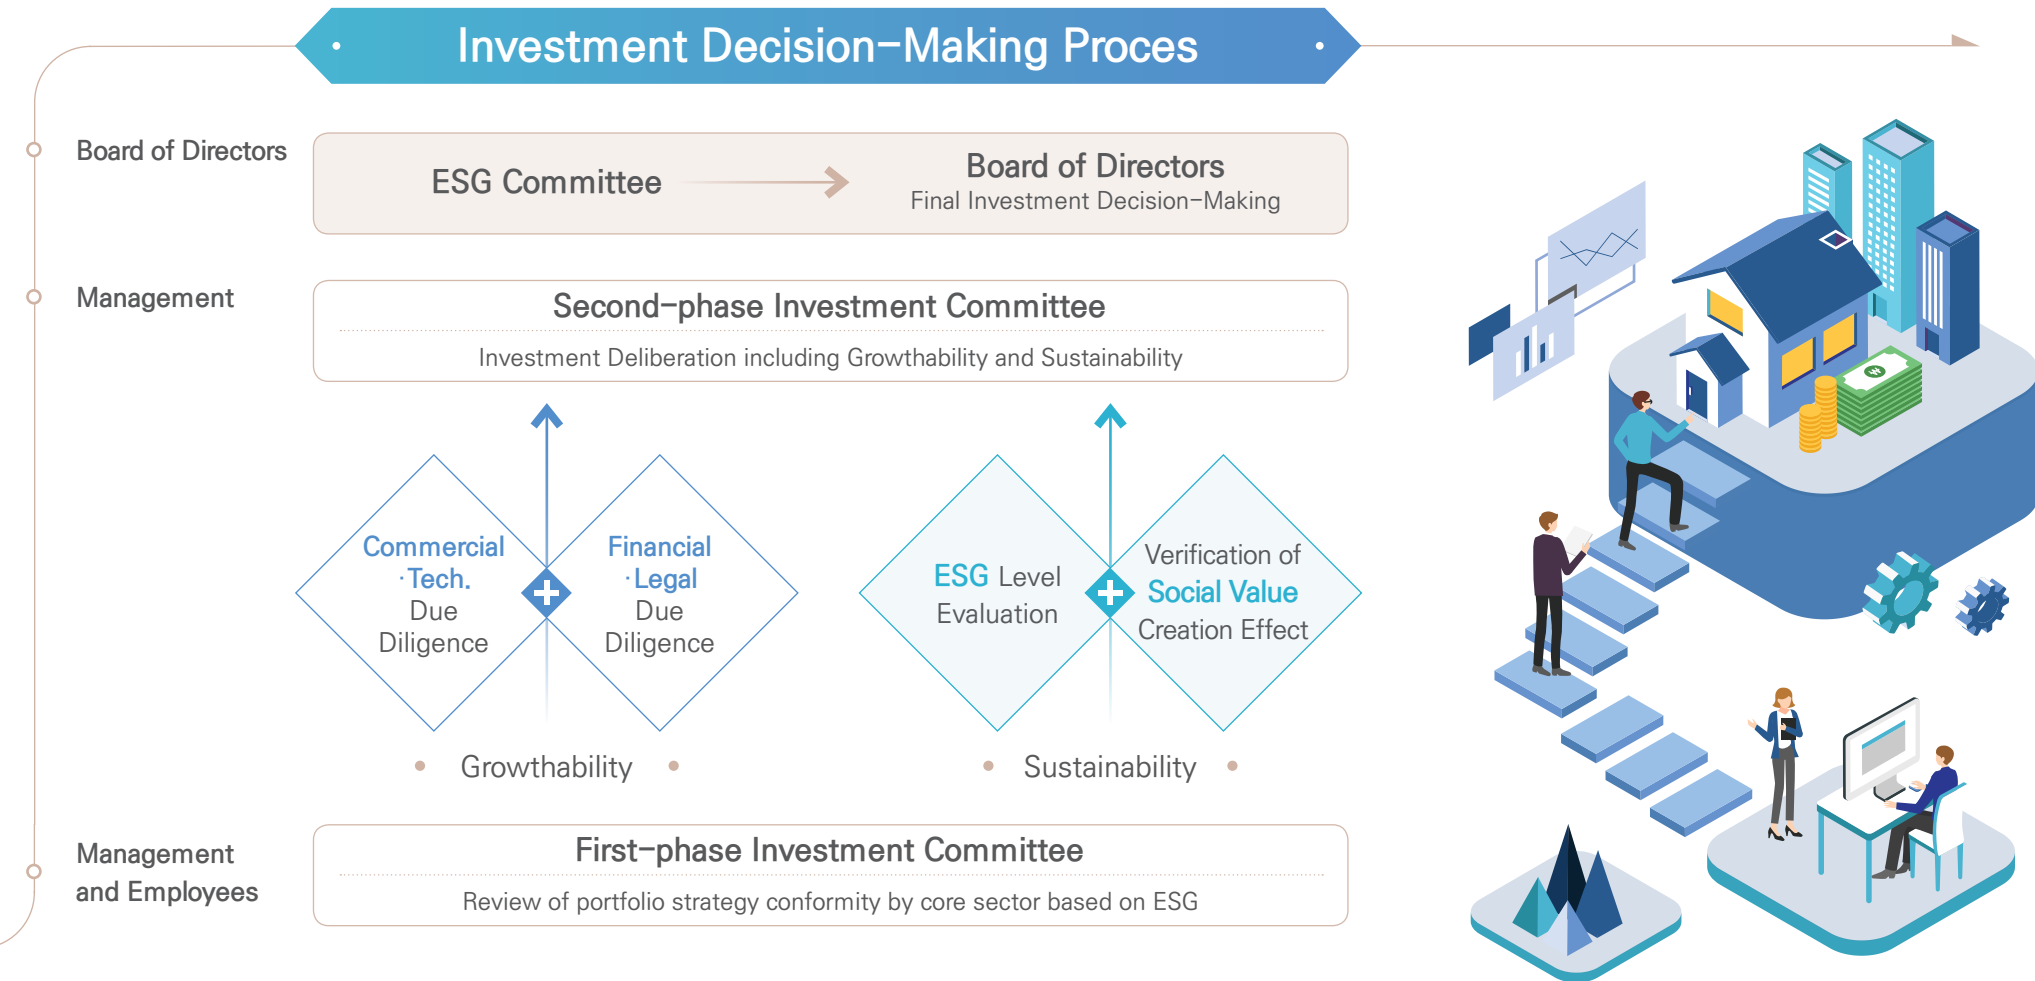

KRW **12.6** billion

SK Inc. will focus more on creating SV performance in business sectors based on our competencies. SK Inc. will continue to create **differentiated SV-based values** through employees' DBL capabilities, which have been further strengthened with a 'new model for entrepreneurship'

SK Inc. will elevate the **portfolio's sustainability** through the **ESG approach** throughout the investment process

SK Inc. integrates an **economic value analysis** and an **ESG approach review** and applies the results in **investment decision-making**

Social Value Story

With SK's good influence throughout the world, **SK Inc.** builds a better future.

The SIAT project continuously advances the SIAT alliance with a variety of stakeholders to foster the talent of the young people with disability and systematically support their employment.
SK Inc. tries to actively support them in realizing their dream of becoming ICT experts.

Direction

Improving quality of life through people with disability's independence and growth

More information on SIAT academy is available on the Happy School Foundation website.

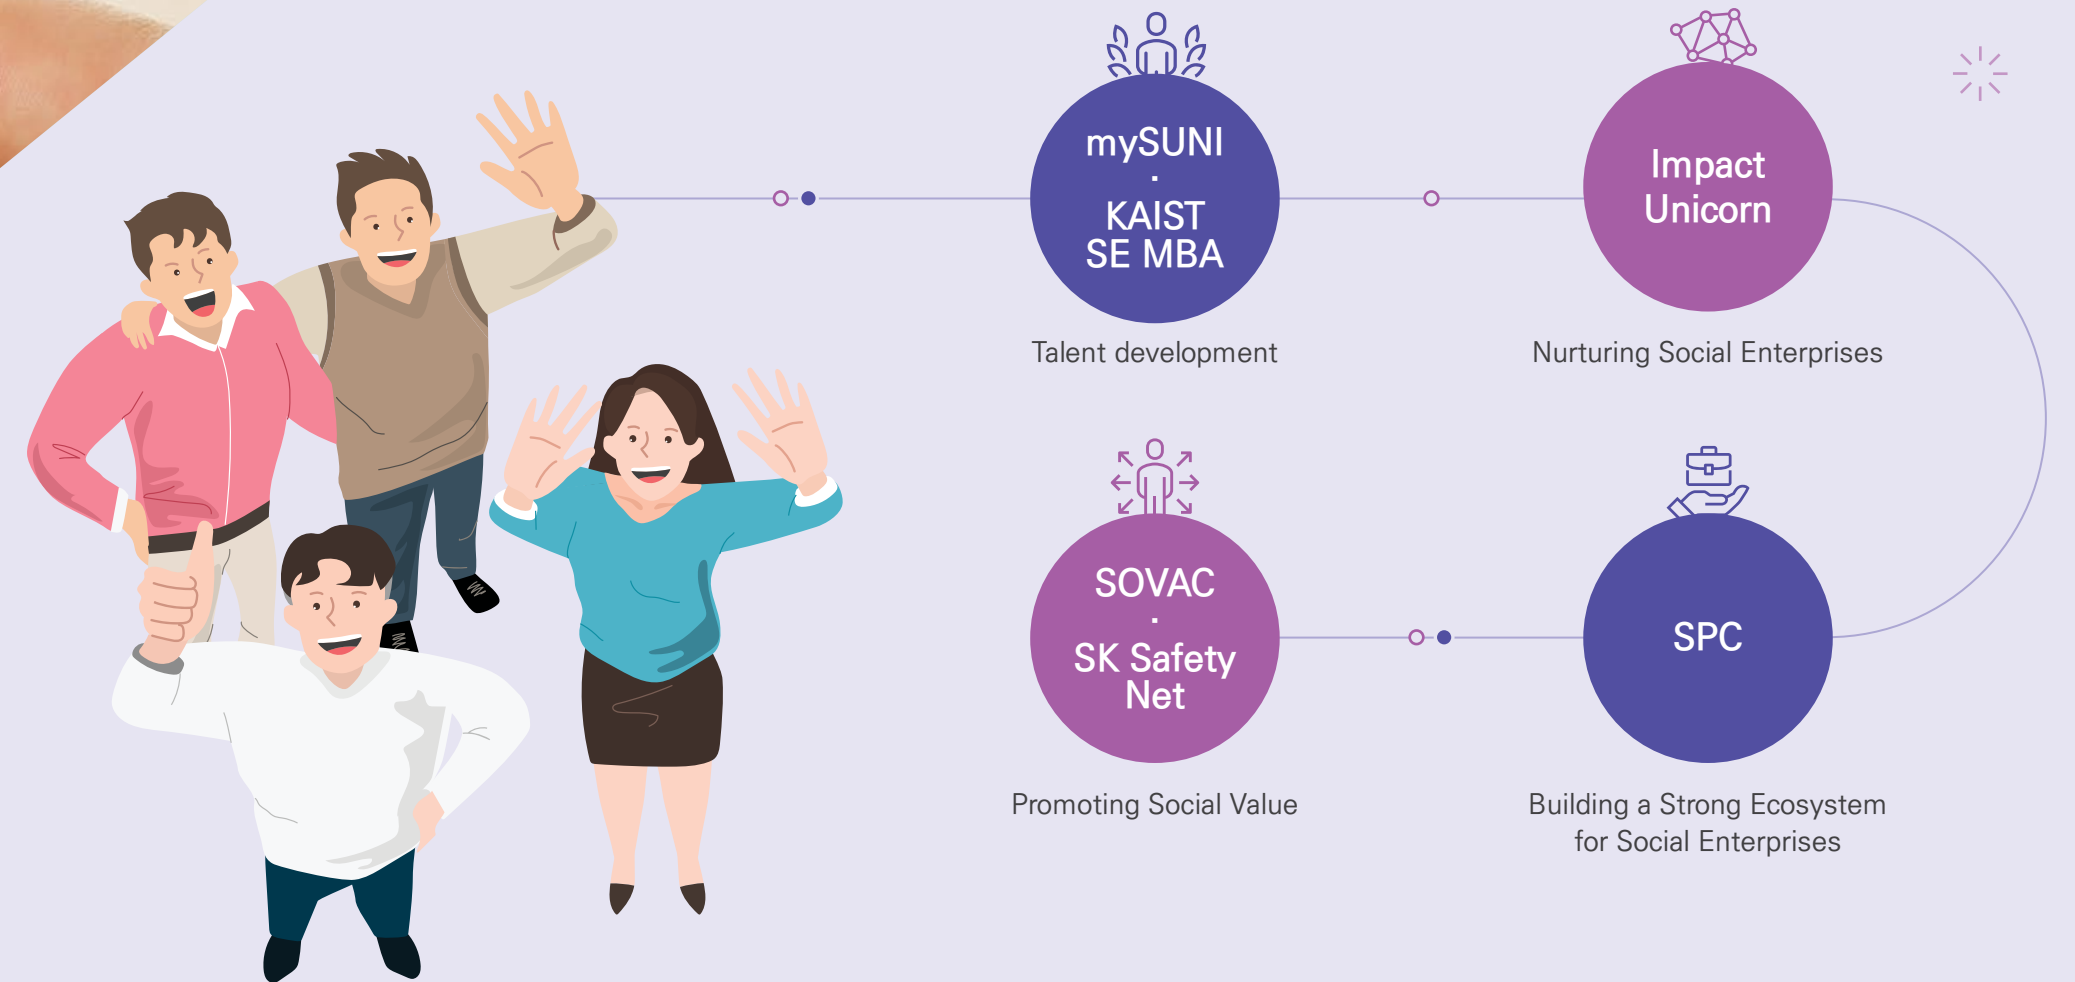

Promoting Social Value Across Wider Communities

Now, SK introduces activities to improve social values.

Transforming All Values Created by SK into Social Values

From an economic value-centered era in which economic profit and efficiency were more important than anything else, our society is now gradually turning into a era of creating Social Value which accepts various social demands. Companies should actively communicate and coexist with diverse stakeholders to create social values. SK defines all the value that we create for stakeholder happiness as having social value and is vigorously putting this into practice.

Fostering Talent for Future

mySUNI (SK UNiversity)

In the era of the fourth industrial revolution, employees' competitiveness has become a key issue directly relevant to corporate competitiveness. This is why SK has made mySUNI a platform to reinforce our employees' competencies. The mySUNI, established in 2020, is a learning platform from SK Group to persistently secure and accumulate employees' competencies and develop them further, while letting the employees work and learn simultaneously.

Securing Long-lasting Base for Employee's Happiness
through Accumulation of Human Capital

Future Opportunity Preparation

- Enhancing the ability to executive Business model
- Expanding opportunities for growth

Life Changing Education

- Meeting employees' needs to grow
- Chances for career transfer and improving job security

Transform into Learning Organization

- Flexible to environmental change
- Building work efficiency

Nurturing Social Enterprises

Impact Unicorn

In 2020, Korean companies certified as social enterprises were 2,704, up more than 10% compared to 2019, despite COVID-19. However, some limitations emerge in creating a certain level of competitiveness as social enterprises overlap each other substantially.

SK has promoted the Impact Unicorn¹⁾ project to overcome these limitations and spur growth potential. 63 union models applied for the related contest in 2020. 6 companies achieving excellent evaluations among them are currently receiving support.

SK Inc. will consolidate business cooperation with the member companies and continue to attract additional investment.

01

Searching for Impact Unicorn Leadership

- Selecting candidate CEOs, anchor companies, and accelerators

02

Selecting Combined Structure Design and Portfolio

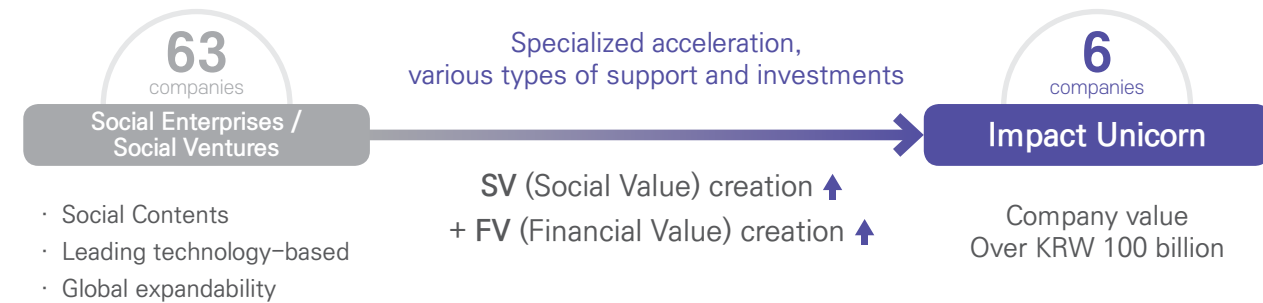

- Determining business combination format
- Reviewing major Investment Divisions and portfolios

03

Fostering / Consulting

- Organizing/using Advisory Committee
- Providing necessary functions (i.e. shared-services)

Outcome in 2020

¹⁾ Impact Unicorn : Social Enterprises or Social Ventures valued over KRW 100 billion

Building a Strong Ecosystem for Social Enterprises

Experimental Policies for win-win situation

Outcome of 2015~2020 (total)

2020 Contactless Awards Ceremony

SPC (Social Progress Credit)

A program to encourage good deeds and good businesses is the very Social Progress Credit (SPC) service carried out by SK since 2015. This is a service in which a Social Enterprise's problem solving outcomes are measured in monetary value and incentives are provided. SPC service is to help social enterprises' financial issues.

Since 2015, the participating companies created Social Value at KRW 168.2 billion by 2020, and they earned KRW 33.9 billion in incentives.

SK will constantly upgrade the system for systematic measurement and compensation of social values through SPC.

For more information on SPC, refer to the website of Social value Enhancement Studies(CSES).

Promoting Social Value

SOVAC (SOcial VALue Connect)

The largest private sector-led social value festival in Korea, SOVAC (Social Value Connect)! Since 2019, it has been used as an arena to gather numerous resources and competencies in the social value ecosystem, spread compassion to solve social problems, and expand networking.

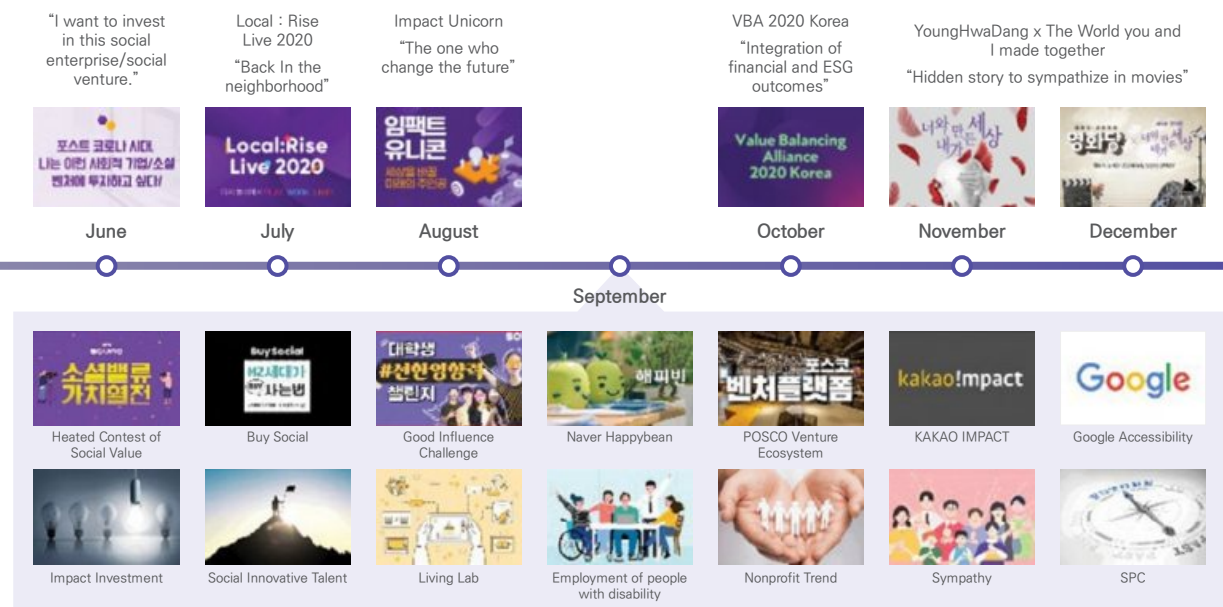

In 2020, SOVAC was held in online because of COVID-19, focusing on connection of various sectors to create Social Values. More audiences were able to join beyond time and place, and SK Inc. confirmed that SOVAC can become an event for whoever is interested in Social Values, not just for SK.

SK Inc. will continuously promote high-quality content to improve social awareness and expand SV community through Monthly SOVAC, held in online in the COVID-era.

For more information on SOVAC, refer to the website of SOVAC.

Outcome of 'Monthly SOVAC' in 2020

SK Safety Net

The unprecedented COVID-19 pandemic has created blind spots in terms of social welfare. SK is concerned about its role more seriously than ever and believes that a safety net is necessary for social welfare for the stakeholders and SK employees. SK leveraged our unique safety net concept, by which SK Inc. is actively assisting people in need.

The "Ontact*" Project ("On" means warmth in Korean)

SK Inc. has carried out good quality meal and lunch box services through the budget aid of free meal giveaways and drinking water to solve nutrition imbalance of the socially underprivileged.

- For **107** days (Jan.~Apr. 2021)
- 20** SK affiliates participated in **19** areas nationwide.
- Offering good quality meals to **1,535** people.

Happy Meal-box

In February 2020, COVID-19 has spread widely. SK Inc. offered Happy Meal-box service together with Daegu's social enterprise "Donghaeng", "Happy Alliance" and the SK affiliates' employees in Daegu and Gyeongbuk, the most hard hit areas.

Employee Care Program for Prevention of COVID-19

SK Inc. has conducted thoughtful care programs for employees' work environment improvement.

- Supporting work from home
- Transforming to a two-shift work system
- Offering preemptive special holiday for high risk groups for infection including employees in manufacturing industry, in pregnancy, and with underlying diseases
- Offering temporary accommodation to the expats and their family

ESG Letter

What do you think about
the **sustainable future**
envisioned by SK Inc.?

I hope that vaccine rollouts that started early this year will put the economy on the road to recovery. I believe that we can overcome big challenges if the members of society and businesses trust and support each other.

Yet the reality of today is still grim.

Take a look at the environment surrounding us—a rapidly changing international landscape, increasing uncertainty, global social issues such as climate change, declining population, and changes in the way we live caused by technological development. This means that we will still have to constantly pursue change even in the post-Covid world. All this calls for a fundamental change in business management. Everyone at SK Group recognizes the harsh reality and the need for fundamental innovation. We would not carelessly label this as a crisis or give in, but rather turn this as a new growth opportunity.

SK Inc. has developed a Financial Story that embraces ESG values. The Financial Story well reflects our new management direction, and we are developing detailed action plans. A business philosophy is increasingly incorporate ESG factors—as a means to resonate with the future generation by addressing global environmental issues, prioritizing social value in business activities and building a sound corporate governance.

SK Inc. practices ESG-incorporated management and is leading the way in making a sustainable future. The concrete actions include declaring our vision of a ‘Sophisticated Value Investor,’ reshaping the business portfolio centering on the four key sectors, reinforcing responsible management centered on the Board of Directors.

The time has come to reflect upon the new role of companies that can meet the expectations of society. Businesses and business leaders are now needed to adopt a ‘new model for entrepreneurship.’ At SK Inc., we will always look at ourselves and ask ‘What kind of value and happiness can we bring to members of SK and society?’ We will practice ESG management and adopt a ‘new model for entrepreneurship’ so that we can address various social issues in a meaningful way through business activities. SK Inc. is committed to being your trusted partner in pursuit of a sustainable future.

I invite all our stakeholders in our journey towards a sustainable future.

Thank you.

ESG is a new principle of
SK management and an
essential element of **Deep Change**.

We will focus more on
creating a **sustainable future**
and fulfilling our corporate
social responsibility.

Chairman & CEO of SK Inc.
Chey, Tae-won

In November 2020,

RE100 Declaration

Seven SK member companies, including SK Inc., announced their pledge to RE100 and began to actively respond to climate change.

SK's new challenge for Green growth.
SK member companies jointly declared Net Zero and are stepping up to respond to climate change and solve environmental problems.

In June 2021,

NET ZERO Declaration

Environmental Management

Vision and Strategy

- As environmental management emerges as a key element of ESG, pressure from domestic and foreign investment institutions and civil society demanding better and meaningful environmental management and response to climate change continues to rise.
- The requests for information and financial disclosure on the response to climate change are increasing, and its importance is being manifested into an international standard.

- SK Inc. recognizes that tackling environmental issues is a universal task for mankind, and it is our responsibility and duty to pass on a clean global environment to the next generation.
- Accordingly, SK Inc. acknowledges the need for systematic and comprehensive management of the environmental sector that surpasses the current level
- establishing the Green ICT 2040-oriented new environmental management strategy and a sustainable performance management system

Vision

Environmental Management

Response to climate change

Participating in RE100 2040 and Net Zero (carbon neutral) 2040

1) Participating in international initiatives

- Joined RE100 Initiative* membership (December 2020) to undertake climate change response required by the international community, and set RE100 2040 and Net Zero 2040 goals.

2) Managing greenhouse gas and electricity consumption

- SK Inc.' total greenhouse gas emission in 2020 was 64,014 tCO₂e (excluding scope 3), more than 99% of which was emitted from electricity use. This is estimated to continuously increase until 2040.
- Most of the electricity consumption arises from data center power consumption and is expected to rise by about 7% per year on average until 2030 with the expansion of customers and increase in data usage needs.
- SK Inc. is pursuing a goal of reducing electricity demand by 3.5% or more annually through additional investment and efforts, such as introducing new technologies to operate data centers with the world's foremost power efficiency and new energy-saving measures to be planned.

3) Renewable Energy Power Procurement Plan

- Purchase of 5.7GWh of green premium electricity in 2021 to contribute to the renewable energy industry ecosystem.
- Continue efforts to expand self-generation of new and renewable energy such as increasing the power generation capacity of solar power generation facilities (150kW → 650kW) and introducing hydrogen fuel cells from a mid- to long-term perspective.
- In addition, introduction of RE100 implementation measures such as third-party PPA (Power Purchase Agreement) to be reviewed in light of domestic and international market conditions.

4) Presenting mid-to long-term roadmap

- SK Inc. plans plan to present an implementation plan and performance measurement/monitoring system according to mid- to long-term roadmaps for achieving RE100 2040 at the end of 2021.

* RE100 Initiative: A campaign started from an NGO of England, 'The Climate Group', which aims to replace 100% of electricity used by company with Renewable Energy. By this year (2021) 284 companies worldwide are included.

Disclosing information on the strategy for responding to climate change: TCFD

- Operation of a management system that meets the recommendations of the Task Force on Climate-related Financial Disclosure (TCFD)
- Short term and mid-to long-term risks and opportunities based on climate change scenarios, Establishment of the Greenhouse gas reduction implementation strategy based on financial impact analysis, and continuous monitoring of target levels to achieve.

Response to resource circulation and expansion of eco-friendly business

Sophisticating of resource circulation (waste/water) management level

- To expand the resource circulation of waste and water, which are targets of resource circulation management, and minimize environmental pollution, the management level and goals have been elevated, applying the international standards of ZWTL (Zero Waste to Landfill) / WRI (World Resources Institute).
- To reduce the amount of waste landfill, the scope of tracking management is expanded from the primary collection companies to secondary and tertiary incineration and landfilling providers.
- Household waste minimized through employee participation programs such as proper disposal and reduction of disposable products used.

Expanding ICT-based eco-friendly business

- Efforts are being made to leverage the environmental sector as an opportunity for business growth through expanded exploration of an eco-friendly business Model (BM) and eco-friendly procurement policies.
- As an ICT company, digital technologies that combine environment and technology such as air pollution reduction, water pollution reduction, and energy savings and eco-friendly solutions are explored and commercialization targets are promoted.
- Impact of eco-friendly management is strengthened by increasing eco-friendly purchases such as eco-friendly certified products, high-efficiency energy products, and products with reduced harmful substances.

Environmental Management

Internalization of environmental management

Establishing and operating environmental management system

- Diagnosing the environmental management status to minimize internal and external environmental risks, to establish environmental decision-making process, and to improve the level of environmental management.
- Acquisition of ISO14001 in June 2021, and continuous improvement of the company's environmental management system is promoted.

Establishing and internalizing management infrastructure

1) Reorganizing environmental management organization

- Implement CEO-directed strategic tasks such as establishing environmental management strategies and responding to climate change through the company-wide environmental management organization under direct supervision of the CEO.
- Assign staff in charge of environment and establish processes for each unit to enable organic collaboration with the unit in charge of environmental management, including environmental risk assessment by each business unit, environmental impact assessment, environmental performance monitoring, and compliance with environmental regulations.
- To minimize environmental risks in data centers with high environmental load, an organization dedicated to promoting eco-friendliness was established, and approaches are taken to strengthen data center management in various directions.

2) Risk Management

- SK Inc. operates a risk management consultative body, in which management mainly participates, for a prompt risk response system. (Refer to p.122 "Risk Management Reporting System")
- For environmental risks that have a significant impact on business activities, a risk reporting management system is established to facilitate reporting in a timely manner and identify/share risks preemptively by collaborative departments and risk management departments.

3) Environmental performance management

- Significant environmental impacts are minimized and target management is implemented through annual environmental risk and environmental impact assessments.
- Zero level of environmental accidents and legal risks are maintained through integrated management of company-wide environmental regulations and compliance, and periodic compliance evaluation by legal compliance departments.
- Transparent management of environmental indicators, such as greenhouse gas, energy, and water, through SVMS (Social Value Management System) which is an ESG Management System → i.e. setting target levels for each indicator, monitoring monthly achievement, and managing SV conversion of environmental performance

4) Employees Engagement Activities

- Establishing a new environmental management portal to enhance employees' awareness of environmental management

- As a way to enhance employees' consensus and participation in environmental management practices, an employee participation program through the Haenggarae mobile application is organized, and individual activity records and carbon emission reduction measurements are provided to each employees

*Haenggarae : SK Inc.'s mobile platform for social issue solutions and practices

Measured value of carbon emission reduction (example)

Area	Carbon emission reduction	Economic effect
1 mug/tumbler	11g	KRW 155.6
1 floor using stairs	10.6g	KRW 7.55
1 meal with no leftovers	152.5g	KRW 345
1 page of printing on both sides of the paper	2.88g	KRW 10
1 step of healthy walking	0.184g	KRW 0.055

Eco-friendly Activities

Status of Eco-friendly Data Center

Pangyo Data Center

- About 66,950m² of total floor area (6 ground floors and 4 underground floors)
- About 18,500m² of computing room
- Capacity 70 MW

- High-density/modular environment for cloud service, network neutrality for multi-line connection, and easy and fast cloud service connection support.
- Network ownership provided to customer through net neutrality.
- State-of-the-art equipment with high availability, high-efficiency, running on new and renewable energy.

Daedeok Data Center

- About 13,200m² of total floor area (4 ground floors and 1 underground floor)
- About 5,780m² of computing room
- Capacity: 9MW

- Design and construction that meet major domestic and overseas DC (Data Center) standards.
- DC operation reliability at Tier 3, with power stability and disaster response
- Acquired Green DC certification (2013~).
- Securing availability through N+1 or 2N configuration of key facilities.

Green data certificate

Operating Eco-friendly Data Center

Reducing greenhouse gases through expanded use of new and renewable energy

- To actively respond to climate change, SK Inc. promotes Greenhouse gas reduction activities by actively introducing new and renewable energy and making continuous efforts to improve operational efficiency.
- To expand self-generation of renewable energy, a large-scale solar power plant is being expanded, and investment into solutions, such as hydrogen fuel cells, is planned in light of market conditions and economic feasibility.

Enhancing DC energy efficiency

- Conduct continuous energy efficiency activities by upgrading the data center management system and introducing a highly efficient system.
- Introduced and operates highly efficient facilities such as highly efficient modular uninterruptible power supply (UPS), pre-cooling freezer, discharging fans applied to walls, etc.
- Introduced a technology-driven system that sprays micro-water through a water spray nozzle into the freezer, lowering the ambient temperature around the freezer to improve the efficiency of the freezer during summer.
- To minimize power loss, the entire upper surface of the new extension is fully contained so that cold air can be supplied only to IT equipment without waste.
- Efficient management and improvement of energy in the center is in progress through performance management of DC-based facilities, such as HVAC and power facilities, power monitoring of IT equipment in the computer room, and real-time control of computer room temperature

Eco-friendly Activities

Investment in environmental technology

Global hydrogen business

Fuel cells for mobility and power generation

- Invested in Plug Power, a US company listed in NASDAQ with core hydrogen technology
- Plug Power has developed a number of key technologies including hydrogen fuel cells (Highly efficient vehicle fuel-cell PEMFC, Proton Exchange Membrane Fuel Cells), electrolyzer technology (water electrolysis technology that produces hydrogen by supplying power to water), and hydrogen production infrastructure technology (liquid hydrogen plant and hydrogen charging station construction) and hydrogen mobility (expanded from existing forklifts and trucks to aircraft, drones, etc.)

Plug Power Hydrogen Tank Lorry

Turquoise hydrogen

- SK Inc. invested in Monolith, a U.S. startup that succeeded in the world's first mass-production of 'turquoise hydrogen'
- Monolith is the only company in the world that holds turquoise hydrogen process technology in the commercialization phase, having completed construction of the turquoise hydrogen mass production factory in June 2020 for the first time in the world.
- Turquoise hydrogen is produced when natural gas is injected into a high-temperature reactor and decomposed into hydrogen and solid carbon. This is classified as eco-friendly clean hydrogen along with 'blue hydrogen' and 'green hydrogen' because carbon dioxide is not generated during the production process.

Monolith turquoise production facility

Battery and materials business

Copper foil

- SK Inc. invested in Watson, the world's No. 1 copper foil maker
- The demand for copper foil is expected to expand to 750,000 tons by 2025 due to the increase in demand for electric vehicle batteries and the expanded introduction of energy storage systems (ESS).
- Copper foil is a thin copper foil used for electronic circuit boards and anodes of secondary batteries and is the key component of batteries manufactured through sophisticated process technology.

Cross-sectional diagram of secondary battery

Lithium metal battery

- SK Inc. invested in Solid Energy Systems which possesses lithium metal (Li-Metal) battery technology, which is the core of next-generation batteries
- Solid Energy Systems can develop lithium metal batteries with twice the energy density in comparison with existing lithium-ion batteries (LiB) by applying next-generation new materials.
- It is expected that the replacement of existing fossil fuel-based energy sources will be accelerated by improving energy density and lifespan of charging and discharging.

Development of next-generation lithium metal battery

Eco-friendly plastic business

LIMEX

- SK Inc. invested in TBM, a Japanese company that manufactures eco-friendly materials replacing plastic and paper.
- TBM develops, sells, and manufactures LIMEX, a composite material containing 50% or more of minerals such as limestone.
- When LIMEX materials are used, the consumption of polyethylene (PE) and polypropylene (PP), which are materials for plastic, can be reduced by 50%. In the case of paper substitutes that do not use wood pulp, water consumption can be reduced by 98% during manufacturing.

LIMEX commercialization

TCFD Report

Comprehensive summary

Starting with the C&C business in 2021, SK Inc. plans to disclose its climate change response strategy and continue to communicate with stakeholders including shareholders.

Item	Contents	CDP link
Governance	SK Inc. established an ESG committee within the board of directors to determine measures to respond to risks related to climate change, to review mid- to long-term strategic directions, and to approve, manage and supervise major tasks to be implemented. The management team, including the CEO, is playing the role of informing the environmental management direction of the company to employees and inducing company-wide cooperation for the expansion of eco-friendly business.	C1.1b C1.2, C1.2a
Strategy	SK Inc. analyzes the financial impact of short-term, mid- and long-term risks and opportunities from climate change scenarios, and establishes reduction goals and implementation strategies through this analysis.	C2.1 C2.3, 2.3a C2.4, c2.4a C3.1, C3.2 C3.3, C3.4
Risk management	SK Inc. identifies internal/external issues in connection with stakeholder requirements and determines the risk level and countermeasures by analyzing/evaluating risks and opportunities for each issue. Significant risks are periodically reported to the CEO and Board of Directors.	C2.2, C2.2a
Indicators/ Goals	SK Inc. periodically monitors Greenhouse gas emissions, energy consumption, and resource recycling indicators and manages performance. SK Inc. is particularly focused on managing the Net Zero 2040 and RE100 2040 targets.	C4.1, C4.1a C4.2, C4.2a C6.1, C6.3 C6.5

* CDP : Carbon Disclosure Project

1. Governance

1. Board-level oversight of climate change risks and opportunities-

- SK Inc. established the ESG Committee with a total of 6 members including 5 independent directors from the BOD according to the resolution of the Board of Directors on March 30, 2021. The ESG Committee is in charge of reviewing and deciding on major environmental issues, such as SK Inc.' mid- to long-term response to climate change.
- At the SK Group level, the SV Committee and the Environmental Business Committee under the SUPLEX Council are supporting Net Zero and RE100 initiatives.

2. The role of management to assess and manage climate change-related risks and opportunities

- The CEO of SK Inc. suggests mid to long-term directions by emphasizing the importance of environmental management, and leads the management to establish and internalize the environmental management system through direct discussion and review. Responsibilities and rights for establishing climate change response strategies and implementing all tasks to implement them were granted to the CSO (Director of the Happiness Promotion Center).
- In addition, SK Inc.' management is leading the investment in eco-friendly solutions and discovering business models to expand eco-friendly business, and is playing the role to induce company-wide cooperation.

2. Strategy

1. Analysis on financial impact from climate change risks (2020-2040)

- SK Inc. identified risks and opportunities arising from climate change, comprehensively analyzed risk factors and their impacts on the business, in particular, and prepared countermeasures to mitigate each risk.

Risks due to climate change and applicative scenarios

Transition Risks	Regulatory/Technical/Market Changes and Reputation Impacts incurred in the process of transitioning to a low-carbon economy.
	Analysis on changes in domestic and foreign policy on technology/market under the Korea 2050 long-term low-carbon power generation strategy (LEDS) and the B2DS and Net Zero by 2050 scenarios from the Int'l Energy Agency (IEA). - Analysis of the trend of Greenhouse gas emission reduction (p70) and financial impact of the application of the SBTi methodology * SBTi: Science Based Targets Initiative
	Acute/chronic risk in business infrastructure due to abnormal climate and extreme weather caused by climate change.
Physical Risks	Based on the RCP and SSP scenarios suggested by the IPCC, the impacts on facilities, infrastructure, and supply chains caused by temperature rise and natural disasters on the Korean Peninsula are analyzed.

- 1) LEDS (Long-term low Greenhouse gas Emission Development Strategies): Long-term Greenhouse gas reduction goals and strategies for each country is presented to the international community
- 2) B2DS (Beyond 2 Degree): A scenario that predicts the risk of climate change transition assuming societal low-carbon participation that utilizes innovative technologies of the future.
- 3) Net Zero by 2050: A scenario presented in line with the IEA's efforts to limit the long-term increase in global average temperature at 1.5°C (May 18, 2021).
- 4) IPCC (Intergovernmental Panel on Climate Change): An international consultative body under the UN established jointly by the World Meteorological Organization (WMO) and the United Nations Environment Program (UNEP).
- 5) RCP (Representative Concentration Pathway): Greenhouse gas reduction scenarios to reach CO2 concentration standards (420, 540, 670, 940 ppm) in year 2100.
- 6) SSP (Shared Socioeconomic Pathway): A scenario that supplements RCP in light of socioeconomic factors such as demographics and land use

TCFD Report

Short-term/mid- to long-term risks and opportunities

Risk type	Short-term (~2025)	Mid/long-term (2026~2040)
Transi- tion risk	Policy/Law	① Increase in the cost of purchasing carbon credits due to the increase in carbon emissions and rising price of carbon credits. ② Increase of additional costs associated with purchasing renewable electricity. · Litigation risk due to legal violations (However, there is no litigation history and relevance in the future is low).
	Technology	③ Increased investment due to new technology self-generation and expansion of low-carbon eco-friendly facilities. · Business competitiveness weakened if SK Inc. lags behind in the competition for eco-friendly technology development (decreased sales, loss of investment in technology development).
	Market	· In the case value proposition to customers fails, opportunity to enter the global eco-friendly market, a new growth biz. area, would be lost.
	Reputation	· Decrease in enterprise value and increase in response costs due to negative impact from media and stakeholders on climate change response.
Physical risk	Acute	④ Compensation and recovery cost in the case of data center power outage. ④ Recovery costs for damage to data center facilities in the event of a large-scale disaster (earthquake, heavy rain, lightning, etc.)
	Chronic	⑤ Increase in operating cost of data center due to temperature rise.
Oppor- tunity	Resource Efficiency/ Energy Source	· Expanded business demand for high-efficiency/eco-friendly data centers. · Various new technologies and renewable energy such as blue hydrogen and green hydrogen can be introduced according to the vitalization of the renewable energy industry ecosystem.
	Product/ Service /Market	⑥ Expanding demand for ICT based eco-friendly product/service such as energy saving solution, etc. ⑥ When reputation is secured as an eco-friendly business, intangible assets such as brand value increase.
	Resilience	· Participation in global initiative and solidarity strengthened. · Business portfolio diversified focusing on eco-friendliness.

Analysis on effect of climate change scenario by stakeholder

Category	Major effect	Financial effect (1.5°C)
Government	Strengthened regulations (carbon credits etc.) at Government level for low carbon green growth.	Approx. 15.7 billion Won (~2040)
Customer	Expanded demand for data centers due to ICT industry growth and subsequent increase in electric power consumption.	Annually approx. 1 billion Won
Competitor	In the case of lack of competition for eco-friendly technology development, market position would lose out to competitors.	Low
Supplier	Service delay or suspension would occur due to physical risks arising within a supply network.	Low

① Rising cost for carbon credit purchase due to increase in carbon emission and price hike of carbon credit.

Electric power consumption at SK Inc.' data center is anticipated to increase continuously due to increase of new customers, and carbon credit trading system will come into effect within 1~2 years factoring in the amount of electric power consumption. According to Korean Government's 2050 Carbon Neutral Declaration, national regulations on carbon credit are being strengthened. Accordingly, financial burdens such as carbon credit purchase are expected to worsen. When no efforts are directed to carbon emission reduction (BAU), financial burdens from carbon credit purchase may reach approx. KRW 15.7 billion by 2040. But SK Inc. will minimize the impact by implementing diverse preemptive reduction measures, such as moving to renewable energy, self-generation, enhancing electric power efficiency of the data center, and planning to garner carbon credits from emission reduction. SK Inc. is establishing a preemptive response system on a company-wide level.

② Increase in additional cost due to purchase of renewable electric energy power.

To achieve the RE100 2040 target, procurement of external renewable electric energy power is required through green rate plan, PPA, and equity participation system due to the domestic constraint of limited self-generation of renewable energy. According to the analysis on numerous systemic options, additional cost requirement for renewable electric energy power is estimated to amount to approx. KRW 5~8 hundred million annually by 2040. SK Inc. plans to minimize the costs by implementing an optimal mix of procurement means and from transactional income from carbon credits etc.

③ Increased investment for new technology self-generation and expanding low carbon eco-friendly facilities.

According to IEA's Net Zero by 2050 scenario, regulations on use of fossil fuel are expected to be more prohibitive to achieve Greenhouse gas reduction target on global scale. SK Inc. will proceed with the expansion of self-generation and investment in energy efficiency of the data center to minimize environmental impact, and be at the forefront of the renewable energy ecosystem by securing/applying renewable energy and low carbon technology. SK Inc. plans to invest KRW 2.4 billion in 2021 for expanding photovoltaic self-generation and improvement of air conditioning facilities at the data center. Subsequently, SK Inc. will expand investments in light of the market situation and economic efficiency, such as the introduction of hydrogen fuel cell, etc.

TCFD Report

④ Compensation, recovery cost upon occurrence of data center blackout and large-scale disaster (Earthquake, downpour, lightning strike, etc.)

In the case data center service is interrupted due to blackout and large-scale disaster, the compensation cost for recovery cost damages to customers using data center are estimated as a maximum of KRW 2 billion per day. Accordingly, power generation system such as a large capacity UPS are in place in the data center, so that immediate electric power supply is available in the event of a prolonged large-scale blackout, and related response manuals are prepared. Also, SK Inc.' data center was designed with disaster prevention capacity for an earthquake of 7.0 magnitude and heavy rainfall of 100ml per hour to strengthen durability in extreme weather conditions. According to IPCC's recent SSP5-8.5 scenario, it is predicted that the average precipitation in Korea will increase by 2.5~3% by 2040. Accordingly, SK Inc. implementing annual simulation training in response to extreme weather to prevent flooding and manage humidity.

⑤ Increase in data center operation cost due to rising temperature

Out of the annual operational cost of SK Inc.' data center, electric power consumption for cooling facilities and IT equipment take up more than approximately 45%, thus, efficiency in cooling systems and minimization of external temperature effects are important from an economic aspect. A hike in temperature due to climate change is directly correlated to electric power cost increase required for the cooling system in the data center. According to IPCC's recent SSP scenario, the average temperature in Korea is expected to rise by 1.6~1.8°C from the present to 2040. If the external temperature rises by 2°C and continues for a year, it is estimated that about 5~7% of annual electric power cost will be additionally incurred. SK Inc. established an airflow simulation environment in the computer room by recent introduction of CFD (Computational Fluid Dynamics) and continue to pursue electric power energy efficiency, such as replacing inefficient air conditioning facilities, etc.

⑥ Increased opportunity to create eco-friendly business

With expanding climate change investment by financial/investment institutions, the Government's ambition of 2050 carbon neutrality, and the vitalization policy for an eco-friendly market ecosystem, the demand for eco-friendly product/service are expected to expand gradually. SK Inc. is carrying out platform services to diagnose the performance of the Digital SHE platform and environmental management using DT technologies, such as A.I. and Big Data in order to secure business competitiveness in the low carbon arena. SK Inc. also planning to expand the proportion of R&D and investment in eco-friendly solutions, such as reduction of air/water pollution, and of energy efficiency gradually from 3.6% of sales in 2020.

2. Strategy for Greenhouse gas reduction implementation

SK Inc. established Greenhouse gas reduction target and implementation strategy to respond progressively to climate change risk. SK Inc. analyzed the trend of Greenhouse gas emission reduction relevant to Well Below 2°C and 1.5°C climate change scenarios based on Greenhouse gas emission in 2020 by applying the SBTi's Absolute Contraction Approach. Based on such trends, SK Inc. established Greenhouse gas reduction target in light of the market situation and economic feasibility of domestic

**Greenhouse gas reduction means**

A. Internal reduction	B. External reduction	C. Carbon credit purchase
RE100 energy efficiency, etc.	Exploration/participation in external offsetting project*, etc.	Purchase of other company's excess carbon credits

* Greenhouse gas reduction project due to deforestation in developing countries and Greenhouse gas reduction project through eco-friendly products/services.

TCFD Report

A. Internal reduction

- 99% of SK Inc.' Greenhouse gas emission source is electric power. The core of the Greenhouse gas reduction implementation strategy is expanding the use of renewable electric energy power and minimizing electric power consumption by enhancing energy efficiency.
- Domestic means for RE100 implementation are composed of 5 ways*. SK Inc. will expand photovoltaic self-generation and use the green rate plan by 2022 under the procurement principle to minimize cost and risk. Subsequently, after 2023, SK Inc. determined short-term and mid to long term mixed procurement measures, such as PPA and equity participation and greater new technology 'self-generation'. Accordingly, SK Inc. will continuously prepare and adapt while monitoring the market situation.
- * Green rate plan, REC (Renewable Energy Certificate) purchase, PPA (Power Purchase Agreement), equity participation, self-generation
- Furthermore, SK Inc. plans to improve the data center PUE to 1.4 level over the long-term by planning and introducing new technology and new efficiency/conservation measures.

B. External reduction

- Along with internal emission reduction, SK Inc. plans to discover and promote external emission reduction business such as use of ICT technology for additional emission reduction, and collaboration with various stakeholders.

**3. Risk management**

SK Inc. established and operates the process to identify, prevent, and assess climate change risk in advance within the company-wide integrated risk management system.

1. Environmental risk assessment process

01 Identifying environmental issue and stakeholder's needs	SK Inc. regularly analyzes climate change related external scenarios from company-wide perspective to identify impacts, issues, and matters to be observed from requirements of financial society, such as TCFD and MSCI, and environmental regulations, etc.
02 Identification of risk/opportunity	SK Inc. identifies the risk and opportunity from climate change in comprehensive view of financial effects such as carbon credit purchase cost, renewable energy procurement cost, facilities damage due to natural disaster, resource-saving through energy efficiency, expanding sales of eco-friendly solution, and non-financial effects such as market confidence etc.
03 Risk analysis/determination	SK Inc. determines significant risks to be managed as a priority in view of the seriousness and possibility of occurrence from short-term, and mid to long term perspectives. SK Inc. classifies the matters for immediate action and matters to be reflected in company-wide or related organizational targets.
04 Risk disposal/efficacy assessment	The department in charge of company-wide environmental management manages residual risks through monitoring and assessment of action details so that each relevant organization can establish and implement risk mitigation and response plans.

2. Business process linked integrated management

- SK Inc. is advancing eco-friendly investment and supply network management with the aim of expanding eco-friendly business.
- SK Inc. assesses environmental risk with the participation of the company-wide environmental management organization from the pre-review stage to decision-making stage for all of the company's investment business. SK Inc. has prepared and applied environment assessment indicators and standards, such as business partners' compliance with environmental regulations and existing status of eco-friendly certifications, etc.

4. Management indicators and target

SK Inc. focuses on management of Greenhouse gas, energy, and resource circulation (waste/water) indicators to manage climate change-related risks and opportunities.

1. Greenhouse gas emission and energy management

SK Inc. measures and monitors Greenhouse gas emission every month for each business site and uses the result for yearly performance management according to our Net Zero 2040 roadmap. As a leading eco-friendly company, SK Inc. is continuously improving the Scope 3 measurement and management system in addition to Greenhouse gas level Scope 1 and 2, to reduce Greenhouse gas emission generation throughout the business value chain. Greenhouse gas level was calculated according to the government's 'Guideline for Greenhouse gas energy target management operation, etc.' and the District Heating Corporation guidelines. For Greenhouse gas indicators and performance, SK Inc. is attaining third-party verification according to IPCC Guideline 2006, WRI/WBCSD Greenhouse gas Protocol 2004, ISO14064-3 2006, ISO14001 and the government's Greenhouse gas target management system.

Greenhouse gas level

[unit: tCO₂e]

Area		2018	2019	2020
Scope 1+2		67,646	63,978	64,014
Scope 1	Subtotal	531.9	120.3	205.4
	City gas	487.0	88.7	68.4
	Diesel	44.9	31.6	137.0
Scope 2	Subtotal	67,114	63,788	63,808
	Electric power	66,555	63,461	63,550
	District heating	559	327	258
Scope 3*	Upstream	5,322	5,465	5,637

* SK Inc. is managing the transport/distribution of the upstream value chain, waste generated during work, business trips and commutes of employees and executives, and rental asset items.

Health and Safety

Employees

Roadmap - Health & Safety

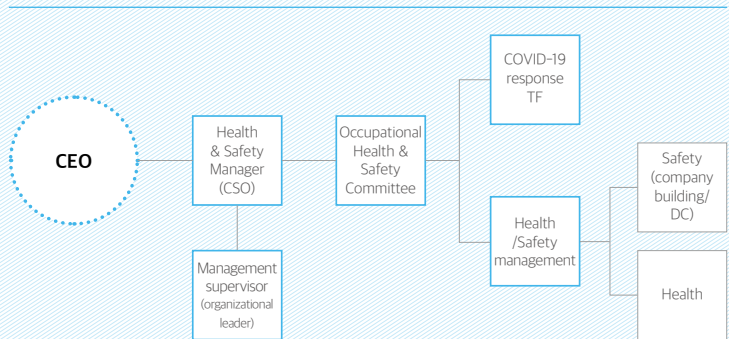

Policy

Company-wide health & safety management system

- Health & safety operation system is established based on Group operating principle and employee health & safety system is established through creation of health & safety culture
- Health & safety operation system and related issues are reviewed by operation of quarterly Occupational Health & Safety Committee under health & safety management system
- *Conduct weekly walk-around inspection, quarterly joint inspection and hold regular meeting of Occupational Health & Safety Committee
- Establish company-wide health & safety management system applying global standard, assess risks and establish performance management process

Management system

Implementation / Performance Management

Health & safety certification obtained

- Global international standard ISO45001 acquired in June 2021
- Quarterly performance measurement/management and monitoring implemented

Industrial safety risk assessment implemented based on internal capacity

- Risk assessment performed to identify and manage/improve hazard/risk elements within company building
- *Risk level assessment capacity is internalized through fostering agents
- Improvement action carried out on identified hazard/risk elements
- Industrial safety secured through implementation of annual internal hazard assessment
- Risk and hazard assessment implemented, target and performance monitoring process established

Occupational illness prevention means established

- Health management guideline was newly adopted in consideration of employees' health
- Management activities on health checkup, occupational disease and disease, VDT syndrome prevention, job stress prevention, etc.

VDT (Visual Display Terminal) syndrome prevention	<ul style="list-style-type: none"> Health stretching campaign implemented *office stretching guide and practice Conducting a mental and physical training coaching program * Providing untact online video and coaching due to COVID-19
Job stress prevention	<ul style="list-style-type: none"> Job stress relief program through operation of in-house communication channel Operation of psychological counseling office (EAP service for site workers) Sending of health information letter

Employees

Health & Safety Activity

Health & safety management on company-wide employees strengthened

- Health & safety management guideline adopted
 - SK Inc. health & safety management guideline adopted (2021) according to 'Group SHE strategy direction established in 2019'
- Health & safety management system set up and certification acquired
 - Health & safety management system was set up and ISO45001 certification was acquired as the necessity for health & safety management system and overall process established was acknowledged according to the result of 'Company-wide health & safety status diagnosis'

Health & safety inspection activity strengthened

- Company-wide health & safety target and industrial disaster status inspection through quarterly Industrial Health & Safety Committee (Implemented 4 times in total during 2020)
- Health & safety system inspection items are established and managed for advancement of health & safety activities of subsidiaries and business partners

Inspection item in health & safety system of subsidiaries /business partners

Division	Inspection activity
Health & safety system	<ul style="list-style-type: none"> Composition of health & safety organization Whether safety manager/health manager is elected or entrusted Whether health & safety officer is elected Whether Occupational Health & Safety Committee is organized
Health & safety activity	<ul style="list-style-type: none"> Whether safety education/safety inspection is implemented Whether safety education and diagnosis is entrusted Whether site worker education is implemented
Safety accident status	<ul style="list-style-type: none"> Number of serious accidents

Reinforcing employees' health & safety communication and support

1) Employees communication strengthened

- Health & Safety Portal opened
 - *Hi-SK → Job Support → Environment/Health & Safety Portal
- Informing major guidances, material upload by organization
- Notice of Occupational Health & Safety Committee's major agenda and contents

2) Employees health management support expanded

- In 2020, medical expense support system' was newly adopted. Actual health of employees and their family managed through actual medical expense support (limited to 1 million Won per year)
- Health & psychological counseling service, 'Vitamin Day' system introduced for external site employees and business partners (temporarily suspended due to COVID-19)
- Site All Cleaning implemented (disinfection, hygiene inspection, etc.) for promotion of health/safety for external site employees
- Health checkup service improvement
 - In 2021, Health checkup institution selection option expanded in consideration of accessibility and convenience, etc.
 - (2020 : 23 institutions → 2021 : 33 institutions, increased by 10 institutions)
 - Opinions heard from employees related to health checkup institution service and assessment conducted

Employees

Health & safety accident sharing system

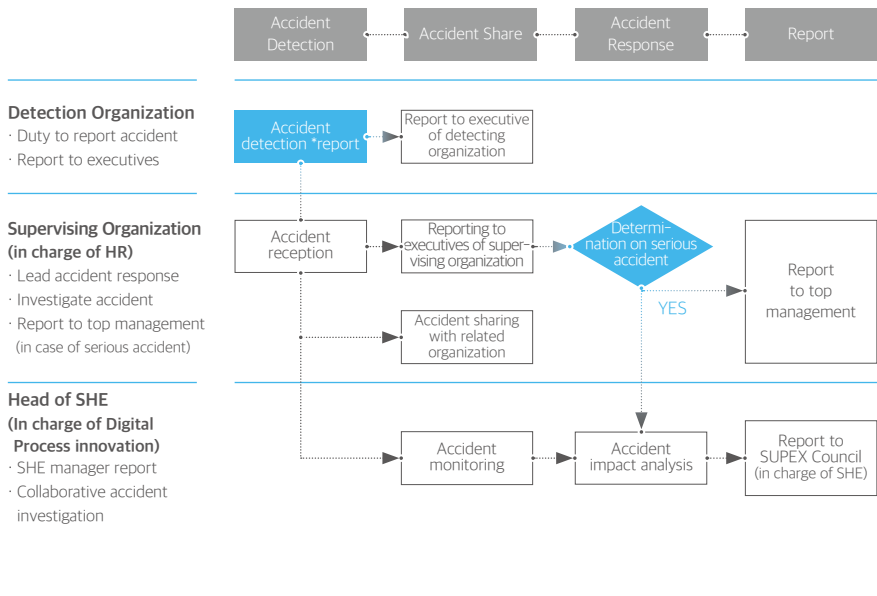

- Accident manual and prompt response system were established subdivided according to scope and significance of health & safety accident that has occurred.
- In May 2020, 'Serious physical damage' accident was added to health & safety accident standard, any physical damage which is anticipated to bring significant impact upon the Company or customer shall be reported to supervising department without failure so that emergency response management level can be sophisticated.

Health & safety accident sharing principle

- In the event of an accident, all employees must share and report the details to the organization and the superior who has authority to handle the accident.
- Accident sharing & reporting shall be observed as a basic responsibility. Any violator may be subject to disciplinary action according to company regulations.

Area	Target	Inspection activity	Inspection activity
Personal injury	Employees, Employees of suppliers	· A work-related accident resulting in a fatality · 2 or more injuries the effects of which last for more than 3 months	· Work-related injury or illness requiring at least 3 days of rest
Environmental pollution/physical (property) loss	Head office, Pangyo, Daedeok and external business sites.	· Chemical leakage, maritime/river contamination · Significant damages expected due to fire, explosion or leakage, etc. · Physical damages that are expected to have a significant impact on business	· Environmental pollution related accidents for which administrative measures could be taken. · Fire, explosion, leakage accidents that cause only minor damages

Health & Safety Accident Information Sharing System

Health & safety prevent activity

1) Fire prevention safety inspection and emergency response training

- Annual emergency response training is conducted for prompt response upon emergency disaster situation.
- Training for virtual fire occurrence due to burnt transformer within electric chamber in data center was conducted in 2020 (Total of 164 persons comprised of occupants' employees, emergency response center staff members participated)
- Direction of improvement is derived with advance education, and emergency goods were additionally supplied.

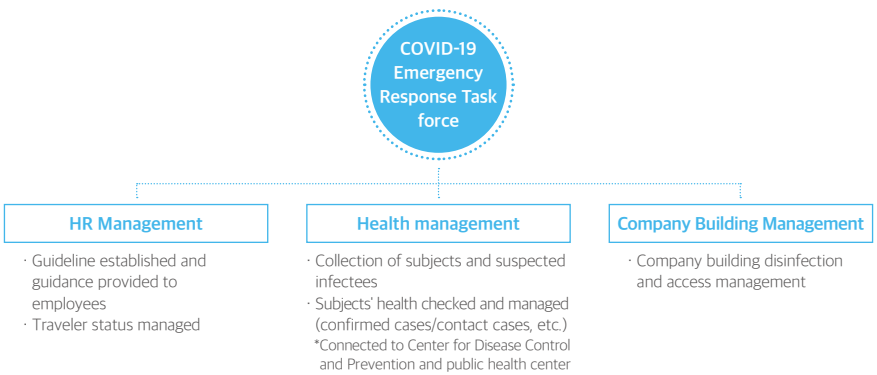

2) Emergency patient response system

- Hot-line system capable of immediate evacuation by employees on duty upon occurrence of emergency situation.
- Actions are taken to enable 24 hour emergency care by providing specialized education on emergency care to permanent workplace security personnel.

Response to COVID-19

- COVID-19 Emergency Response Task Force was organized to notify communication system and emergency response process throughout the company. Response activities and the status of confirmed cases are continuously shared with employees.
- Main response
 - Comprehensive guideline is established, regularly updated and shared
 - Emergency support of sanitary goods (external site emergency, overseas travel, etc.)
 - Access restriction and accessor check strengthened (body temperature measurement, etc.)
 - Temporary closure, reduced/separated operation of multiuse facilities, etc.
 - Daily Monitoring of management/check targets
 - During 2020, disinfection performed 171 times (regular 150 times, emergency 21 times)

COVID-19 emergency response task force process

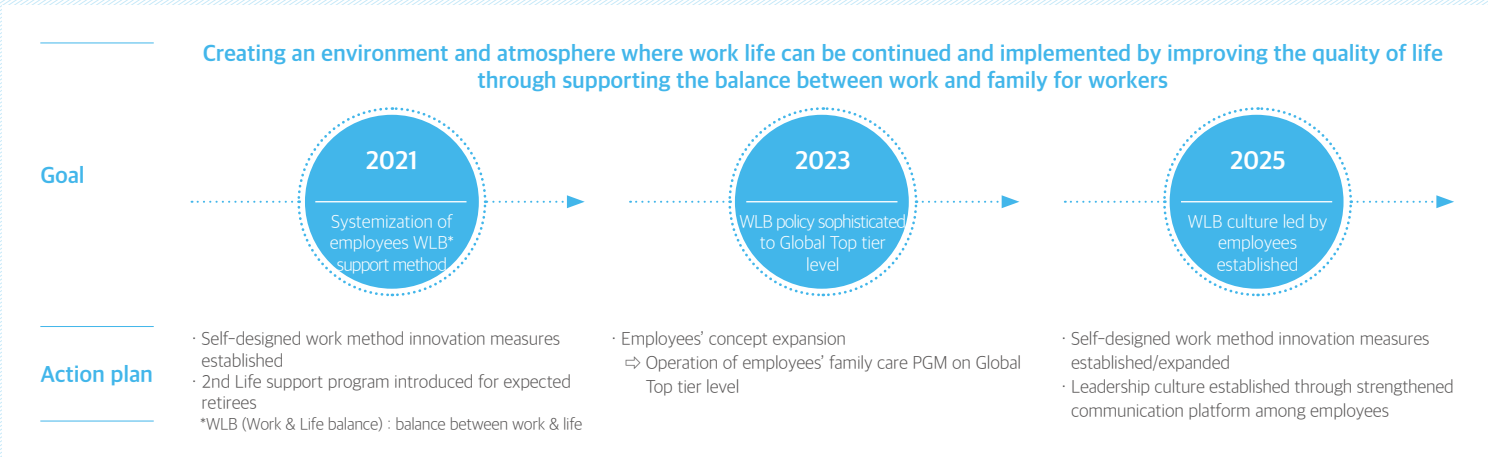

Work & Life Balance

Employees

Roadmap - Work & Life Balance

Policy

Direction for supporting employees' WLB

- SK Inc. aims to create a work environment in which all employees can achieve stability in company and family life, and work enthusiastically by stipulating support policies such as health and welfare benefits for employees.
- Operate a diverse welfare system to enhance the work & life balance of employees
 - Health: Medical expenses, health checkup, group accident insurance, eco-friendly agricultural products
 - Living stabilization: in-company loan, communication expenses, lunch point support
 - Congratulatory and condolence events: Congratulatory and condolence support money, congratulatory and condolence consumables support
 - Refreshment/leisure: clubs and resorts support
 - Childbirth/Childcare: PGM for baby pick-up, school expenses for children, gifts for children who enters elementary school/examinee students
 - Welfare facilities: daycare center, dispensary, health center, mind and body training room, happiness counseling, etc.

Focused area for employees WLB is selected and support system is established

- Focused area is selected based on survey on employees and support system sophistication is implemented by each area
- Employees led Work & Life Balance culture created/expanded through communication
- 3 Major Focused areas of WLB
 - 1) Strengthened care of employees' family
 - 2) Strengthened work environment self-directed by employees
 - 3) Expanding support for stable living after retirement

Implementation / performance management

Employees' Happiness Survey implemented

- Since 2019, through 'Employees Happiness Survey', continuous communication and WLB/work satisfaction level measurement was implemented with employees
- By measuring self-sensed Happiness felt by employees in work life, WLB support satisfaction level of employees is confirmed
- According to 2020 survey results, overall scores improved from the previous year. Especially, it was analyzed that current and future Happiness were considered at the same time.

Division	Contents
Purpose	To identify an individuals' self-perception of Happiness
Method	Once a year / 8 questions in total (minimized)
Questionnaire composition	· Perceptive Happiness level (life, work life, job satisfaction level) · Cantril criterion used (0~10 stages) · Positive/negative emotion experienced and its cause/cause · PANAS criterion used (positive 10 units, negative 10 units) · Major variables/factors affecting company life satisfaction level, size of influence · To-do's for promoting happiness from the aspect of myself and relevant organization
Use	Common agendas for employees are derived based on data. Analysis/verification based on structured data and Happiness promotion task pooling

* PANAS : Positive Affect Negative Affect Schedule

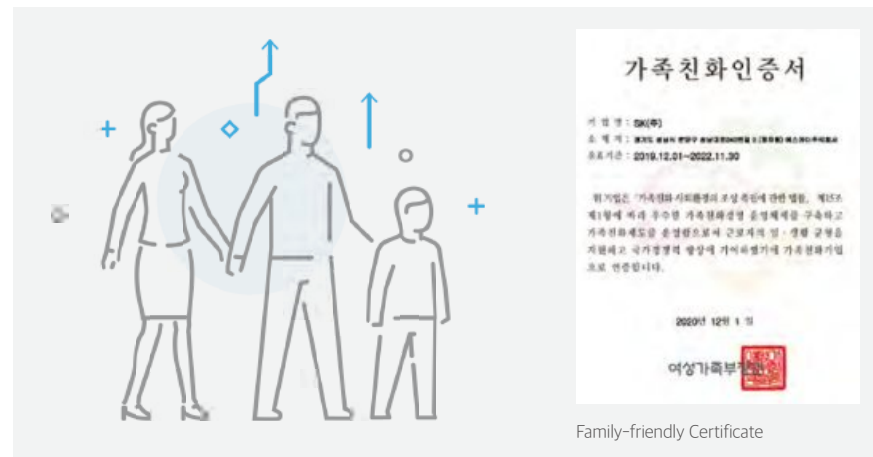

Employees

Employees' WLB Support Program

Strengthened care for employees' family

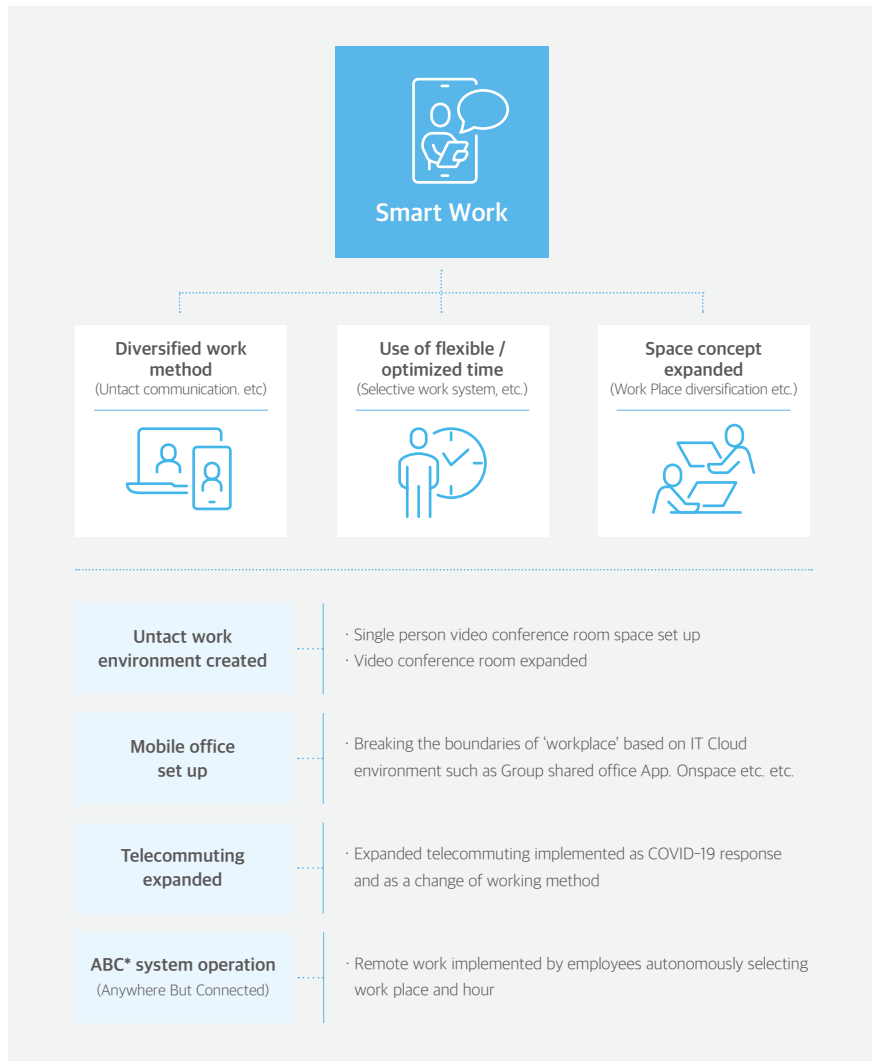

- Diverse activities are pursued targeting 'Workplace where families are happy', and since 2013, the company is maintaining the Excellent family-friendly company certification
- Diverse system and program operated for pregnant employees and employees giving birth, and a member of a family with children

	In-house daycare center operated	· In-house daycare center operation for children aged 1 to 4 years of age
	Support for children's educational expenses	· Support for educational expenses for children aged 5 to college students
	Children coding education	· Coding education operated to enhance children's understanding and pride of an employee's duty
	Baby greeting program	· Pink ID card necklace and congratulatory gift presented to pregnant employees
	Working hours reduction during pregnancy	· Work reduction implemented to employees in pregnancy of first 12 weeks and after 36 weeks
	Family Care Leave	· Leave granted to employees who has family member needing care due to elementary school admission, disease, accident, and old age

Employees' self-directed work environment strengthened

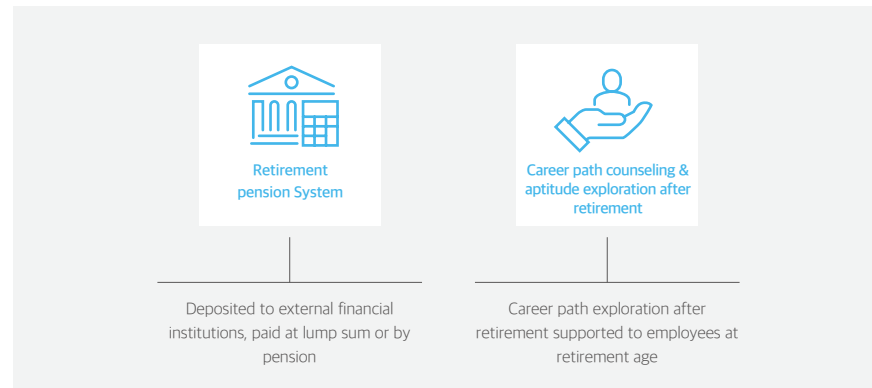

- Expanded pandemic situation due to COVID-19 raised the need for innovation in employees' health management and work methods
- Accordingly, the Company actively introduced smart work system to enhance organizational efficiency and laid the groundwork for self-completed job performance by employees

Employees

Stable living support to employees strengthened after retirement

- Support system for stable old age, 2nd-Life of employees

- At the end of 2020, 372 billion Won out of standard retirement payment estimate was reserved for management by external asset institutions in conformity to legal external reserve standard of 90%, guaranteeing stable benefit.

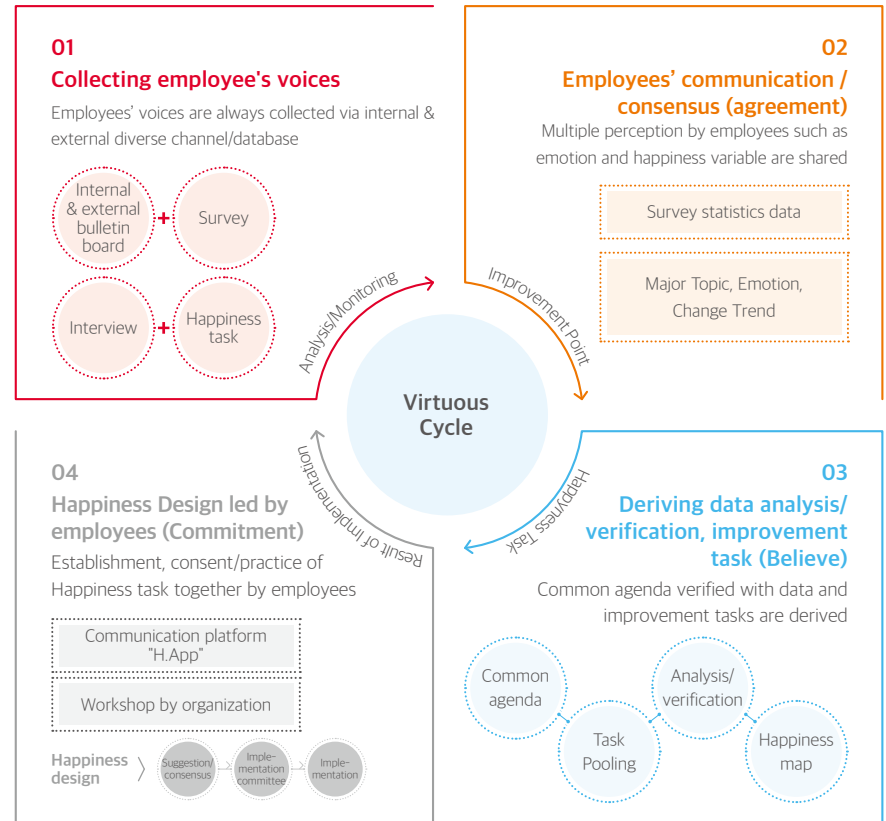

Accumulated amount of reserve for retirement allowance	· KRW 414.4 Billion
Retirement payment external reservation ratio	· 90%

- 2nd-Life support
 - 2nd-Life preparatory period granted before retirement
 - : Participation in job finding support service for 5 months (non-commuting)+ leave for 1 month
 - Job finding support service participation support
 - : Participant selected reflecting employees' personal intention and support to program (reemployment / startup / life-planning education, etc.) participation
 - Re-recruitment program on aged retiree operated for employees with superior capacity requiring continuous service

Establishing Data based Happiness Promotion System

Operating virtuous cycle system in employee-directed happiness design

- Employees' communication/consensus on Happiness promotion secured → data based Issue verification → virtuous cycle system operated resolving problems led by employees

Promoting Happiness Self-Management toward happiness leader by organization

- With organizational heads nominated as happiness leaders, Happiness promotion supported to organizational units by enhancing Happiness Mindset and providing Happiness Data
 - Happiness Mindset enhanced : leaders' Happiness Commitments are produced as video and shared with employees
 - Happiness Data : Happiness level, Happiness impact element by organization are provided as Weekly / Monthly / Quarterly Report
 - Happiness Reference : Happiness promotion success/failure cases are interviewed and shared by organization

Employees

Securing and Fostering Human Resources

Promoting strategy for fostering Human Resources

- It is necessary to strategically foster human resources to lead digital BM innovation in consideration of the company's growth direction and business characteristics
- Human resources are a very important factor in the pursuit of deep change, and the need to create a self-directed fostering infrastructure so that personal growth can lead to the company's capacity increases
- A job-based fostering system has been established to develop specialties according to individual career targets

Developing based self-leading capacity

Major Capacity Development Program

Program Name	Major Education Contents
mySUNI (Group common)	· SK Group's common online education platform. It is composed of Colleges with diverse themes. Free learnings are supported according to employees' needs
Self-directed fostering	· Education expenses expendable by individual (Employees' Learning Account) and learning time by organization (growth day) are used
DT Strategic fostering	· Intensive fostering at the company-wide level with the goal of converting all Tech Delivery personnel to the DT capacity by 2021
TCL (Tech Collabo Lab)	· Autonomous small scale R&D Lab activities using DT technology, to be implemented continuously as DT Capacity Expanding Tool
Open Lab	· External specialists give special lectures in diverse areas such as Tech Trend, Use Case, Happiness, etc.
K-MooC (Massive Open Online Course)	· Online education channel for strengthening employees' DT capacity, which is reinforced based on best lectures from universities and high-level technology theory and education content quality
Leadership course	· Clinic and Group coaching are supported to leader/middle leader by organizational / performance management related themes
Language education	Intensive language course · Intensive foreign language enhancement program for employees, 1:1 tutoring and video conference system used 3 times a week
	Phone/video foreign language · Foreign language speaking ability strengthening program using phone/video education, 3 terms operated per year
Domestic/overseas training	· Overseas training program support by job (planning, financial, Global HR, etc.) (In 2020, overseas training was not conducted due to COVID-19)
Long term overseas training (degree support)	· For the purpose of fostering future management, Global Top level MBA and overseas specialized master's degree courses are supported on strategic fostering level for employees with superior potentials (Support after selecting a small group of about 2 people per year)
Certification support	· Various expenses required to acquire a Certification supported (622 cases in 2020)

Employees

Employees' Performance Management

Assessment system

- Task unit assessment system operated based on actually implemented work
- Performance management standard is established according to business characteristics by organization to assess performance. capability assessment is implemented from the perspective of employees' growth/fostering to maximize shared collaboration rather than excessive competition

- Especially, to exert specialties and promote fostering/growth, 'my' absolute performance/capability level is measured. Scores rather than grades are given and directly used for compensation, directly connected to absolute level of specialties/performance
- Assessment is basically a multi-faceted assessment, and the colleague assessment is applied to enable a diverse and objective assessment of specialties/performance through colleagues working together along with leader assessment

- By diversifying assessment timeline by job, mobile assessment system is operated to implement immediate feedback from task unit and to enhance receptivity so that regular assessment could be implemented anytime, anywhere.

- Through year end performance assessment based on on-going assessment result, Career Path design and performance review on an individual employee is implemented. Based on relevant result, human resource operation plan for the following year such as employees compensation, promotion, and job transfer is established.

Compensation system

Category	Details
Annual salary / Incentive Bonus	Career Level based compensation is implemented to provide motivation on performance in connection with assessment and to drive securing job specialties
CEO Recognition	Competition for excellent performance case from the previous year is held, and compensation such as cash prize is provided to the winner.
Domestic/overseas training support	Domestic/overseas training support granted to superior human resources

Organizational Culture Innovation

Management Council

- Management Council is a body representing labor that implements a pivotal role in the formation of organizational culture focused on employees
- The council is composed of equal number of members representing both management and employees, where diverse agendas to pursue employees' happiness are discussed through regular meetings
- During 2020, management council were convened 4 times. Major discussions included work environment improvement such as vitalization of annual paid leave, improvement of welfare point operation, Smart Work, etc.

Division	Major Discussion Subject
1st (Feb. 2020)	<ul style="list-style-type: none"> · Annual paid leave vitalization method · New adoption and improvement of welfare system
2nd (May 2020)	<ul style="list-style-type: none"> · Security policy improvement method · Smart Work implemented direction
3rd (Aug. 2020)	<ul style="list-style-type: none"> · Work environment improvement under shared office environment · Improvement of site welfare point operation · Improvement in employees taking annual paid leave
4th (Nov. 2020)	<ul style="list-style-type: none"> · HR system innovation method · Improvement in site welfare point operation · Support method for a retired person

Employees

*Special Page: Innovation in Work Method and New Workplace

- SK Inc. sets up new organizational culture commencing from changes in work space through renovation of office space
- The work spaces which employees occupy while freely moving amidst diverse space composition are expanded to 'shared' concept. The work environment where interchange and collaboration between employees, and between organizations are to be constantly created.
- The shared/autonomous seat system is realized in diverse work spaces through Working Zone where employees can work without hierarchy between layers based on IT Cloud environment created such as OnSpace, the Group shared office app. etc.
- As part of work method innovation, paperless, office arrangement in consideration of employees health, Motion Desk were introduced. With Core arrangement by floor, executives' offices were reduced and open type office spaces were introduced so that outside views are shared by employees.

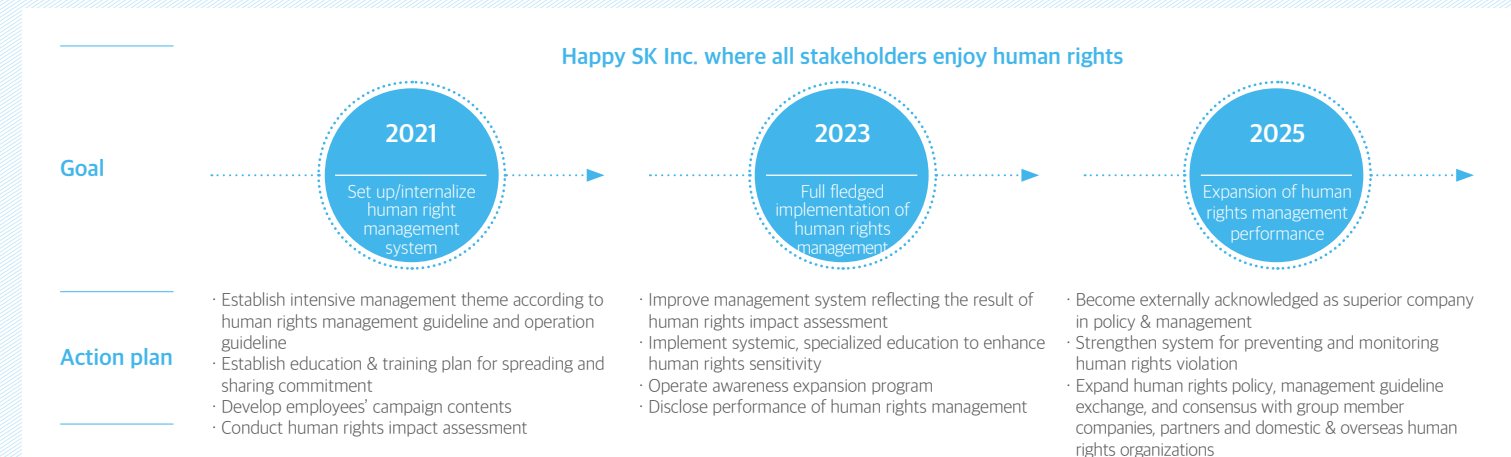

- Common zone was divided up for collaboration and communication, and open and horizontal spaces aiming for collaboration and communication were realized by expanding lounge space

Human Rights Management

Roadmap

Policy

Human rights management guideline

- To pursue employees' happiness and stakeholders' happiness, overall management activities, realization of respect on all stakeholders' human rights are promoted based on Group management philosophy SKMS
- Universal principles on human rights presented by UN Universal Declaration of Human Rights and 'UN Guiding Principles on Business and Human Rights' by UN Human Rights Committee, are supported and observed in management activities.
- All labor principles and laws recommended by ILO and ratified by governments in relation to ban on child labor & forced labor, health, safety, and work hours are observed.

SK Inc.' Human Rights Management Principles

- ① SK Inc. shall respect human rights of all its employees, and guarantees their dignity as human beings.
- ② SK Inc. shall do its utmost to prevent human rights violation throughout all value chains.
- ③ SK Inc. shall pursue happiness of all stakeholders (including employees/business partners) and consider human rights aspects of products and services SK Inc. produces.
- ④ SK Inc. shall strive to fulfill its corporate social responsibilities, to promote the development of local communities, and to respect human rights.
- ⑤ SK Inc. will establish and implement a management system required for human rights management implementation including anti-corruption (ethical management), environment/health/safety, compliance, protection of personal information, etc.

Implementation / Performance Management

Implementation of human rights impact assessment

- The internal system required for implementation of overall human rights management including anti-corruption (ethical management), environment/health/safety, compliance, personal information protection, and quality management was established. In 2021, human rights impact assessment was further reinforced through existing human rights based surveys, and human rights risks were assessed through diagnosis by external specialist (based on 2020 performance)
- Human rights impact assessment was implemented over 4 stages comprised of 'human rights awareness investigation - derivation of human rights focus issue - human rights impact assessment - site due diligence and informant interview'

Derivation and improvement of human rights risks

- The comprehensive score of human rights impact assessment was 84.8. Aspects such as compliance with labor related laws and regulations and guarantee on stakeholders' basic rights (human rights) were operated well. But the necessity for supplementation was derived in aspects of environmental rights protection, and responsible management of supply networks.
- Improvement tasks were established on final 7 items by human rights risk derived item and improvement was carried out.
- Ethical management education was implemented on all employees with items such as "ban on workplace harassment-discrimination, sexual harassment prevention education, etc." to prevent recurrence of human rights risks.

Employees' grievance settlement process

- Reporting channel site for internal/external human rights and ethical management issue is operated
- Employees' communication mobile platform "H.App" is in operation, and grievance /problems resolution led by employees is implemented

Human Rights Management

Human Rights Impact Assessment

Overview of human right management system set up

- SK Inc. publically announced the intention to engage in human rights management since 2015, and implemented human rights risk improvement activities. In 2021, SK Inc. established promotion strategy and mid to long term roadmap to enhance human rights management implementation capacity.
- The internal system required for implementation of overall human rights management was established, including anti-corruption (ethical management), environment/health/safety, compliance, personal information protection, quality management. Under the leadership of human rights management supervising department, human right management system is close to improvement.

Human rights impact assessment process

- To prevent human rights risk, the Company implements annual regular human rights impact assessment on all business sites and business partners.
 - Human rights impact assessment in 2021 adopted external specialists' inspection method on business partners' site to secure objectivity and expertise, and expanded the scope of assessment (based on performance in 2020)
 - Human rights focus area and indicators were re-selected based on employees survey
 - Self-assessment by staff in charge of internal duty, site due diligence by specialist and interview by staff in charge were implemented to diagnose whether human rights management guidelines and detailed operating guidelines were observed.
- *Prior education was implemented on staff in charge of internal duty
- In case actual human rights risk was identified from investigation result, related problems are confirmed and improvement activities thereon are promoted

Selecting assessment indicators

- Basic assessment item for human rights impact assessment suitable to SK Inc. is composed through media research, Interview with related persons, investigation on organizational and duty status based on existing human rights management guidelines.
- 6 priority inspection areas and human rights issue/assessment stakeholders are derived through prior analysis

- Indicators from the Workplace Harassment Prevention Act enforced in 2019 were added to the human rights impact assessment indicators of national human rights committee standard, and indicators were selected in consideration of the industry characteristics→ final 11 areas, 37 items, and 196 indicators were confirmed

Assessment implementation

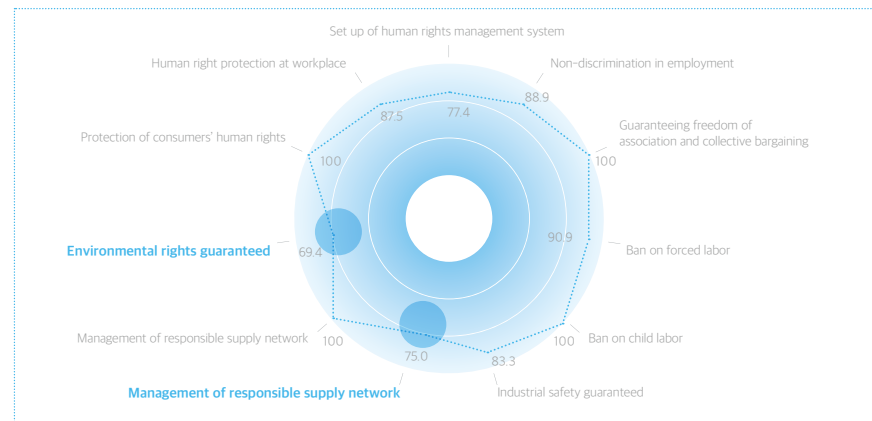

- Based on 196 relevant indicators, human right impact assessment was implemented through assessment on staff in charge of each area, specialists' site inspection, stakeholders' Interview, and objective evidencing material verification.
- Potential human rights risks are identified through regular impact assessment, and improvement issues that can mitigate them are derived
- Through continuous feedback on overall assessment, assessment indicators and assessment system sophistication are implemented, and expansion of assessment scope is planned to new business counterparts such as M&A, joint venture companies, etc.

Human Rights Management

Human Rights Risk Improvement

Human rights impact assessment result

- Comprehensive scores from human right impact assessment result was 84.8 (based on performance in 2020)
- The aspects related to compliance with laws and regulation related to labor law and guaranteeing stakeholders basic rights are operated well.
- From the aspects of guaranteeing environmental rights, management of responsible supply network that are major human rights issue in the IT industry, some vulnerable elements were found.

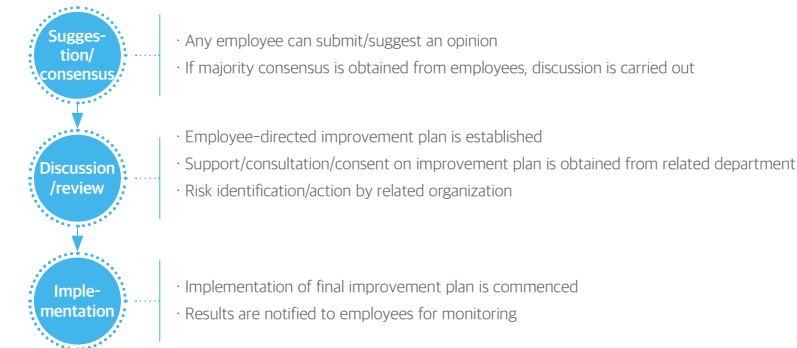

Derivation and improvement of human rights risk

- According to human rights impact assessment result by areas, human rights risks on total of 7 items were derived. Improvement tasks were derived and implemented (100% risk identified)
- After improvements were implemented, additional supplementary improvement tasks were derived
- Potential risk area by risk was identified, and risk mitigation actions to reduce negative impact within improvement task were reflected (Completed establishment of mitigation plans for all four business sites)

Employee-directed grievance settlement process

- The communication channel 'H.App' is operated to support employee-directed grievance submission and settlement process

*Company operates ethical management reporting system, psychological counseling center to accept and process grievance from employees and stakeholders systemically.

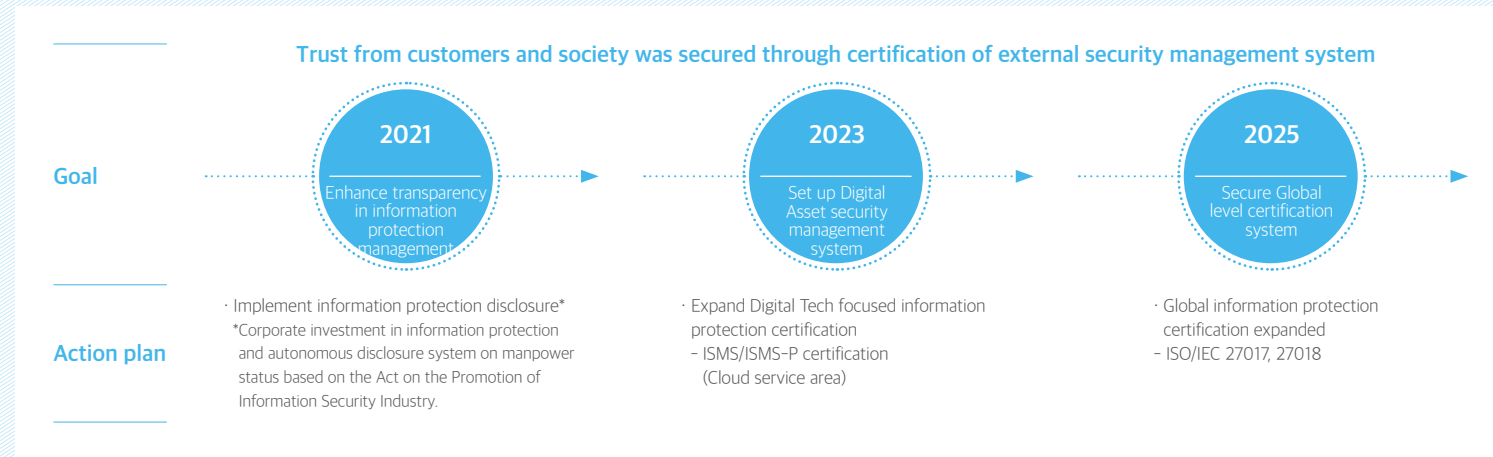

Human Rights Risk Improvement Details

Areas and Item	Derived Risk	Recipient of Impact	Related Potential Risk	Improvement Task Implementation	Future Improvement Task
Human right management system set up	Human rights management system is partially insufficient	Employees, customer, partners, local community	Right to collective bargaining, Freedom of association	Human right management system was set up under human right management supervising department Mid to long term roadmap is established	Human rights management publicity and spreading towards major stakeholders Employees' education is implemented
Non-discrimination in employment	women executives/women leader ratio is low	women	Equal remuneration, Discrimination	New women executives additionally secured Women leader ratio target is established	Potential human rights issues are identified through review on laws on fostering means for women executives
Ban on forced labor	Forced labor may occur at customers' site	Partner Companies, Third-party contracted labor	Forced labor, Child labor, Human trafficking	Human right violation reporting site is in operation	Consultation/supervision channel prepared between customer-SK-partner
Industrial safety guaranteed	Identification of hazard element in safety & health management is not satisfactory	Employees, contractors	Industrial disaster	Safety & health certification(ISO45001) was obtained Risk level assessment was implemented and derived risks are improved	Guidelines are set up to prevent health & safety management hazard element / occupational illness
Responsible management of supply network	Partner company's Human Right is insufficient	Partner Companies	Forced labor, Equal remuneration, Discrimination	Business partners' ESG risk management system is set up and implemented	ESG assessment is implemented on all partners Consensus is reached through human rights management workshop with business partners and prevention plan for human rights violation is required
Environmental rights guaranteed	Environmental management system set up is unsatisfactory	Local community	Environmental rights violation	Environmental management system is set up through acquiring environmental management certification (ISO14001)	Execution of concrete plan according to RE100, NetZero declaration
Protection of human rights at workplace	Ban of sexual harassment at workplace Recurrence prevent methods are unsatisfactory	Employees, women	Discrimination	Education on prevention of sexual harassment at workplace is implemented Sexual harassment counseling center is in operation	Recurrence prevention monitoring is systemized Detailed methods for relief of victims are established

Information Security

Roadmap

Policy

- Information protection policy and various regulations to be observed by all employees were established to expand the importance of information protection and to protect customer value.
- Information protection policy and various regulations have been registered on Groupware system(Hi-SK), and are available for viewing by all employees

SK Inc. Information Security Principle

- SK Inc. information asset shall be protected from illegal access and leakage
- Confidentiality, integrity, and availability of SK Inc.'s information asset shall be maintained
- SK Inc. shall comply with information protection related legal security requirements
- All employees of SK Inc. shall perceive the importance of information protection, and must be able to properly prevent, detect and respond to accidents.
- SK Inc. shall implement periodic analysis, inspection and audit on risks related to information security.

Implementation / Performance Management

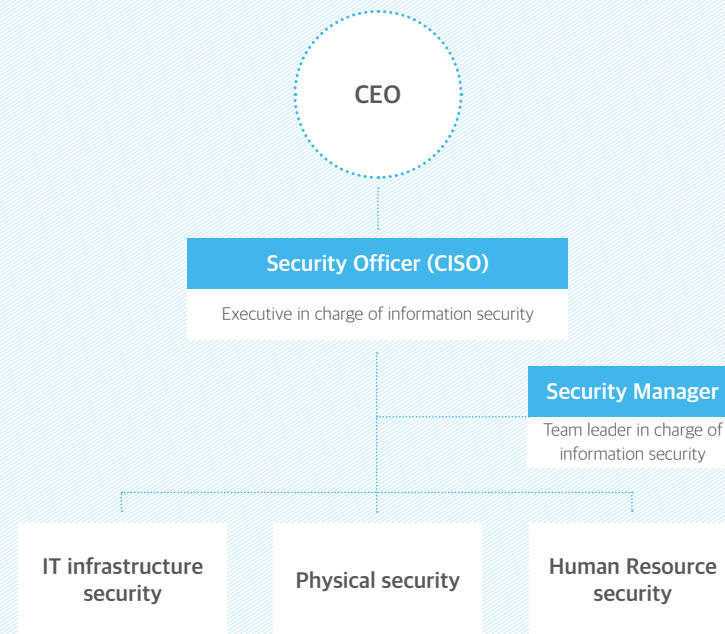

External certification on information security possessed

- ISMS (information security management system)
- ISO 27001 (information security international standard)

Participation in information protection related domestic and overseas initiative

- Presentation of superior case and received the Minister of Science and ICT Award at '2020 information communication-base protection workshop'
- Participated in '2020 industrial security international conference'

Management System and Organizational Chart

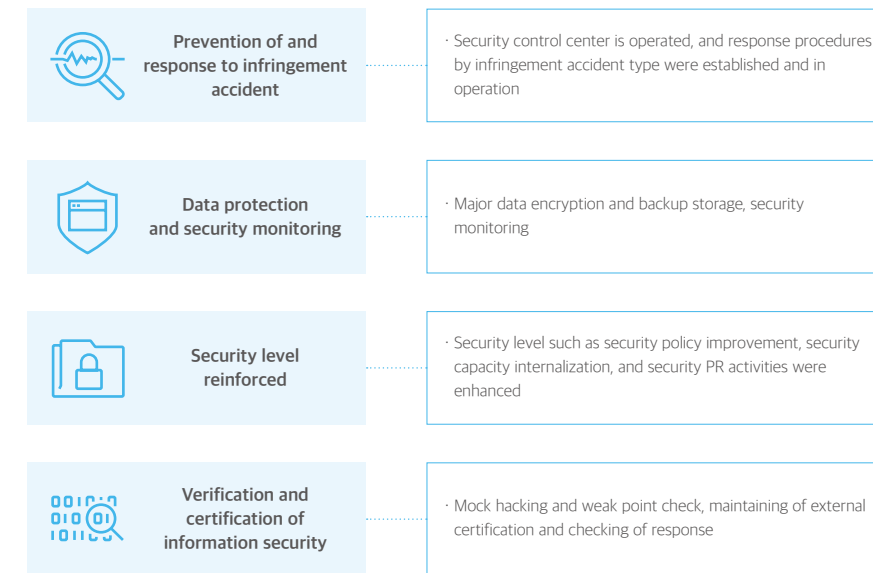

Information Security

Information Security Management System

Information security organization

- CISO(Chief Information Security Officer) was elected to comprehensively direct and supervise the company's information protection duty. Information leakage is prevented by an organization dedicated to information protection and security compliance issues are responded to.
- Upon occurrence of significant security issue, review and management is implemented at board of directors level

*Board of directors compliance supporter's activities and status reporting is implemented each year including information security agenda

Operation of security consultative body

- Companywide security management level was reinforced and issues are shared with related organizations. Security consultative body is in operation to enhance implementation capacity.
- Under participation by company-wide IT security related organization leaders, major agendas such as security policy, compliance trend, action on weak points, and external audit received were discussed

Data Protection and Monitoring

Data protection

- IT security management guideline was adopted to verify vulnerability in data security, and related procedures were observed.
- Recently, web server-targeted attacks and malicious mail attacks are increasing as types of attacks on data security and information systems. Accordingly, a preemptive response to security attacks are implemented with data safety reinforced through encryption and backup of major data, and by regularly implementing security strengthening activities

Monitoring

- Monitoring is implemented on new threat elements from Threat Intelligence which provides the latest domestic and overseas attack information to respond to advancing cyber threats
- Abnormal behavior detection activities such as various packets and logs on other in-house networks, event data collection & analysis, malicious code in the system and the user's PC, and information leakage are continued

Information Security

Security Action and Countermeasures

Response system for Security (infringement) accident

· For prompt response to security accident, the accident severity is categorized into 4 stages, and the response procedure is published as a manual. And the response procedure by accident type, detection and preventive measures against infringement threat are established for operation.

1) Prevention and check

- On-going operation of security control center (24 hours, 365 days)
- IT weak point frequently checked and action implemented
 - *Mock hacking, secure coding, weak point in infrastructure check are implemented on the Company's and customer's major system at least once a year
- Mock hacking and checking of weak point in infrastructure are implemented on the system developed with new investment before service opening
- Each month, potential security accidents are managed and prevented by classification as infringement response activities, infringement prevention activities, intrusion detection activities, and other matters

2) Response

- Infringement accident reporting standard and response procedures are established and implemented by type and severity
- The same standard is applied to customer's system

Type of infringement accident

Division	Contents
System attack	· Web shell upload attempt, attack on Web/WAS weak points such as Apache, etc., DDoS attack, attempt to hijack administrator rights, etc.
Worm/Virus infection	· Installation of malicious codes (viruses, worms, ransomware, etc.) in PC/server through random paths, etc.
Malicious mail	· Inducing malicious code installation with malicious site URL links or attachments in the text

Severity in 4 Stages

Severity	Stage	Contents
Strong damage	Fatal	· Situation that can have an impact on work and customer service since it is impossible to recover due to system destruction
	Critical	· Situation where there is restriction on some work due to partial destruction of system or continuous attack is inflicted on individual server
	Minor	· A situation where there is a system infringement attempt and partial disturbance, but there is no damage to customer service
Weak damage	Warning	· Common Internet threats that do not impact system functionality or customer service

Reporting and action upon security accident

- A process is set up that allows employees to report information security issues immediately upon detection
- Suspected hacking, malware and ransomware infection, voice phishing and personal information leakage, and security weak point discovery are subject to reporting, and any relevant issue that has occurred shall be reported to the in-house security reporting center

- Disciplinary action shall be implemented in case of problems occurring due to violation of policy or regulations by any insider
- In the event of an accident, the organization in charge of information protection shall implement emergency action for problems situation in collaboration with CERT* and operation department, and after confirming the action result, shall establish recurrence prevention response measures and disseminate such measures to employees through company-wide notice
 - *Computer Emergency Response Team, Security response specialty team

Information Security

Information Security Verification and Certification

Security verification activities

- Major system, system developed with new investment : IT infrastructure and management system security are strengthened by implementation of 'mock hacking and infrastructure weak point check'
- General employees : 'malicious mail mock training' is implemented, and mock training result shall be shared at company-wide level. Response to malicious mail is strengthened and employees' security awareness level is enhanced

Information Security Certification

Certification	Supervision	Certification Contents
Major information communication infrastructures inspected	Ministry of Science and ICT	Implementation check on cyber infringement prevention, receiving inspection on implementation of responding measures to protect ICT infrastructure and promotion task for protection responses completed 100%
Receiving inspection on integrated information telecommunication infrastructure	Ministry of Science and ICT	Facility safety and physical security, implementation of protective action on integrated information telecommunication infrastructure, and liability insurance subscribed for Daedeok & Pangyo Data Center
ISMS	Ministry of Science and ICT	Domestic information protection management system pursuant to the Act on Promotion of Information and Communication Network Utilization and Information Protection, etc. In March 2020, ISMS-P checking standard was reflected and certification obtained (~2023). In 2020, ex-post facto review was passed
ISO27001	ISO/IEC	International standard information protection certification. After initial certification was obtained in 2006, renewal was completed in May 2019 (~2022). In 2020, ex-post facto review was passed

Activities to Enhance Information Security Awareness

Information security capability internalized

- Importance of security is emphasized. Diverse education are provided to employees to internalize security capacity
- Including company-wide personal information protection education which is a legally mandatory education, information security and personal information protection educations such as IT service security basic education, new recruits and executives education, are implemented with customized contents required for performing work by employees

Education Title	Major Education Contents
Personal information protection education	Personal information life-cycle management, Compliance education on domestic and overseas personal information protection
Information security education	PC security, IT security such as database security, network management, etc., information security policy and management system
Development security education	Security education required at system analysis/design/development/test stages

- Security guide securing/spreading for Multi-Cloud business, response to DT based BM innovation
- Information security specialized capacity secured/supported such as diverse security support tool secured, security checklist established, compliance obligations reviewed, etc.
- Promoting the importance of information security by providing entire employees with security letter, news, and event

Activities leading information security culture

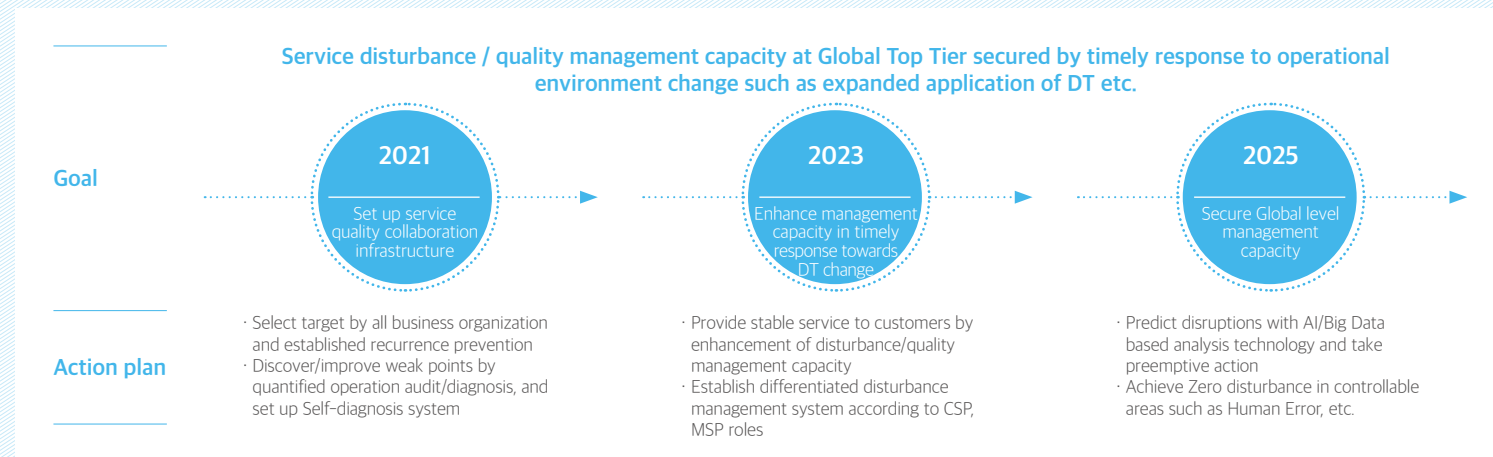

- Participated in '2020 Major Information & Communications Infrastructure Protection Workshop (WIPRO 2020)' held by Korea Internet & Security Agency, and selected as best practice of infrastructure protection in private sector and received the Minister's award
- Participated in '2020 Industrial Security International Conference' held by National Core Technology Security Academy of Korea
- Information protection strengthened towards social enterprise and BP, and laws and regulations compliance support activities conducted, work environment check and sharing security campaign, personal information processing policy review and education, etc. (8 companies supported in 2020)

Service Quality and Reliability

Roadmap

Policy

Service quality enhanced

- SLA operated to enhance service quality and customer satisfaction by prior identification and removal of potential problems in provided services
- Credit / Earnback policy operated according to SLA target level agreed with customers, stipulating penalty payment pursuant to SLA contract in case any loss is incurred

Strengthened stability in provided service

- Processes such as 'disturbance management guidance' and SHE accident sharing system are regularly updated so that business impacts are minimized and the level of service quality and availability may be maintained to the maximum extent possible
- Contingency plan is established at operation & change management process and upon operation/change in all services so that work suspension risk is minimized
- Management responsibility strengthened by monthly discussion under CSO on recurrence prevention response measures and internalization by cause of major disturbance by all operation business departments

Implementation / Performance Management

Mock training on disaster implemented

- Annually (twice a year if necessary) implemented. Quarterly implemented in case of Global business site

Operation audit/diagnosis system enhanced and Diagnosis implemented

- Operation diagnosis framework is established. In addition to operational weak point diagnosis/audit, operation level is quantitatively measured to prevent disturbance and continuous operational quality enhancement promoted

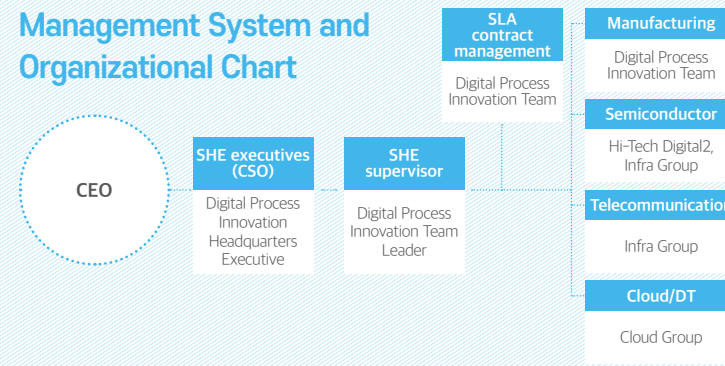

Check the implementation of disturbance recurrence prevention

- Task derived on response measures to prevent disturbance recurrence by business and service safety strengthened by checking whether the measures were implemented each quarter

SLA management and progress

- Warning given after performance monitoring and monthly SLA reporting implemented

Management System and Organizational Chart

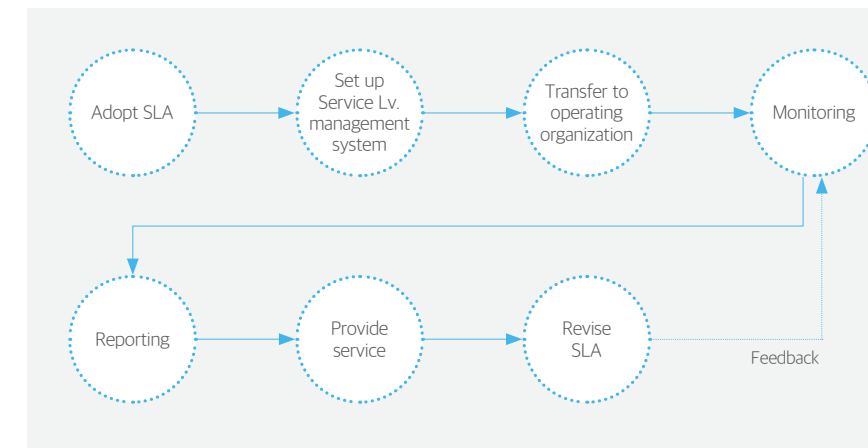

Service Quality and Reliability

Integrated Quality Innovation System

Service Level Agreement (SLA)

- Referring to the innovation system pursuing enhancement of service quality and customer satisfaction level by identifying and removing potential problems in the service provided by the Company in advance
 - Used in quantitative measurement and management of service level, reflecting the service level and details demanded by customers
 - By operating 'Credit/Earnback' policy* according to SLA target level agreed with customers, efforts are directed to service improvement and stability enhancement
- *The policy to pay penalty amount (Credit) to customer in case service quality provided falls short of SLA target, and to refund the penalty amount already paid when quality improved (Earnback), with good quality service provided as the target

SLA operating procedure

- Upon establishing SLA through reflecting customer requirements and mutual consultation, service level management system is used to monitor management item and to identify service quality
- Major issues are derived through reporting after providing services, and monthly service assessment meetings are held to continuously supplement SLA

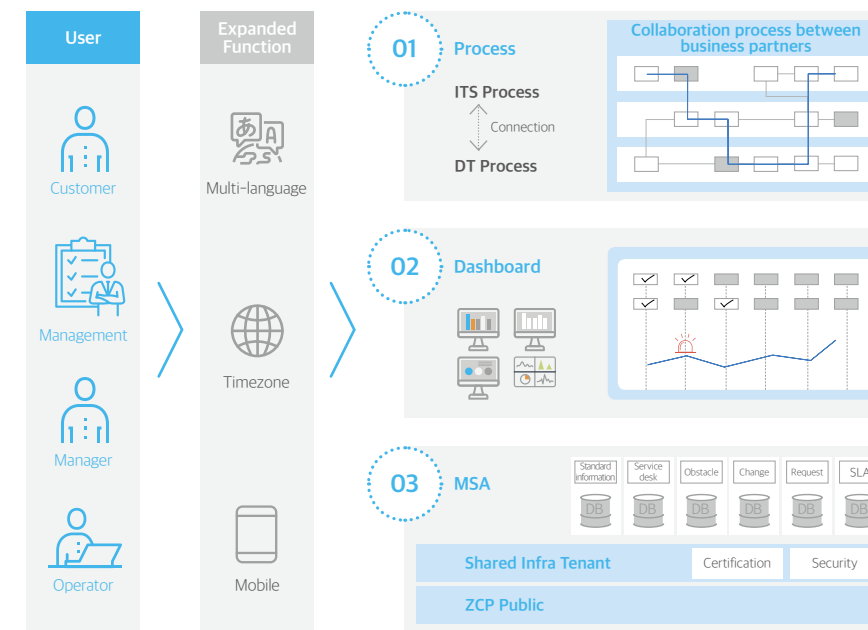

Expanding application of SLA DT

- Timely response towards DT change such as SLA function enhancement in conformity to SLA Pricing system, and operation conforming to the management point customers consider as priority in service unit, etc.
- * Member companies (SKT, SKI, SKC, etc.) to be revised and subsidiaries SLA adoption scheduled in 2021

Optimization of DT / ITS integrated operating process

- Service operation process innovation is continuously promoted for preemptive response to DT and changes in IT infrastructure environment
- Operation process optimization and DT/ITS integrated operation management system establishment completed in 2018
- ServiceFlow system opened in 2019
- ServiceFlow system concentrates on service 'connection' and 'expansion'
 - Connection of all work flow, and severance in operational process overcome
 - Structuring to facilitate external Cloud connection and expansion, and collaboration by enabling Cloud to perform as supplementary process
 - Flexible response to change of working method through diversification in language, and access media

ServiceFlow System

Service Quality and Reliability

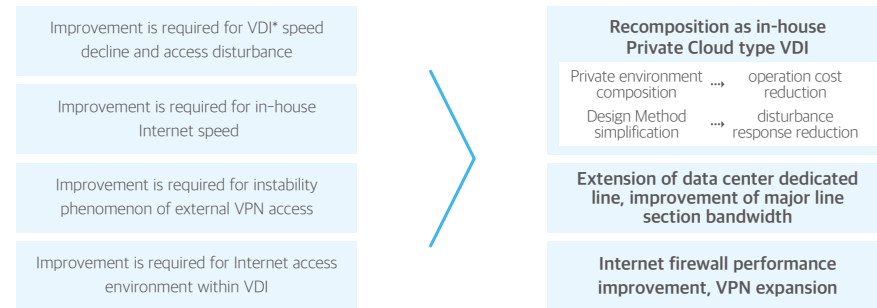

Investigating Customer Satisfaction Level and Activities to Enhance Customer Insight

Investigating customer satisfaction level

- Since 1999, satisfaction level survey was implemented on the Company's overall IT service
- By identifying and analysis of customer needs and complaint element, action is taken so that service quality can be improved

- Major Method : Online Survey
- Major Result
 - ① Scoring overall 75.0, which is slightly lower than last year, Satisfaction level maintained 'Good' Grade
 - ② Compared to the competitors, SK Inc. scored 3 point more.
 - ③ Since the change of working environment into telecommuting due to COVID-19, VOC related to network quality including the network speed increased.

Analyzing customer response and major improvement plan

* VDI (Virtual Desktop Infrastructure) : The solution providing Virtual Desktop and data storage space. Especially safe from threat of hacking and can prevent data leakage

Customer Insight enhancement activities

- Customers' Insight on IT/DT is expanded with active participation of Group ICT Committees such as DT sub-Committee, CIO Council, IT planning team leaders Council, etc.

1) DT sub-Committee

- Focus is on 'Platform driven BM innovation' based on digital technology
- 16 affiliates' digital based BM innovation cases secured
- Management of BM operation cases originated from platform commenced as case of change management

2) CIO Council / IT planning team leader Council

- An organization under DT sub-Committee as consultative body among member companies' CIOs and IT planning team leaders
- Discussion on member companies' BM innovation acceleration focused on digital, and on Group IT common issues, etc.
- In 2020, activities such as sharing directionality and specialist invitation seminar, Global ICT Insight Program etc. were carried out

Response to Service Interruption Disturbance

Service failure prevention principle

- In 2020, operation risk issue and management guideline was adopted to provide quality service to customers and to strengthen response activities on service failure. Operational risks are identified by organization in advance and continuously managed for resolution
- Employees' compliance matters are stipulated to provide uninterrupted IT service. In case of violation, penalty is given according to company rules

SGRs 7 major principles

- ① Select preventive inspection targets and conduct regular inspections
- ② During changes, comply with the change processes such as prior approval.
- ③ Set back-up targets and cycles, and regularly perform and inspect the results
- ④ Depending on the importance of a customer's business, define and manage the monitoring targets and major performance indicators.
- ⑤ When aware of failures, immediately spread and take measures. After the closure of a case, establish and implement preventive measures against recurrence.
- ⑥ Observe the working principles and always supervise when working with business partners
- ⑦ Comply with the security processes, such as security vulnerability inspections, for new, changed, or terminated subscriptions

Improved Non-Interruptions in Operation

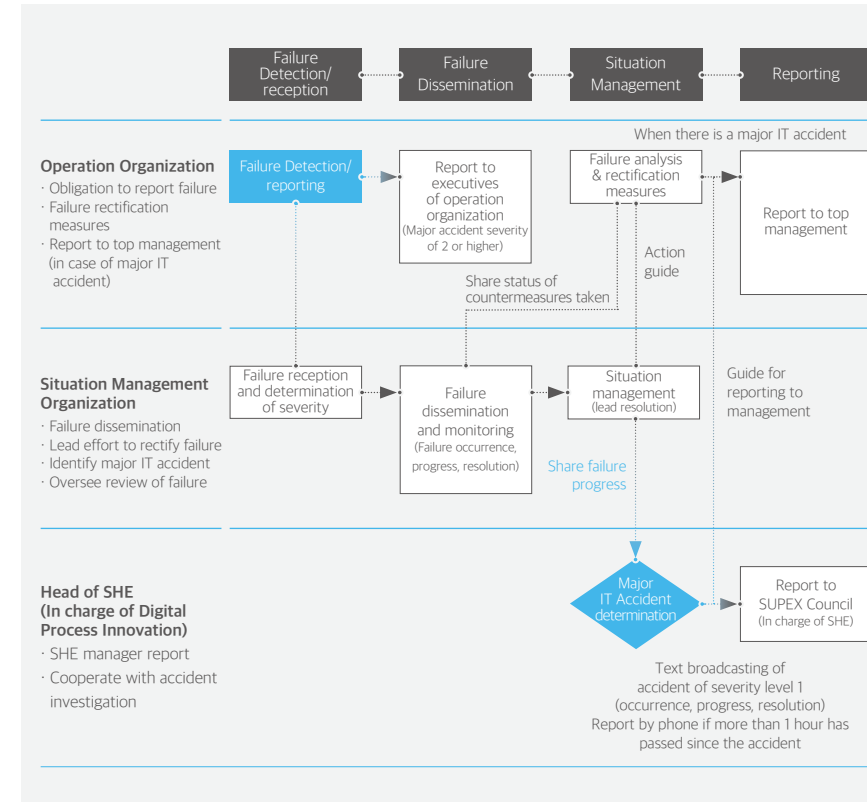

- Prompt and effective response procedure shall be established in infrastructure so that provided services are continuously provided without interruption notwithstanding various external factors such as disaster.
- For this end, disaster recovery center is in operation. And through disaster mock training, preparations are in place so that services provided to customers are not interrupted even under a disaster situation (Mock training conducted in 2020: Head office once, overseas branches 4 times)
- On-going monitoring and inspection activities were implemented for preemptive response to potential disturbance risk, regular checks were implemented 1~4 times a year by work area according to importance.
- Through operational diagnosis/audit, operational weak points are checked intensively, and potential operational risks are preemptively removed

Service Quality and Reliability

Managing service interruption risk

- Preparation against service interruption risk such as technological breakdown, programming error, cyber attack, natural disaster, etc.
- Number of interruption cases are managed by classification based on the interrupted hours in service provided to customers. Inevitable interruptions such as inspection and maintenance are also included in the number of interruptions.
- Through detailed risk management, the company is close to estimation of cost lost from risk due to service interruption and service interruption hours
- Especially service interruption hours are managed as target hour for resolution of SLA interruption. In case of loss occurrence, penalty shall be paid pursuant to SLA contract.

[Service failure response system]

Standard of Major IT Accident

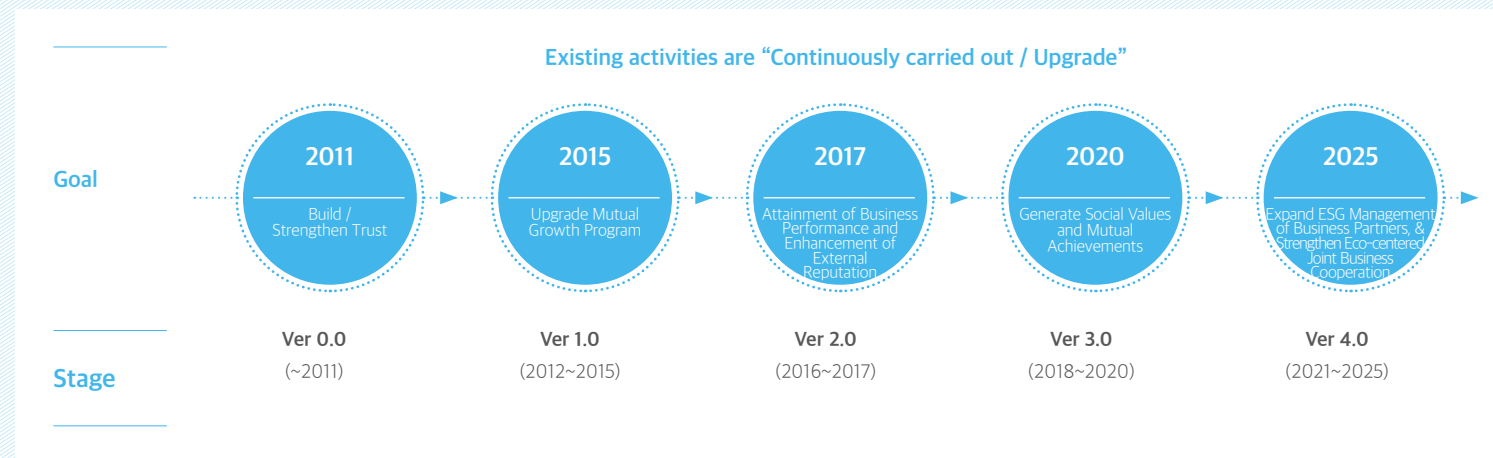

- ① Accident of Severinity level 1, over 60 minutes
- ② Accident that affects the entire group
- ③ Accident to be reported to CEO including customer company
- ④ Accident occurred to majority of customers, or accident reported by Government & relevant organization
- ⑤ Accident that caused physical loss due to interrupted service or production

Mutual Growth and Supply Chain

Mutual Growth and Supply Chain

Roadmap

Policy

Support Policy for Mutual Growth with Business Partners

- Based on trust with business partners (BP), communication are vitalized to form a fair and transparent relationship, and various support programs are operated.
- For mutual cooperation and mutual growth between large and small businesses, SK Inc. operates a direct contract system (1st vendor) with all partner companies without a 2nd / 3rd business partner designation.
- The mutual growth council is operated under the supervision of the purchasing manager (executive) (once a month)

Implementation / Performance Management

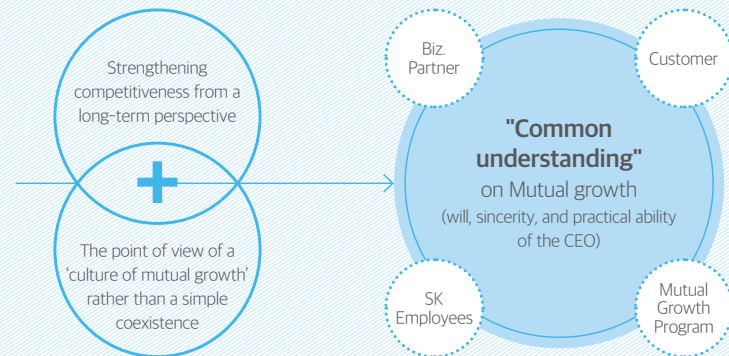

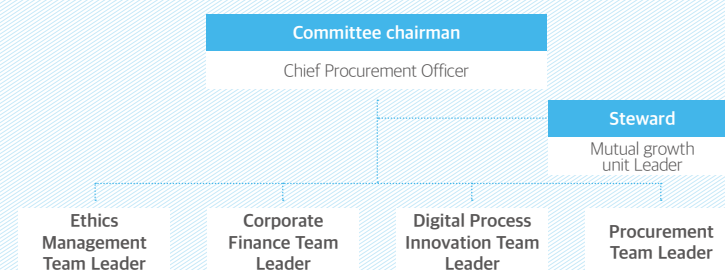

Excellent grade obtained in mutual growth evaluation,

- “Excellent” grade obtained for 6 consecutive years since 2014 as the result of mutual growth evaluation announced by the Mutual Growth Committee

Mutual growth program performance

Classification	Number of cases
Free transfer of patented technology	23 cases
Joint R&D	15 cases
Joint market entry cases	16 cases
Technical data deposit case	68 cases

Management system and organizational chart

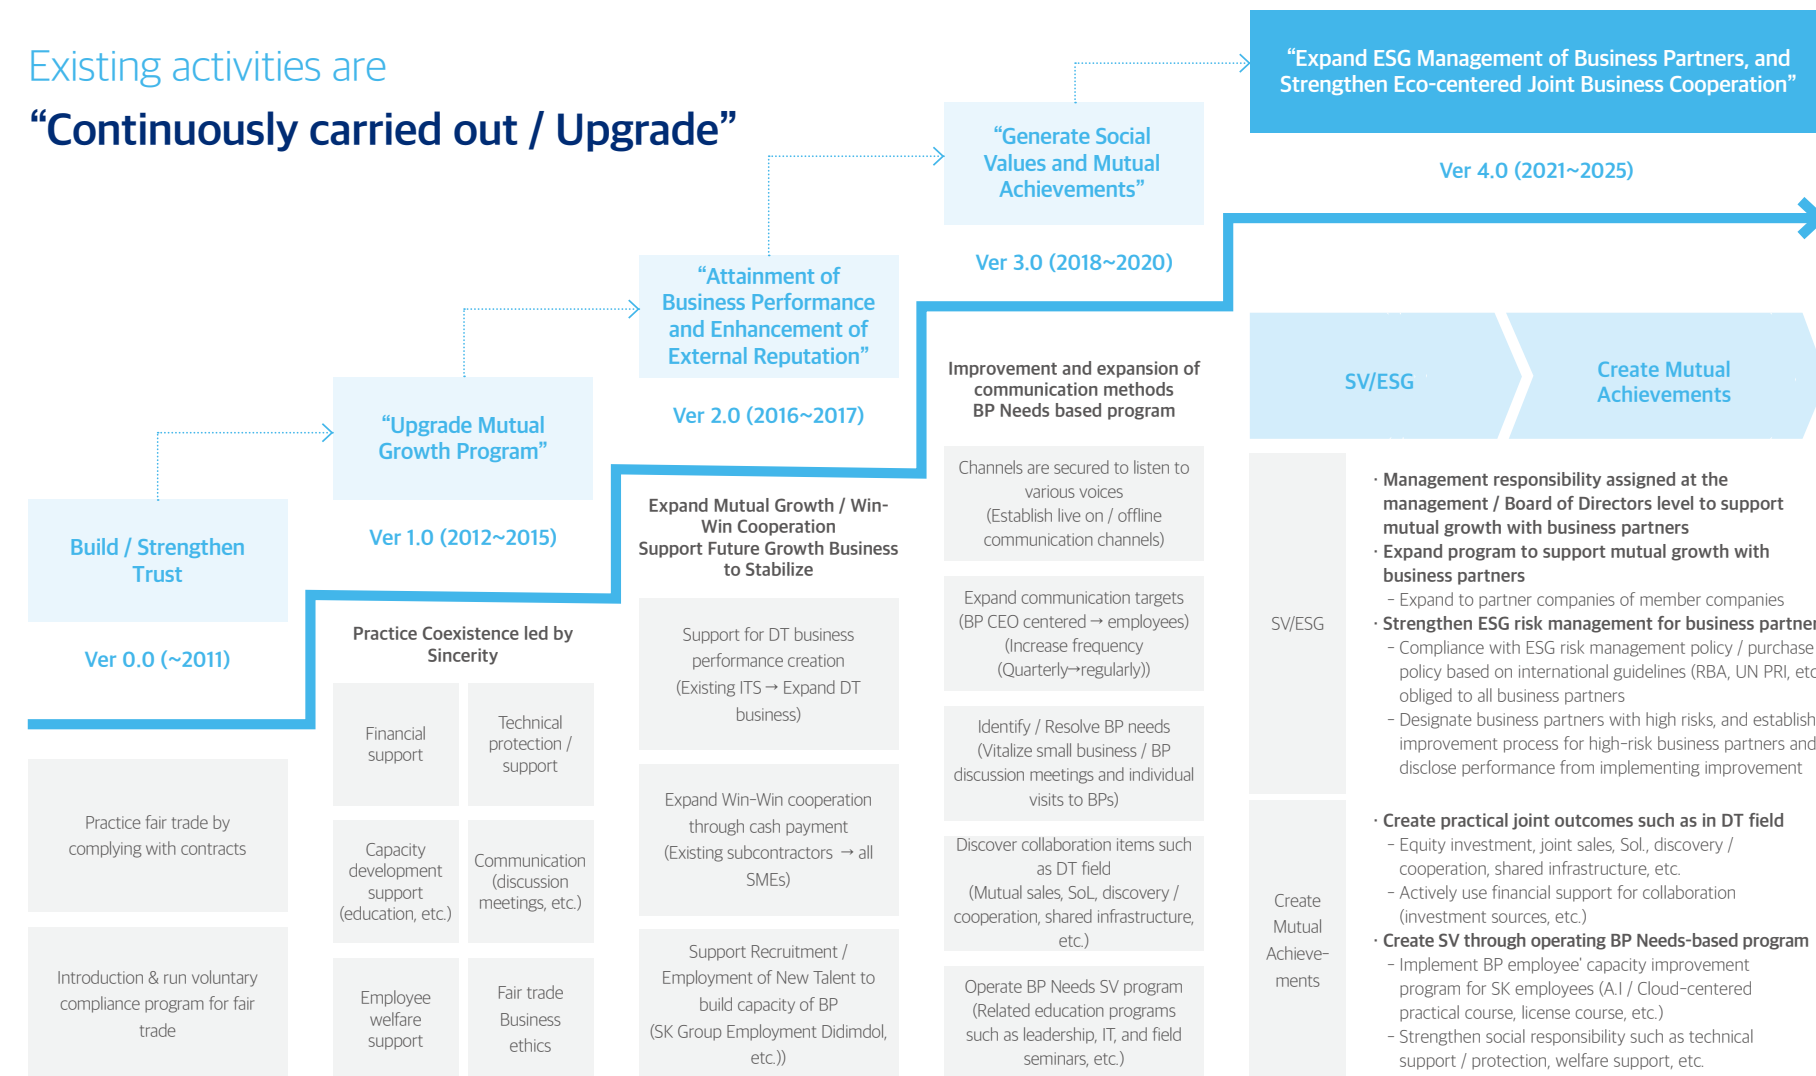

Mutual Growth and Supply Chain

Support for mutual growth proceeding roadmap

Existing activities are

“Continuously carried out / Upgrade”

* BP: Abbreviation or acronym of business partners, referring to Superior S, Superior, General grade partner companies dealing with SK Inc.

Mutual Growth and Supply Chain

< 96 >

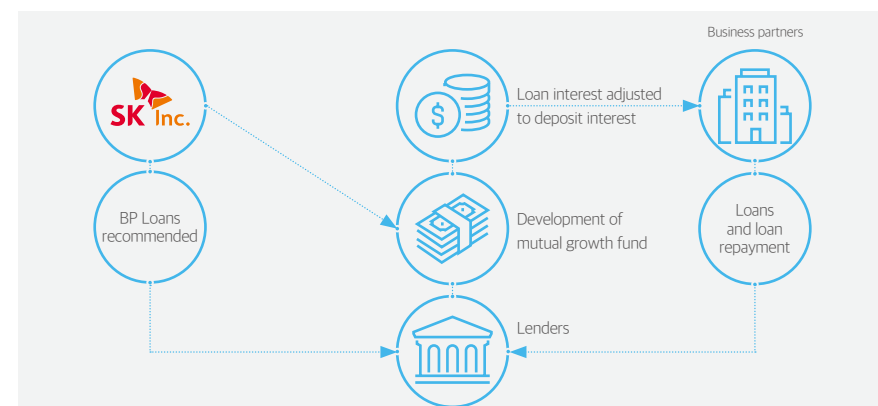

Mutual Growth Support to Business Partners

Financial (funds) support

- Mutual growth fund, network loan
- Support stable management base of business partners by enabling them to secure the required financial resources at interest rates lower than the market
- Timely payment
- Since 2006, 100% cash payment for subcontracts has been implemented, and measures have been taken to ensure smooth cash flow and planning of financial activities for business partners. In 2020, about KRW 14.1 billion worth of finance and funding support was provided

Mutual growth fund

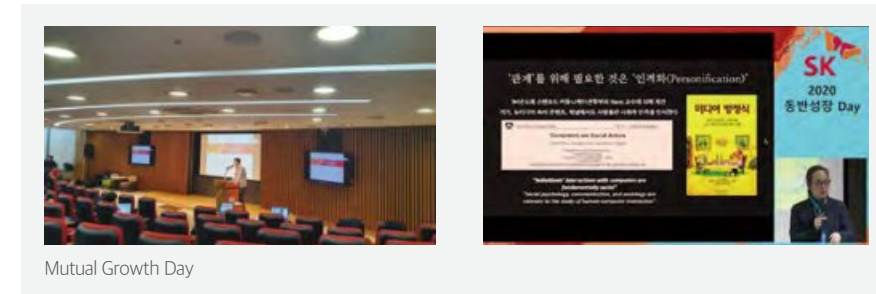

Mutual Growth and Supply Chain

< 97 >

Vitalizing communication

- Regular communication with business partners
- Securing the basis for effective mutual growth carried out through strengthening partnership based on mutual understanding. Implemented 'Mutual Growth Day', 'Biz. Partner CEO seminar,' etc.
- Operation of online communication channel
- SK Inc. has established business partners' purchasing information system to identify BP's real voice, such as collaboration proposals, grievance settlement, and management support, and the progress of requests being processed is checked

Technical support and protection

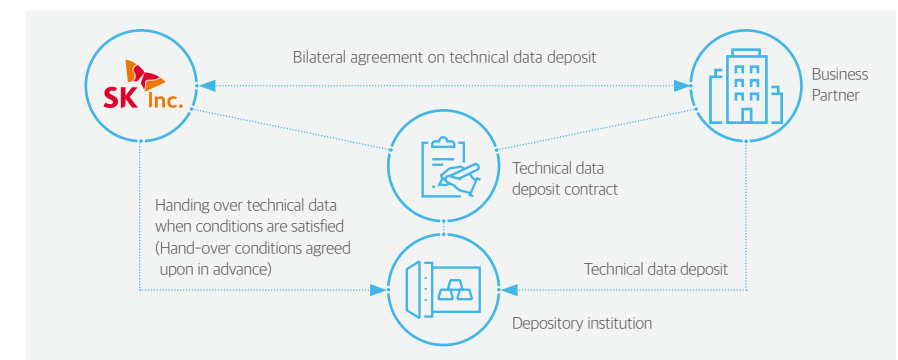

- SK Inc.' patented technologies are provided
- The right to use our patented technologies is provided to business partners and startups without charge so that technology-based commercialization by small and medium-sized IT companies are supported
- Business partners can advance into new business areas, develop new solutions, and maximize work productivity. The company anticipates effects such as profit sharing through performance sharing and securing intellectual property rights through joint patent applications

- Joint R&D and Joint Advancement into Market
- By transferring our technology and business know-how, SK Inc. supports business partners to strengthen their capacity and business competitiveness
- Business partners expect effects such as R&D based on a stable market channel and resolution of issues such as limited resources and environmental issues, etc. SK Inc. creates outcomes such as resource saving and shortening of lead time for entering new markets through collaboration with specialized business partners
- In 2020 Joint development of the Production Management System (MES) which is the core system of the Manufacturing Intelligence Integration Platform (MIIP), and joint development agreement for AI new drug development Target Research service are under progress

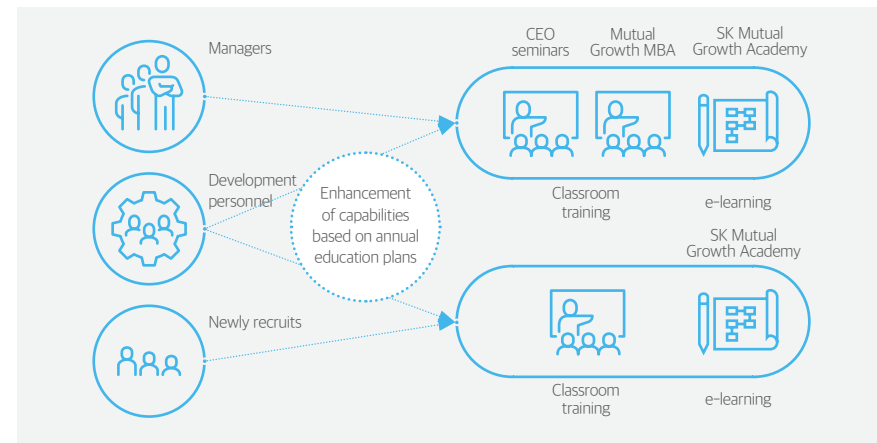

- Technical Data Deposit System
- To protect key technical data of business partners, original technology data is stored in a third party organization so that the risk of leakage is resolved
- SK Inc. guaranteed licenses and R&D stability

Mutual Growth and Supply Chain

Supporting education and training

- Support for improving management capacity of business partners through the group's education program
- Conduct training to strengthen outsourcing capabilities, to strengthen business competitiveness of business partners, so as to induce stabilization of the IT service market
- Full tuition free of charge

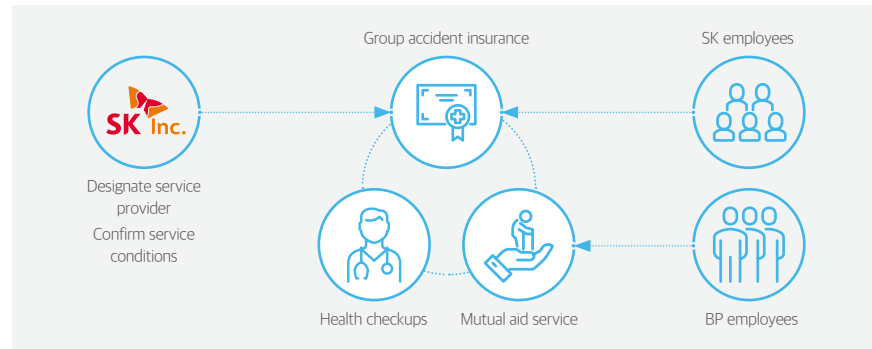

Main Curriculum

Classification	Name of education	Detailed programs	Attendees (persons)
Group (Mutual Growth Academy)	Mutual Growth CEO Seminar	Special lectures by experts (management, humanities, history, etc.)	51
	Mutual Growth e-learning	100 online courses on IT, OA, management, etc.	631
	VLS Online Course	IT, Leadership, Data Analytics, etc.	605
	DT (Cloud Application, React Programming)	Spring Boot / Kubernetes, web application creation	55
SK Inc.	VLS Open Course	MES, AI, Cloud, digital platform construction, etc.	1,263
	BP CEO seminar	Special lectures by experts (management, humanities, history, etc.)	150
	External specialized Course	Multi-Campus, Research Institute of Science and Technology Information,	78

Sharing of welfare system

- Group accident insurance, health checkup, mutual aid service, etc.
- The pursuit of happiness is realized for stakeholders by allowing them to use the same welfare as the SK employees

Fair trade, ethical management

- Fair trade
 - Strengthened the foundation for mutual growth by introducing and operating the four guidelines of the Fair Trade Commission
- Ethical management
 - Ethical management compliance of business partners strengthened through ethical regulations and related practice guidelines

Business support

- Productivity enhanced by securing the required manpower plan and operational stability for business partners through prior sharing of business opportunity information
 - Business partners secure superior human resources by increasing lead-time to secure human resources, and SK Inc. improves delivery competitiveness through mobilization of superior human resources and pre-project training

Mutual Growth and Supply Chain

Supply Chain Management

Customer Satisfaction Survey

- SK Inc. purchases outsourced human resource costs such as hardware / software, PC / computer consumables, system development, maintenance, and consulting through approximately 1,480 domestic and foreign business partners
- When carrying out overseas business, SK Inc. contributes to regional development and social contribution through the policy for local procurement.

Domestic & Overseas Supply Chain Purchase Status

[Unit : KRW 100 million]

Classification		2018	2019	2020
Total		8,889	10,985	7,543

	Overseas	10	81	85

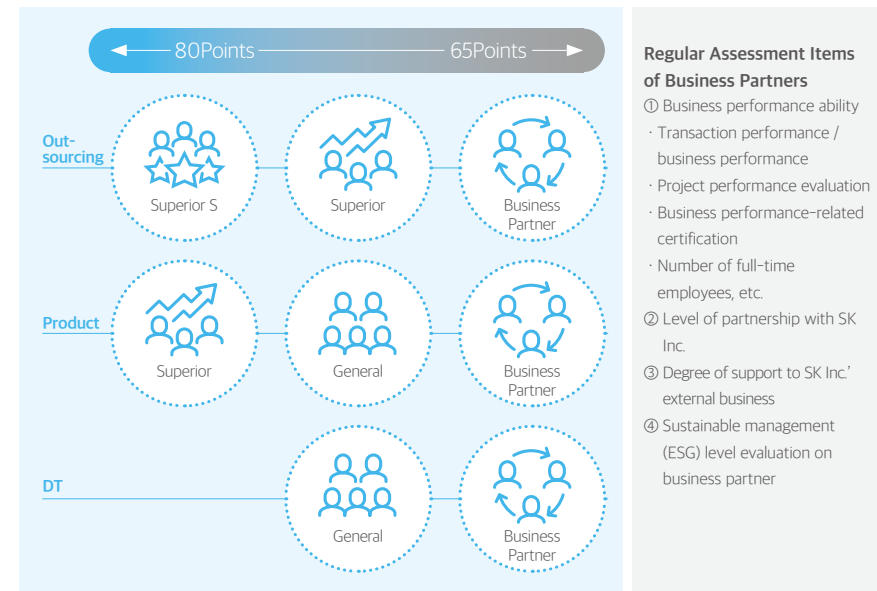

New Business Partner system

- The new and improved BP system is a business partner management system that selects only a small number of BP companies based on a more stringent evaluation standard than existing ones
- Selected companies are regarded as having the best capabilities in Korea, and are collectively referred to as "superior BP" without hierarchy
- The existing rating system is reconstructed into a "outsourcing: superior S / superior, product: superior / general, DT: general" rating system, and incentives for each rating are applied differently

Business Partner	
Outsourcing	<ul style="list-style-type: none"> Business partners that fall below the BP entry standards but have potential to become BP in the future
Product	<ul style="list-style-type: none"> Superior S : A partner company with superior partnership with SK Inc. and superior competencies according to BP evaluation results Superior : Biz. ESG Support for Business Partner

Mutual Growth and Supply Chain

Roadmap

Policy

Green purchase

- Based on purchasing regulations, SK Inc. endeavors to block environmental risk elements in advance from the purchasing stage of raw and submaterials and equipment.
- Eco-friendly products that can reduce environmental pollution and contribute to saving resources compared to other products / services for the same purpose are purchased as top priority, unless there is a special reason when selecting items

ESG practice support policy for business partners

- Mandatory compliance pledge obliged to all business partners to the code of conduct composed of the core management areas reflecting the characteristics of the IT industry
- ESG compliance monitoring is conducted by differentiating evaluation indicators / diagnostic methods / cycles through classification by business partners type.
- Depending on the diagnosis result, improvement processes such as education and consulting are carried out, and benefits such as priority support for mutual growth programs are granted in differentiation by evaluation grade.
- However, if a certain level is not met, more stringent follow-up measures such as transaction restrictions and contract termination are implemented

Execution / Performance Management

Status of increase in purchases from superior company in ESG among total purchases

- The percentage of purchases from BPs with superior ESG management is gradually increasing every year

Year	2018	2019	2020
Purchase percentage	55%	56%	59%

* Total purchase amount: product purchase amount + outsourcing purchase amount.

Business Partner ESG supporting Goal

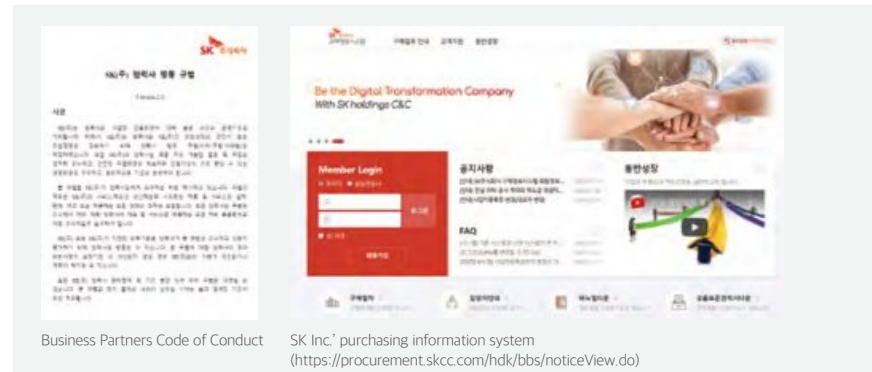

Year	2021	2023	2025
	Pledge to comply with the code of conduct by all business partners (100%)	In-depth ESG diagnosis for excellent business partners (100%)	In-depth ESG diagnosis for all business partners (100%)
Action plan			

Mutual Growth and Supply Chain

ESG practice support system for business partners

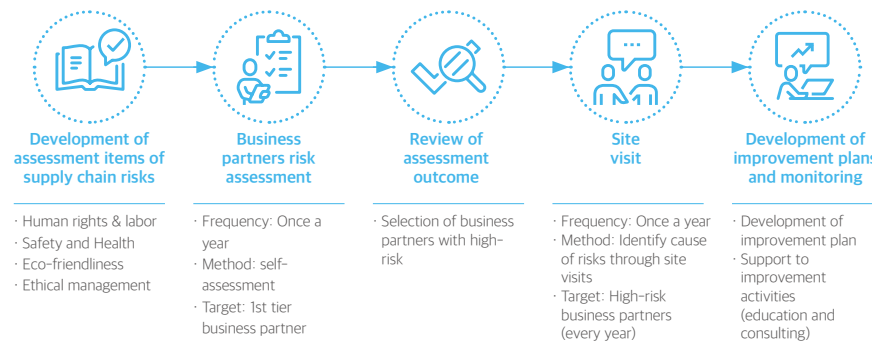

Business Partners' ESG Practice Guide

- In 2017 the code of conduct for business partners comprised of four areas of Human rights in labor, safety and health, eco-friendliness, and ethical management enacted and made to be mandatory
- Code of conduct is disclosed through our purchasing information system
- SK Inc. adopts restrictions on dealings with business partners who violate the Code of Conduct, and SK Inc. prevents ESG risks in the supply chain in advance through regular evaluation of the sustainable management level of business partners.

Support process for business partners' ESG practice

- A systematic process ranging from evaluation-feedback-improvement support-follow-up management for business partners' ESG practice was established and implemented
- Especially in case of high-risk business partners, support is provided for establishment and implementation of improvement plans through separate training and consulting
- The evaluation result of the sustainable management level is reflected in the regular evaluation for each BP selection to induce enhancement in business partner's level of sustainable management practice

Evaluation of business partners' ESG practice level

- Based on the business partners' code of conduct, sustainable management evaluation items of business partners are developed which consists of 14 items in 4 areas
- Sustainable management evaluation of all BPs is scheduled to be carried out by 2025, and support for sustainable management improvement through site visits is planned for deficient areas
- The 2021 business partners' sustainable management evaluation was conducted on 52 superior and superior S BPs, and superior result of an average of 89.0 points was obtained
- However, in the ethical management area (76 points), evaluation results are somewhat lower than in other areas
- In particular, it is analyzed that there are a large number of business partners that do not carry out social contribution activities and customer satisfaction surveys. Response measures regarding this was established and improvement were carried out

Classification	Details
Social contribution activities	Non-implementing business partners 53.8% (28 companies)
Customer satisfaction survey	Non-implementing business partners 46.2% (24 companies)

Summary of business partners' sustainable management assessment item

Classification	Details	Assessment by item
Human rights & Labor	Child, forced labor	Are internal regulations in place to protect child or forced labor?
	Compliance with labor standards	Are internal regulations and processes in place for following labor standards?
	Employment conditions	Are employment conditions clearly documented and delivered?
Safety and Health	Human rights, prohibition of discrimination	Are internal regulations in place concerning human rights and prohibition of discrimination?
	Safety and health of employees	Is assessment of workplace safety conducted or education on safety and health related to work provided?
	Industrial accident	Has any industrial accident occurred during the last 3 years?
Eco-friendliness	Health management	Is there any program for employees' health management?
	Violation of Safety & Health law	Was there any violation of safety and health laws during the last 3 years?
	Violation of environment standard law	Was there any violation of environment related laws and regulation during the last 3 years?
Ethical management	Prevention of corruption	Is there an internal policy or education conducted for corruption prevention?
	Social contribution	Are social contribution (volunteer service, donation, etc.) activities implemented?
	Customer satisfaction	Does the company conduct customer satisfaction survey on the provided services?
	Legal violation related to customers and subcontractors	Is there any violation of laws and regulations concerning products, services, and consumers, and non-payment to subcontractors?
	Protection of customer information, etc.	Is there a policy or education program in place for the protection of customer information?

* Sustainable management "assessment matter by items" is currently being supplemented. Improved contents will be applicable during the 2nd half of this year.

Total	8,117	12,559	14,833	16,642
* Social contribution program is measured based on outcome such as employee standard etc. In case it is difficult to measure outcome such as volunteer activities / donation, measurement is taken with input cost				
2020 Major performance				
Year	Performance	Details		
Participated employees	1,020 persons	pro bono (458 persons), Happiness IT scholarship (562 persons)		
Beneficiary	159 persons	SIAT (36 persons), DDA (64 persons), Happiness growth campus (22 persons), Happiness IT scholarship holder graduate (37 persons)		
Beneficiary institution / company	151 companies	Cloud service (78 units), pro bono Beneficiary SE (59 units), SIAT job searching company (14 units)		

Policy

- Social problem solving and the happiness of stakeholders are pursued through ICT technology utilization and active social participation activities by employees based on communication with regional and civil community.
- Established three social contribution directions: 'growth with the local community', 'support for self-reliance / growth of people with disability', and 'spreading social value'. Social problems are solved and social value is maximized through social contribution based on employees' participation using our core competencies such as ICT / DT
- Communication with local community
 - In order to resolve various problems in the local community together, urgent issues of local community and blind spots that require a human touch are discovered / supported through regular communication with major stakeholders
 - Communication with local community enhanced through various cooperation and partnerships such as local governments, institutions / organizations (social welfare council, volunteer center, sustainable development council, etc.), and social enterprises

Social Contribution

Major activities by Social contribution direction

3 classes of social contribution directions were selected in connection with UN SDGs and performance is measured

Growth with local community		Support for self-reliance / growth of People with disability		Leading the spread of social value	
SK Inc. and employees want to fulfill their responsibilities and roles as a member of the local community. To this end, SK Inc. is carrying out Win-Win activities with SMEs of the local community and activities of sharing happiness that can alleviate the difficulties of the vulnerable class in the local community.		SK Inc. is paying attention to the 'quality of life of the physically challenged' among various social problems. While supporting the self-reliance / growth of people with disability with employees, SK Inc. is developing a sustainable support program for people with disability.		SK Inc.' stakeholders are anticipating our active use of ICT technology to resolve complex social problems. Therefore, SK Inc. is pouring efforts to resolve social problems and spread social values by utilizing the ICT technology possessed by the company and SK Inc's employees.	
Opening and sharing ICT infrastructure <ul style="list-style-type: none"> · Free Cloud service provided to small business start-ups / SMEs in the local community for 5 years - Supported 78 companies in 2020, about KRW 1.68 billion 		Fostering ICT specialists and supporting employment <ul style="list-style-type: none"> · SIAT(Smart IT Advanced Training): Fostering young physically challenged ICT specialists and employment support project - 2020 graduates 36 persons, employed 32 persons 		Participation in social value and spreading of its practice <ul style="list-style-type: none"> · Haenggarae: participation type platform for resolution of social problems - Applied to 8 companies / institutions, 7,000 persons participated in activities 	
Growth support for neglected class in local community <ul style="list-style-type: none"> · DDA (Digital Dream Academy) project: middle-aged to elderly / career interrupted female startup & re-employment education project - 2020 DDA graduates 64 persons, recruited & startup 16 persons · Happiness growth campus: education project for employment of young adults in alienated regions - 2020 graduates 22 persons, employed 16 persons 		Happiness IT scholarship project employees participate in <ul style="list-style-type: none"> · Happiness IT scholarship project: support to young physically challenged students - 2020 participants 562 persons, Beneficiary students 37 persons, scholarship amount raised KRW 92 million 		Social value creation through use of digital technology <ul style="list-style-type: none"> · Speech Catch: AI based internet lecture subtitle service · Workwiz: ICT based employment support Portal for middle-aged and the elderly 	
Spreading / implementing sharing culture in local community <ul style="list-style-type: none"> · Support to build a social safety network (COVID response): Sharing a mea, on-tact project (KRW130 million) · Quarantine supplies and meal support for undernourished children (KRW 0.8 billion) · Employee sharing culture practiced: donating winter clothing for homeless people (Anna's house) HopeOn campaign (heating support to vulnerable class) 		SE* support for people with disability IT talents' self-reliance <ul style="list-style-type: none"> · Standard business site for people with disability IT specialist - 'Foundation Happiness ICT' project supported 		SE ecosystem supported <ul style="list-style-type: none"> · impact investment - Approx. KRW 5.6 billion invested during 2020 - pro bono - 2020 458 people participated, SE 59 companies supported 	

* SE : Social Enterprise

Social Contribution

< 104 >

Major activities in ICT based social contribution

Growth with local community

COVID-19 Local Community Happiness sharing

- Emergency support for COVID-19 quarantine supplies for the vulnerable class in Seongnam city (approximately KRW 30 million worth of masks and disinfection supplies)
- Winter vacation weekend meals provided for 400 underfed children in Seongnam city
- On-tact project carried out, and supported free meals for 1,535 elderly living alone every day for 3 months. In response to the closure of food service center due to COVID-19, employees carried out meal service and winter clothing donation event for the homeless at 'Anna's House' in Seongnam-city

Free Cloud support service

- Signed a "Win-Win cooperation cloud service support project agreement between Gyeonggi Province and big corporations & SMEs" to provide free cloud services to SMEs in Gyeonggi province and the local community.
- Cloud specialist training education, Cloudz partners MSP (Management Service Provider) supported free of charge

Classification	2019	2020
Participating corporation	16 companies	78 companies
Service support	KRW 0.99 Billion	Approx. KRW 1.68 billion

Support for self-reliance / growth of people with disability

SIAT (Smart IT Advanced Training)

- physically challenged ICT specialist Fostering / employment support program 'SIAT' operated with Korea Employment Agency for Persons with Disabilities since 2017.
- ICT job education such as Big Data, software development, information security, web design, and IT office service is supported to people with disability high school and university graduates.
- An employment opportunity for entry into society is provided to people with disability by forming a 'seed alliance' with each participating companies

Classification	2017	2018	2019	2020
Employment ratio (completed)	82% (23 persons)	86% (21 persons)	91% (23 persons)	89% (36 persons)
Participating companies	14 companies	8 companies	9 companies	13 companies

Happiness IT scholarship

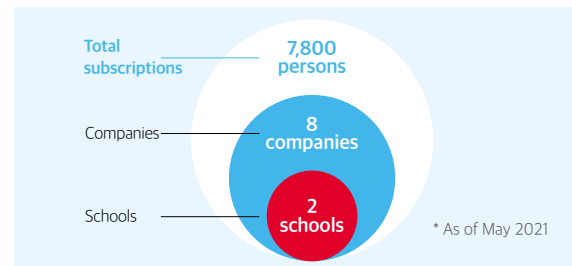

- The only scholarship system for students from physically challenged families in Korea operated since 2005 with voluntary donations from employees.
- Supported the dreams and hopes of 900 students from the vulnerable class by raising a total of KRW 1.31 billion by 2020.
- Total of KRW 92.3 million scholarships provided to 37 people with disability scholarship holders in 2020, and career counseling, and mentoring support was provided by employees

Leading the spread of social value

Haenggarae

- Developed Haenggarae app to induce healthy thoughts and actions of individual members of society, and supplied the app to companies / institutions / schools, etc.
- Through cooperation with various stakeholders such as each regional sustainable development council, Community Chest of Korea, and education institution, participation / implementation of social value activities such as plastic, air pollution / greenhouse gas, waste, blood donation, voluntary service were disseminated.
- By creating the UN SDGs education & Haenggarae cooperation model, SK Inc. plans to expand the business to support students who are future social leaders so that they can grow into healthy members of society

pro bono

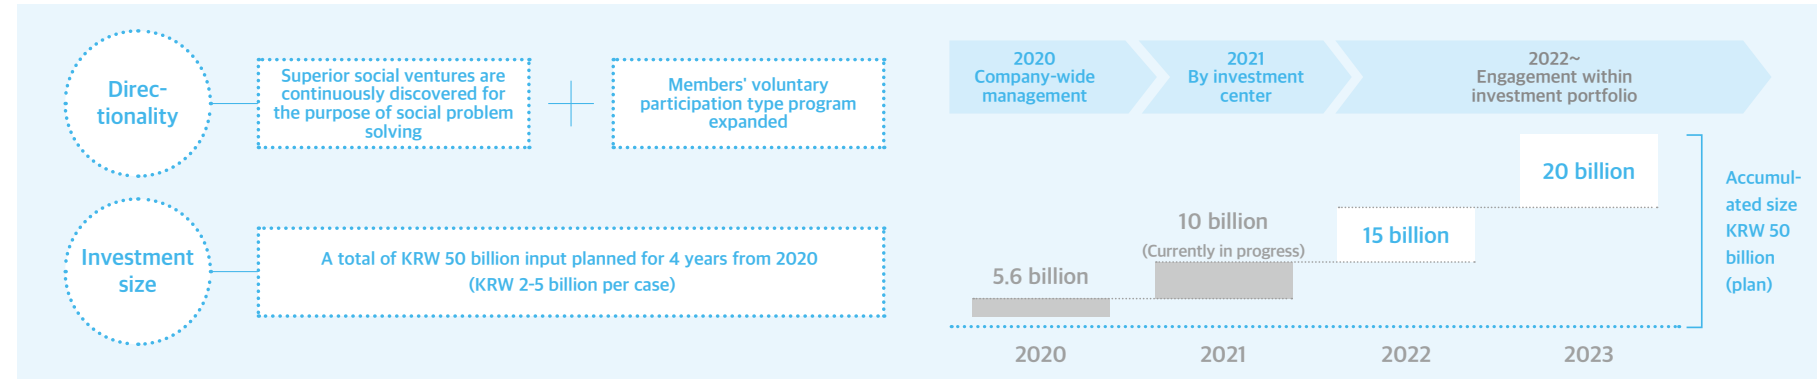

- Social enterprises' growth is supported through consulting in grafting IT system planning / design and operation, information protection management, AI / Big Data DT technology as well as providing management advice such as marketing and law

2020 458 members participated, 59 companies supported

Social Contribution

< 105 >

Social Enterprise ecosystem supported through impact investment

Impact Investment Policy

1) Impact Investment

- An investment method aimed at solving social problems while creating profits through investment activities
- SK Inc. develops impact investment activities in a way that supports social ventures that take the lead in solving social problems by utilizing our investment capabilities as a 'Sophisticated Value Investor'.
- Contributing to the social financial ecosystem and supporting value-up of investee social ventures, SK Inc. also approaches from the perspective of investment in new growth area value at the mid to long-term aspect.

2) Target and method of impact investment

- A company that combines technology and SV creation potential among social ventures related to the four investment areas previously discussed in Financial Story.
- Direct fund investment sought (FI) from a mid to long-term perspective.
- While verifying the financial feasibility of a social venture through investment implementation at the Growth Stage* to the maximum extent possible, overcoming the limitations of domestic impact investment that lacks scale-up support is carried out.

* Growth Stage: Venture businesses are categorized as Early-Growth-Late Stage according to corporate growth stage. In growth stage, generally business model is established, KPI is improved, and valuation is formed based on financial indicators.

3) Impact investment assessment

- Focusing on assessment on SV potential that measures social problem solving capacity, basic EV assessment (technology, marketability, business feasibility, etc.) is implemented at the same time.
- The pilot test under implementation for SV Performance measurement and monitoring using impact value assessment model (IVM*) and its expansion scheduled.

* IVM (Impact Valuation Management): Impact valuation measurement guideline internally developed by CSES (Social Value Researcher)

Impact investment assessment standard

Classification	Contents
Mission	<ul style="list-style-type: none"> The social problem mission which a company wants to resolve is defined. Whether the social problem defined in the mission is specified in the articles of incorporation, policy, and whether or not to be disclosed externally.
Biz. creation SV level	<ul style="list-style-type: none"> Whether the product / service provided by a company directly contributes to the resolution of the social problem defined in the mission (including the level of impact and the degree of social problem solving).
SV level other than Biz.	<ul style="list-style-type: none"> Whether corporate activities contribute to the achievement of SK Inc.'s SV creation and UN SDGs.

Social Contribution

Impact investment implemented / Performance management

1) Impact investment activities

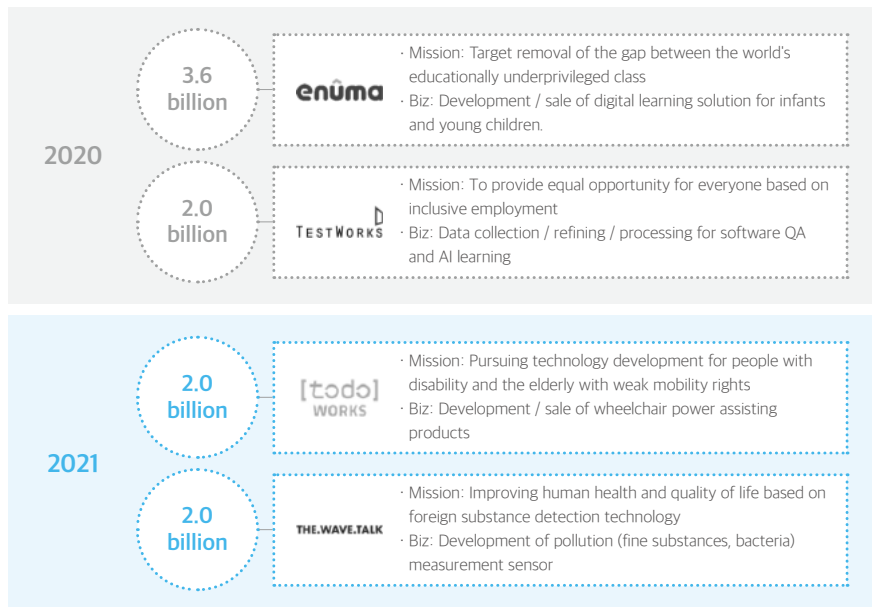

- Employees' participation based impact investment program 'Deep Impact Day' is operated (2020~)
- Participating social ventures are provided with the opportunity for Scale-up and Value-up, and employees are induced to sympathize with the necessity for social problem solving and to perceive 'new entrepreneur spirit.'
- On 2021 Deep Impact Day, 40 social ventures in total will be supported, and final impact investee companies will be selected through employees' participation and investment review procedure.

Deep Impact Day program poster

2) Impact investment performance

· As of March 2021, investment of KRW 4 billion was carried out (cumulative KRW 9.6 billion)

Governance

Board of Directors centered management

Corporate Governance charter

- 2018, SK Inc. corporate governance charter adoption & announcement (<https://www.sk-inc.com/kr/ir/charter.aspx>)
- For expanded provision of governance information such as shareholder rights and responsibility of Board of Directors and audit organizations.
- Strengthening of management transparency and promotion of corporate value pursued through stipulation of responsible management practice centered around the Board of Directors.

Board of Directors' composition

- Decision making body on major management matters and activities that have a significant impact on management.
- Board of Directors' activities are conducted in accordance with the Board of Directors operation policy with independence, specialties, efficiency, and diversity.
- Strengthened communication capacity based on expanded diversity of Board of Directors and understanding on women through the appointment of new female Independent Directors in 2021.
- An Independent Director was appointed as the chairman of the Board of Directors, which is composed of 9 persons in March 2021 (4 executive directors, 5 Independent Directors).

Board of Directors' activities status

- Regular Board of Directors meeting held each month, and if necessary extraordinary Board of Directors meeting held from time to time
- In 2020, a total of 14 Board of Directors meetings were held, 43 agendas were deliberated and resolved, and 34 agendas were reported.
- Decisions are made by the attendance of a majority of the enrolled directors and the consent of a majority of the directors present (unless there is a separate resolution requirement in related laws or by the Board of Directors).
- The minimum attendance rate target for Board of Directors is 80%, and details of activities such as attendance rate and whether individual director agreed or disagreed on the disclosed agenda are disclosed on the website and business report (an average attendance rate of 99.2% in 2020).

Assessment on Board of Directors

- From 2018, assessment on all directors has been implemented through assessment questionnaires developed by external institutions (once a year).
- Assessment of 39 sectors in 5 major areas (Board of Directors role / function / responsibility, Board of Directors' composition and qualifications requirements for directors, Board of Directors operation, Committee structure and operation)
- The 2020 assessment result was 4.61 points (out of perfect score of 5), which was improved from 4.55 points in the previous year. Based on the assessment results, the Nomination/Compensation and ESG Committee was newly established by drawing up a plan to improve the operation of the Board of Directors. Planning to continue proceeding with advance governance such as shareholder communication activities and reinforcement of Independent Director education.

Board of Directors' performance assessment and compensation

- Payment is made in accordance with the law within the limit of remuneration for directors approved by the general meeting of shareholders, and the remuneration and calculation method are disclosed in the business report.
- The Nomination And Compensation Committee reviews and reports individual remuneration for executive directors, and the Board of Directors makes a final decision including remuneration for Independent Directors.
- In the case of Independent Directors, in order to guarantee independence, remuneration based on performance assessment other than basic salary is not paid.

Appointment of directors

- Directors are appointed through the resolution of the general meeting of shareholders in accordance with the commercial law and the articles of incorporation.
- The Nomination And Compensation Committee selects a group of director candidates, undergoes strict screening, and recommends candidates qualified for related laws to the general meeting of shareholders in consideration of specialty, performance, independence, etc.
- Candidates whose recommendation is confirmed are appointed as Independent Directors at the final general meeting of shareholders after the resolution of the general meeting of shareholders is convened by the Board of Directors.
- In consideration of the link between the competencies of a director candidate and the company's management strategy as a major standard, the skill set of the entire Board of Directors is composed and specialties are strengthened so that the Board of Directors can contribute to the long-term growth and development of the company.

In case of any additional inquiry raised on the agenda submitted, additional explanations are provided on relevant contents through communication with related departments.· The right to receive advice from external advisory institution shall be codified in the Board of Directors, and Committee regulations

Governance

Efforts for advancement of governance

Strengthened system management

- Sub Committees operated under the Board of Directors increased from 3 in 2020 to 4 as of Apr 2021 for efficient and systemic operation of the Board of Directors
- Mostly composed of Independent Directors for independent Committee operation
- Since 2021, governance was improved such as installation of ESG Committee, and Nomination/Compensation Committee to enhance ESG discussion and management transparency within the Board of Directors.
- Especially ESG Committee was strengthened by including one CEO / president so that expanded discussion on management strategy would be facilitated from ESG perspectives.

Shareholder-friendly management strengthened

- 2016: Governance Committee established
- 2017: Decided to introduce electronic voting system
- 2018: Annual shareholders meeting was convened in avoidance of peak days. Corporate governance charter adopted. Shareholders communication Committee member system newly installed. Grand prize for being superior company in ESG received from Korea Corporate Governance Service. Board of Directors assessment introduced. CEO's letter to shareholders posted on website
- 2020: interim dividend paid for 3 consecutive years
- 2021: Governance restructured (Board of Directors-centered responsible management)

Management's performance assessment and compensation

- Compensations for top management are paid through efficiency measurement on management performance within the director compensation limit approved by the shareholders meeting.
- Since 2019, by quantifying items on ESG management level and SV performance enhancement (50%) in addition to financial elements (50%) such as sales, operating profit, debt ratio, total equity return, and growth rate, performance assessment is reflected on all executives' performance assessment (KPI) including top management.
- Performance linked period is 3 years, stock options are granted to management to link corporate value enhancement to compensation.

Ethical Management and Anti-Corruption

Roadmap

Policy

Systemic access to ethical management

- SK Inc. recognizes ethical management as an axis of corporate culture, taking a systemic approach based on '3C: Code, Compliance, Consensus'

- It is an independent organization in charge of ethical management. It has ethical management team established within Happiness promotion center which reports directly to the CEO. The audit Committee under Board of Directors performs supervision / responsibility on overall activities through regular management review.
- The anti-corruption policy of the company was found to meet international standards by establishing the anti-corruption policy and acquiring global anti-corruption certification (ISO 37001) in 2021.

Implementation / performance management

Various ethical / anti-corruption grievance received / processed

- Various reporting / counseling operated (internet, email, phone)
- Issues are identified through regular survey on contractors / employees
- No tolerance principle and whistleblower protection policy operated

Classification	Result
Number of Discipline violation	11 cases
Number of action	11 cases

Regular monitoring of major work areas through self-purification system

Ethical Management and Anti-corruption

Code

Ethical regulations

- Through adoption / revision of SKMS-based ethical regulations, employees will determine and act by judging ethical regulations as a standard when facing ethical conflicts related to job performance.
- Ethical regulations are composed of ethics and whistleblower protection areas for employees, customer, society and the company / shareholders, respectively. Each area guides detailed implementation details.
- All employees are responsible for complying with ethical regulations, and if the standards for judgment are not clearly indicated in the regulations, they must act in judgment according to the decision-making principle of 'lawfulness / transparency / rationality'.

Violation cases by area (Don'ts)

- The ethical management violation cases that may occur out of management activities are collected and produced as usable as ethical behavior guidelines for employees when performing their duties.

Area	Major Contents
Non-ethical	23 items including basic etiquette, money, valuables, entertainment, hospitality, conflict of interest, and protection of the company's assets and information
Security	14 items including PC security, information and document management, project security, etc.
Subcontracting	18 items including determination and adjustment of subcontract payment, payment of subcontract payment, non-delivery of document, inspection and result notification, unreasonable management intervention, restriction of subcontracting, etc.
Tax, Fair Trade	23 items including issue transaction, unfair internal transaction, unfair joint action (collusion), unfair transaction action, etc.
Reporting & management	33 items including promotion of unreasonable project, false / delayed / partial reporting, and negligence in project management.

Ethical management FAQ for SK leaders

Ethical Management and Anti-corruption

Compliance

Ethical management dedicated organization

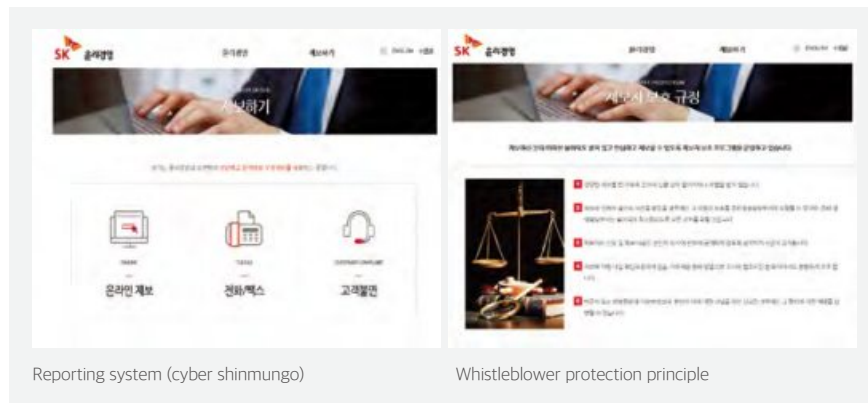

- The authority and independence of the ethical management organization and employees in charge are guaranteed through the ethical management team at the Happiness promotion center directly under the CEO.
- Ethical management implementation culture was internalized by establishing ethical diagnosis and support system for subsidiaries, overseas subsidiaries, and business partners.

Ethical management reporting / consulting system

- Various reporting / consulting channel operated towards stakeholders
- Reporting / consulting can be done anonymously and is managed by SK Group.
- 100% investigation principle observed on reported cases
- Through the whistleblower protection clause in ethical regulations, whistleblower's identity protection and prohibition on any disadvantage / retaliation action were stipulated.

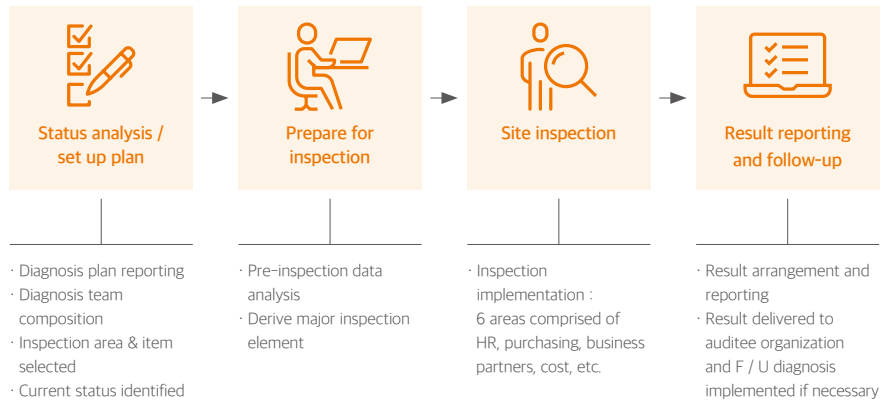

- Online Reporting: <https://ethics.sk.co.kr/Eng/Report/OnlineReportIN.aspx>
- Phone: 02-6400-6262
- Email: ethics@sk.com

Ethical management self-purification system (risk assessment and implementation audit)

- Annual regular diagnosis and assessment implemented on 6 major duty areas comprised of human resource, finance, purchasing etc.

Violation risk assessment on 2020 business site discipline

Major matters	Major results

Ethical Management and Anti-corruption

Ethical management implementation culture participated by employees.

- In Mar 2021, corruption risk derivation and status diagnosis was implemented in connection with ISO 37001, with each organization agent participating.
- In May 2021, all employees pledged to implement ethical management.
- Through annual ethical management implementation W / S, non-ethical / corruption risks are shared and ethical management implementation guidance was prepared by organization.
- Ethical management letter sent for the purpose of recurrence prevention regarding major diagnosis / reporting investigation result.
- Remuneration is paid by reflecting employees' compliance/code of conduct in the company's KPI.

Employees' ethical management survey

- Compliance level on each area of regulations, related system operation level, and corporate culture internalized level are identified through annual ethical management survey on employees.
- The survey is conducted at the SK group level, ensuring anonymity and objectivity, and the results are used to derive improvement points

Ethical management survey on business partners

- For the purpose of prior prevention of risks related to trade with business partners and strengthening of ethics, the survey was conducted every year since 2020
- Objectivity and response rate were increased through an anonymous survey method through an external agency, and unfair trade or unethical behavior was identified and our commitment to ethical management implementation, and reporting channel were communicated.
- Direct interviews with major contractors were conducted in parallel to enhance the reliability of commitment to ethical management implementation and to secure communication channels.
- As part of creating a happy collaborative environment with business partners, we promote business partners' ethical awareness and prevention activities on non-ethical practice through various communication methods such as business partners' ethical management survey, video education and pledges, and listening to complaints, etc.

Research & Development

SK Digital Platform

- SK Inc. defined Digital Transformation (DT) technology areas such as Big Data, AI, Blockchain, Cloud, etc. as core R&D areas, and is continuously expanding R&D investment portfolio reflecting technology change and market requirements
- Tech. Roadmap is composed which continuously reflects DT technology development / ownership status (base technology and related solution) and To-Be directionality.

SK Inc. Tech. Roadmap

Cloud

- The CloudZ, which is a Cloud project brand of SK Inc. as the comprehensive IT service combining Cloud and ICT new technology, can use worldwide Cloud centers and resources at any time.
- Various Cloud services such as IaaS, PaaS, SaaS* etc. are provided to conform to whatever needs customers have

MCMP

- MCMP (Multi-Cloud Management Platform) system refers to the integrated Cloud management system that aims to provide Total Cloud Management Value by supporting various customers and industrial environments.

MCMP function

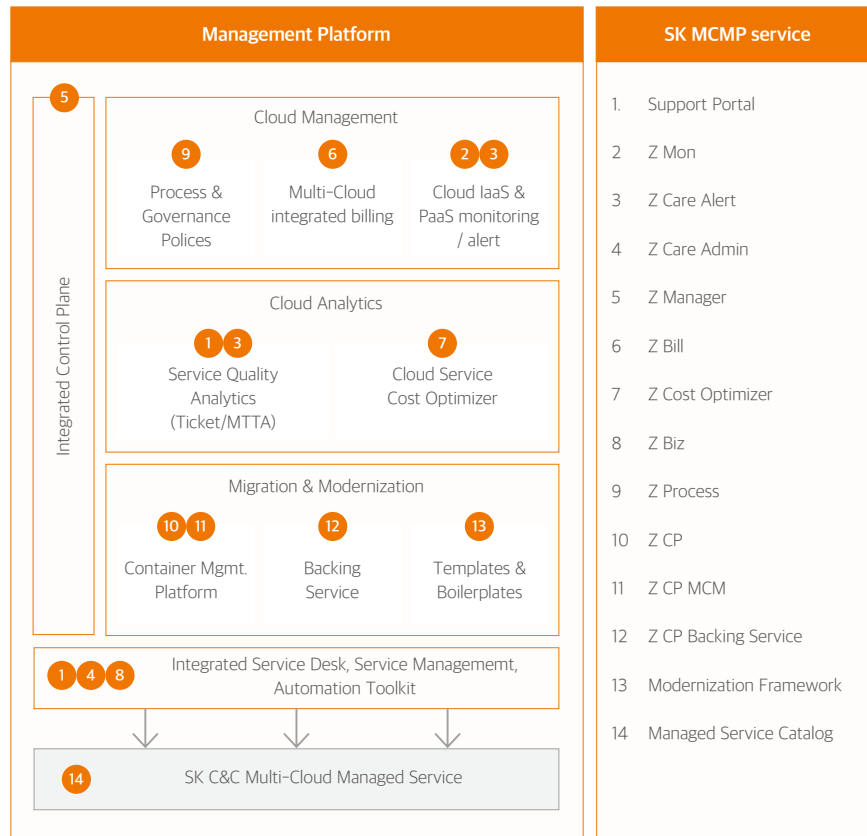

*IaaS (Infra as a Service) / PaaS(Platform as a Service) / SaaS (Software as a Service): "aaS" is the acronym representing product, tools, and technology provided to users as a service through network or Internet.

Research & Development

< 118 >

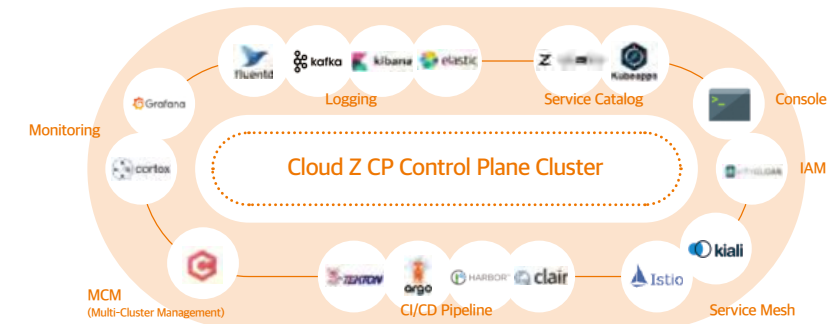

MCMP composition and service

- Composed of 14 services in total, with integrated and independent composition is possible for each service.
- The characteristics possessed are End-to-End integrated platform encompassing all areas of services such as request necessary in providing Cloud service to customers, interruption and change management, monitoring, merchandise management, etc.
- SK Inc. is currently proceeding with MCMP enhancement aiming for Premium MSP (Cloud service provider). For this end, we are endeavoring to enhance basic function, strengthen automation function, and secure automation function to create Biz. Value.

CloudZ CP(Container Platform)

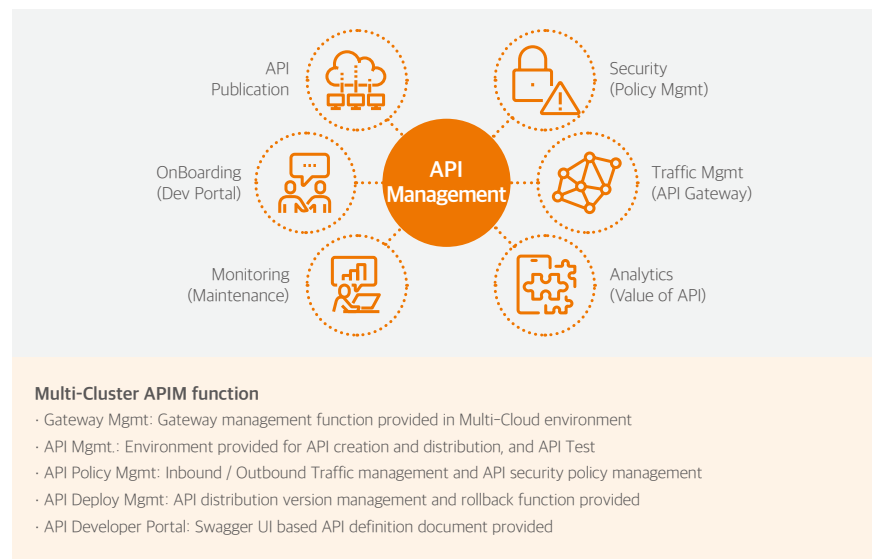

- CloudZ CP means the platform service providing necessary functions to corporate customers requiring update of system and application in an integrated way.
- Especially how multi-Cloud-based Kubernetes* service Life-Cycle is managed, it provides convenience tools for development and operational efficiency service

* Kubernetes: The management system providing automatic deploy (distribution), and scaling of containerized application also known as K8s.

APIM (API Management)

- Separation and collective / integrated management of common functions such as interface preparation and disclosure, use policy, access control, statistics, analysis, and performance reporting that used to be realized at Microservices, respectively.

Research & Development

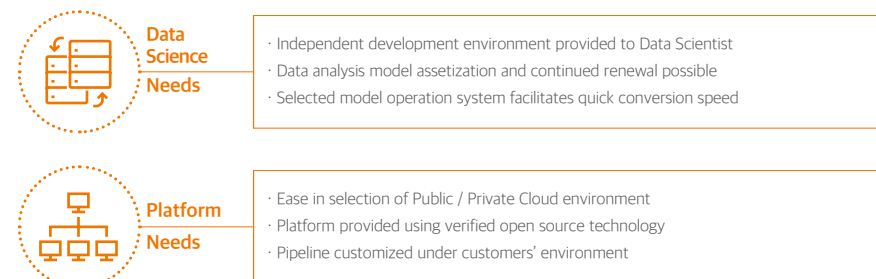

< 119 >

Big Data

- Provides core functions such as large capacity data collection, storage, processing and analysis, operation, etc. Development continues on the solution integrating the technology accumulated through development and commercialization of the most recent Big Data technology

Acculnsight+

- Multi-Cloud based DevOps machine learning platform that supports all areas of science from Data pre-processing to analysis / operation all at once
- As the integrated data analysis platform service providing data collection, processing, analysis and visualization, and specialized technology support, with advantages in easy and quick data connection and high data analysis accuracy
- This not only supports both of On-Premise and Cloud Platform method, but also operates in multi Cloud environment, and is continuously expanding the scope of services provided even at the present time.

- Acculnsight+ supports all service (Pipeline, Modeler, DCM)* required for Big Data collection, processing, analysis, and utilization.
- Acculnsight+ is suitable to users' business model and is capable of establishing flexible service, and supports customized type education service for successful business application.
- Services are provided to customers in various industrial groups such as finance, distribution, and manufacturing, and are anticipated to be used in more extensive areas.

* Pipeline: The service supporting development / learning of analysis data collection / processing / storage and machine learning model in GUI environment

* Modeler: The End- to-End analysis model Lifecycle management service that supports quick establishment, learning and operation distribution of machine learning / deep learning model for AI developers, Data Engineers, and Data Scientists

* DCM: The service supporting efficient use of resources by easy distribution and management of Cluster in various environment of On-Premise / Public Cloud

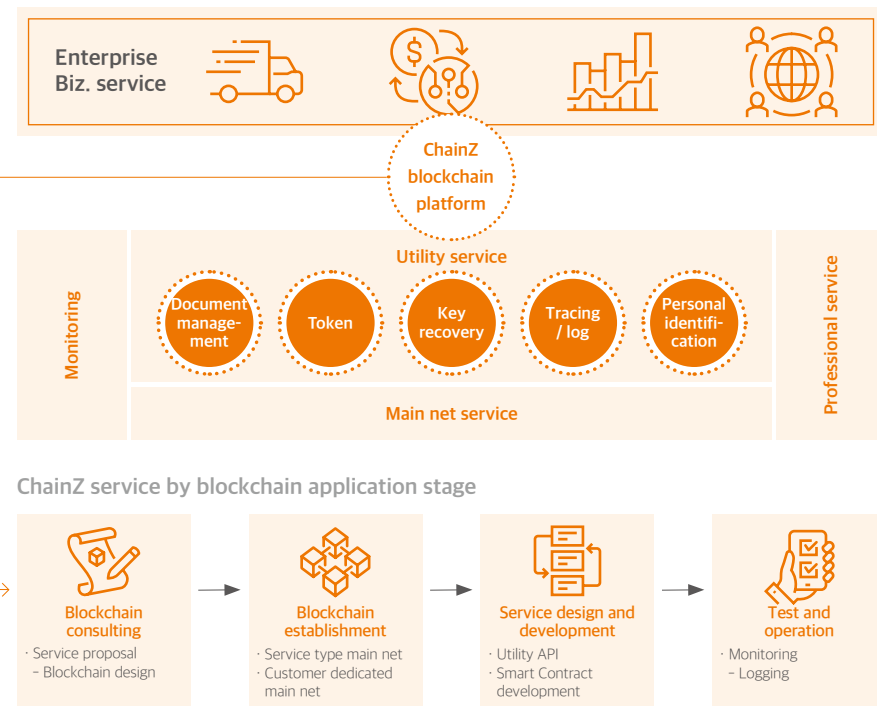

Research & Development

Blockchain

- As Digital Transformation (DT) of many services are expedited after COVID-19, confidence problems such as forgery, and reproduction occurred in the digital environment
- Blockchain's confidence technologies were presented as the resolution alternative for this. We are operating blockchain platform brand ChainZ that facilitates selection of platform and service module according to customers' needs

ChainZ

- Entering post COVID era, introduction of blockchain became an essential element in corporate management, but many hours and much know-hows are required from establishment to operation of blockchain.
- ChainZ supports easy and prompt launching of blockchain based corporate business system

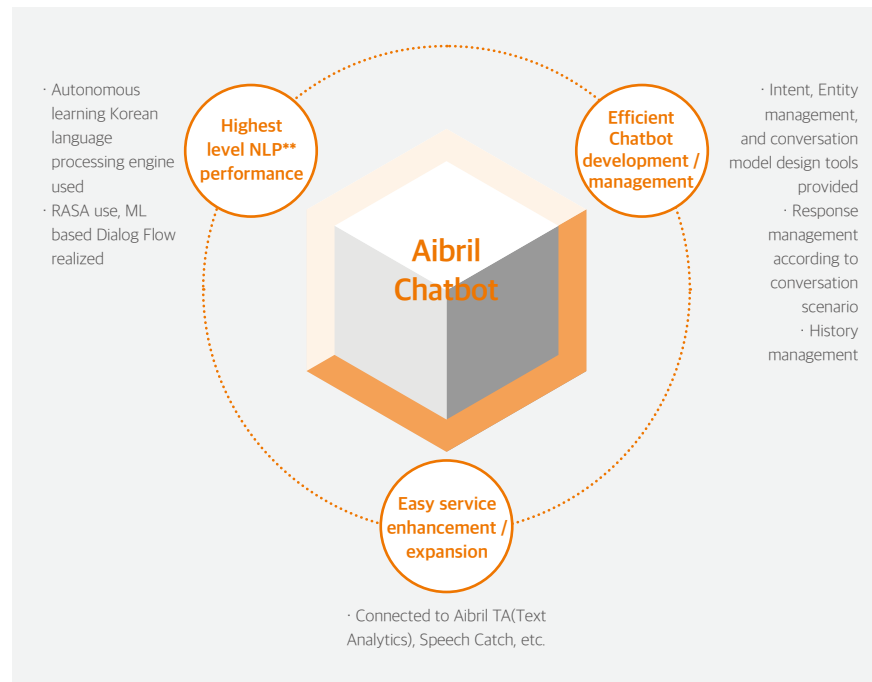

- Especially ChainZ operates integrated service that can support the whole procedure of blockchain introduction, focusing on maximized customer use through simple network composition and service framework structure.

AI

- Service provided to various industrial areas such as medical, manufacturing, and law using AI.
- We have various AI solutions such as AI Studio, AI Runtime, Aibril-Chatbot as the newest technology for processing natural language based on AI Package solution composed of AI Model, and AIDEN as the Vision solution for object recognition, image analysis, etc.

Aibril-Chatbot

- This is the On-Premise* Chatbot solution that provides high performance and development productivity, easy for function enhancement and expansion based on newest natural language processing based engine, used as management tool in various industrial areas.

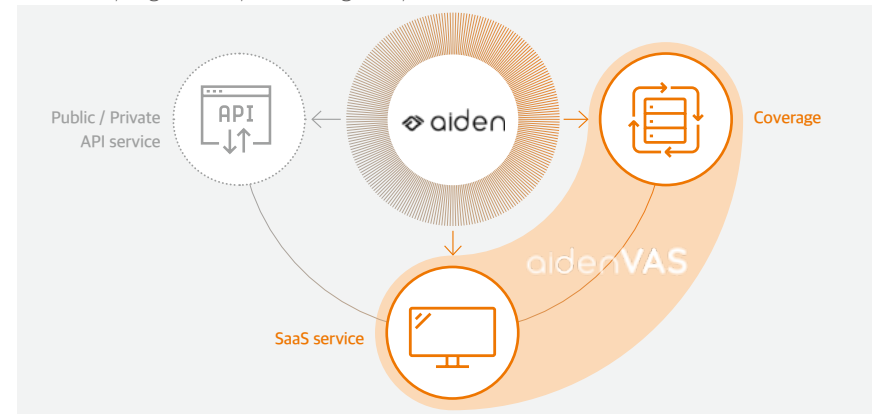

* on-premise: The method of installing servers directly in the internal computer room, rather than operating servers at a remote environment

** NLP: National Language Processing

Research & Development

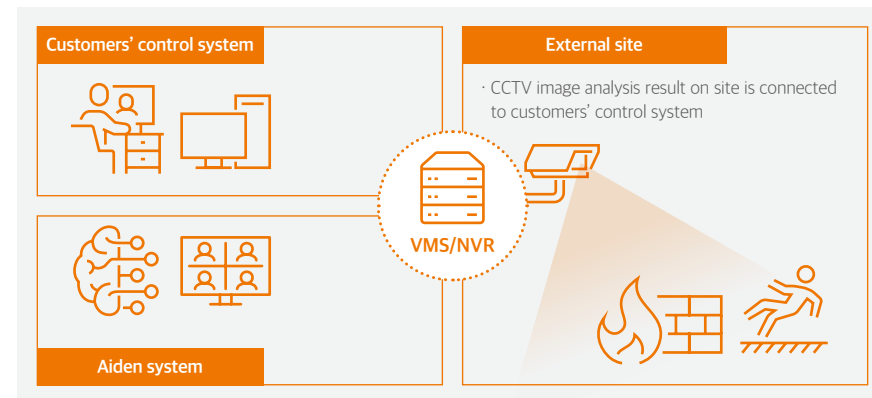

AIDEN

- This means the deep learning based analysis engine that provides AI based real time image analysis service, which provides 5 services comprised of industrial safety, drone based detection, Edge Service, facial recognition, Custom Service area.

- Especially in case of industrial safety management area, industrially specialized analysis model is developed whereby AI analyzes image information collected from CCTV to detect abnormality and to reduce the workload of site management manpower through real-time notifications and to prevent any accident that can occur at the site.

Smart surveillance system connected to existing CCTV established

- Through drone based detection that provides drone platform connection, real-time object detection and analysis service, active applications are under progress in Digital SHE area such as excavator accident prevention, and network construction cost saving and maintenance cost reduction using wireless data transmission technology and Edge Device, etc.

Competition platform

- Multi-Purpose Digital Training platform based on project site cases
- Competitions in various digital technology such as Cloud in addition to data analysis are supported by project E2E method
- In case of new technology PoC or data analysis Pilot, project feasibility is verified by competition method, and competition result such as model, etc. is assetized as knowledge asset.

2020 Competition promotion contents

Technology theme	Competition contents
Data	Theme: Prediction of compound toxicity for new drug development Period / participating personnel: 2 months / 163 persons
AI	Theme: OO share price fluctuation prediction based on Korean language news Period / participating personnel: 2.5 months / 152 persons
Cloud	Theme: K8s-based Cloud Architecture design and realization Period / participating personnel: 3 months / 98 persons
Blockchain	Theme: MainNet connection Smart Contract and DApp realization Period / participating personnel: 2 months / 45 persons

- In 2020, offline competitions were carried out for a total of 4 times. The needs for establishment of online based 'competition platform' was derived to overcome the problems in offline competition.
- Service for users from competition planning to implementation, assessment, and management were realized as Cloud based platform. This contributed to participants' free knowledge sharing / debate and enhanced DT capacity.
- Currently, Data / Cloud area technology theme areas have been established in advance, with additional areas to be supplemented continuously.

Risk Management

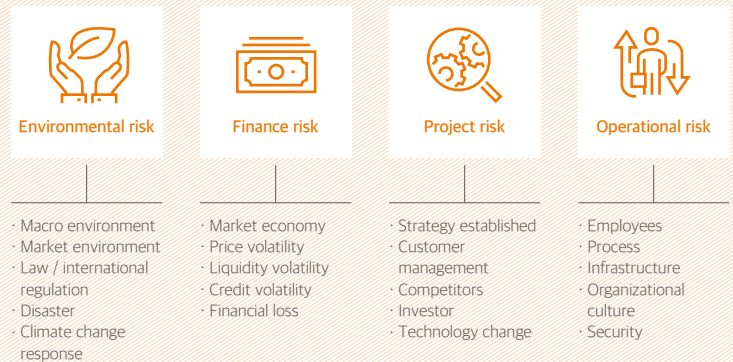

Policy

Integrated risk management

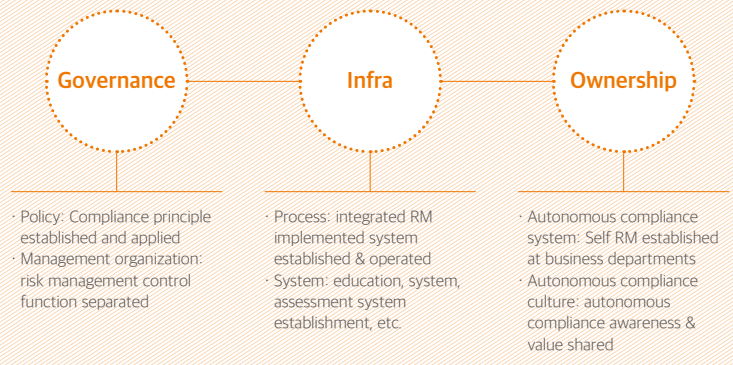

- Risk management strategy of risk 'Prevention → detection → mitigation' established

Classification	Details
Risk prevention	Effort to minimize fluctuation in corporate value by prevention of threat elements with potential negative impact on corporate management. Identifying the situation according to risks, measurement of its impact, and response methods are established.
Risk detection	Risks that can occur despite prevention are classified as 4 major risks (environment, finance, project, operation), and preemptive identification & management is implemented.
Risk mitigation	Upon occurrence of actual risk, prompt response is taken through risk management framework. Risk that has occurred shall be immediately reported and analyzed. Response measures for recurrence prevention through response implementation feedback are established.

Risk classification

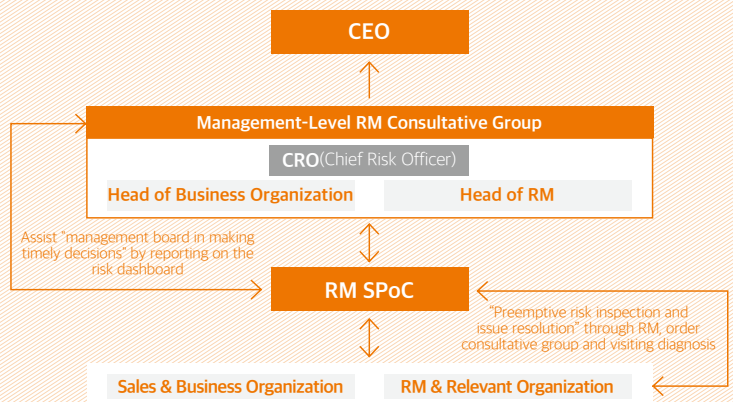

Risk management framework

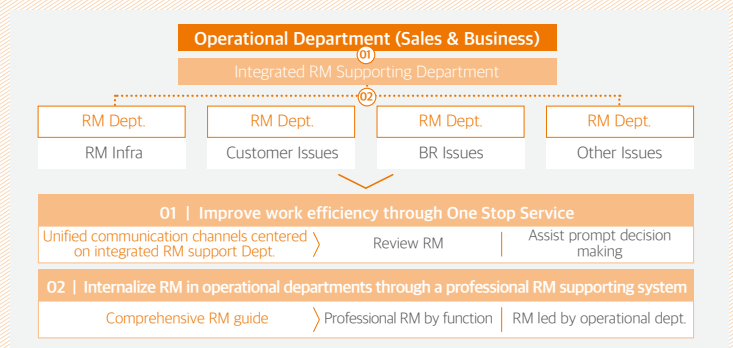

Management system

Risk management reporting system

- For prompt response to risks, risk management consultative group including top management is organized and reporting system is established
- *Any issue arising shall be reported to ESG Committee within the Board of Directors.
- Through establishing a dedicated RM SPoC (Single Point of Contact) system by project, actions are taken for integrated management of risks by site and the risk management department.
- Unification of communication channel between specialized risk review by business departments and the risk management department.
- Operational level risk management performance monitoring and auditing is conducted by the Head of Autonomy Management Team, and the results are reported to the CEO and then to the board of directors

SPoC system

Risk Management

Implementation / performance management

Risk measurement and management enhancement

- Risk measurement and stress testing implemented to identify the impact upon management performance
- *Finance, management environment, project, legal, reputation, corporate culture, environment risk, etc.
- Currently risk measurement model has been established and operated that performs early determination of the realization possibility of our project under connection to business departments.
- In preparation for 2021 next generation MIS* introduction, promotion is scheduled on risk management process rearrangement, revision of company bylaws reflecting the new process and improvement of measurement logic.
- Prompt decision-making on carrying out project established, and enhanced convenience for employees expected.
- *MIS: Management Information System
- When evaluating employees, HR review process includes RM standards, and disciplinary action is taken against violations.

Risk management by business stage

- In case any project and investment of a certain size is carried out, risk management is implemented by stage
- Procedure from project opportunity discovery to project completion are classified into 4 stages. Risks that may occur by area are analyzed and advance prevention system is re-arranged.
- Through flexible management and resource input according to risk level, enhancement of project operation efficiency is carried out.

Risk review item by business stage and risk management support area

Emerging Risk analysis and response

- SK Inc. identifies and responds to potential risks that are deemed as bringing significant impact on management.

Classification	Risk description	Business impact	Mitigating action
Conversion risk due to Climate change	<ul style="list-style-type: none"> · Conversion risk due to Climate change is regarded as an important issue for investment portfolio design and long-term investment decision making. 	<ul style="list-style-type: none"> · Conversion risk due to Climate change response may occur in the course of transition procedure to low-carbon economy · When reviewing current investment portfolio, consideration is required on the financial impact that may occur due to Climate change 	<ul style="list-style-type: none"> · Response principle from mid to long-term perspectives · Re-composition of investment portfolio reflecting financial impact from Greenhouse gas emission projects is required · ESG Risk inspection and action plan established on all investment projects.
IT market change based on new technology	<ul style="list-style-type: none"> · Due to IT market change based on new technology, re-design of business area is required. 	<ul style="list-style-type: none"> · Company's interest increased on new technologies such as AI, Big Data, Block chain, Cloud, IoT, etc. · New market entry is hindered if technological capacities and system are absent. Among them, in case of Cloud based information management market, market entry becomes very difficult after the establishment of infrastructure. 	<ul style="list-style-type: none"> · Major business area change pursued with market change is perceived as the opportunity for re-design of business area, and BM innovation. · Promotion of change in major business area: Cloud based project, digital infrastructure establishment, AI solution, etc. · Especially, investments for DT solution and digital service development are continuously expanded.

Risk Management

Risk management culture

Risk management culture internalized

- Risk management education implemented for employees (essential course)
 - : Staged education by job category / grade. Specialized course provided to leader level employees
- Risk management related KPI granted to CRO and heads of risk management organization. Incentive paid upon performance achievement.
- RM process system enhanced, untact risk diagnosis environment established, and applied.

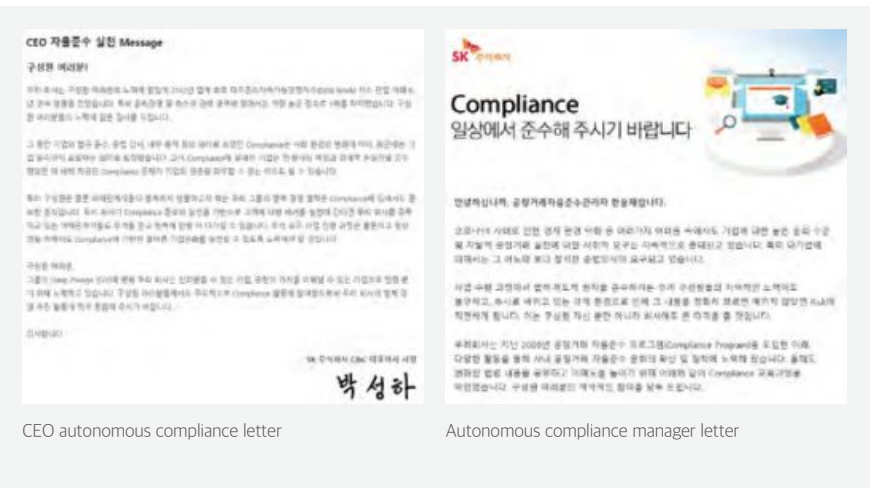

Cultivating employees' compliance awareness

- In 2009, Fair Trade Autonomous Compliance Program (CP) was introduced, with related laws & regulations and procedures were internalized and autonomous compliance culture is cultivated.
- Compliance Programs such as CEO's CP Letter, compliance education, Compliance Portal operation, etc. were implemented.
- "Effective compliance activities such as CP Expert selection composed of internal specialists related to various regulations, and education & advice, etc. were supported.
- In 2020, CP guidebook was revised reflecting online progression of entire course of compliance education, and recently revised laws and response guide, etc.

Result of 2020 CP Operation

Education and activities	Related regulations	Remarks
Basic online education of Compliance	Fair Trade Act, Subcontracting law, Dispatched Work Act, company bylaw	One time
Improper Solicitation and Graft Prohibition Act education	Improper Solicitation and Graft Prohibition Act	One time

RM VLS online education	Fair Trade law, Subcontract Act, Intellectual Property Rights, Debt Management, Contract Management, Value Added Tax, etc.	Monthly
Autonomous compliance manager letter, CEO autonomous compliance letter	Fair Trade Law, Subcontract Act	Two times
2020 CP guidebook published and updated (online)	Fair trade law, Improper Solicitation and Graft Prohibition Act, Subcontract Act, Dispatched Worker Protection Law, Intellectual Property Rights, Company Bylaw	One time
Number of Compliance education trainees (including duplications)		4,437

Stakeholders' Response

Identification of Stakeholders' ESG needs

Stakeholders' response strategy

- Pain-Point analysis on stakeholders and customer is implemented every year, and stakeholders' needs are converged.
- In general, stakeholders need in ESG perspective are derived, and the SV creation strategy is established based on the collected needs.
 - Access to BM innovation for maximizing public interest of stakeholders through review by the Board of Directors

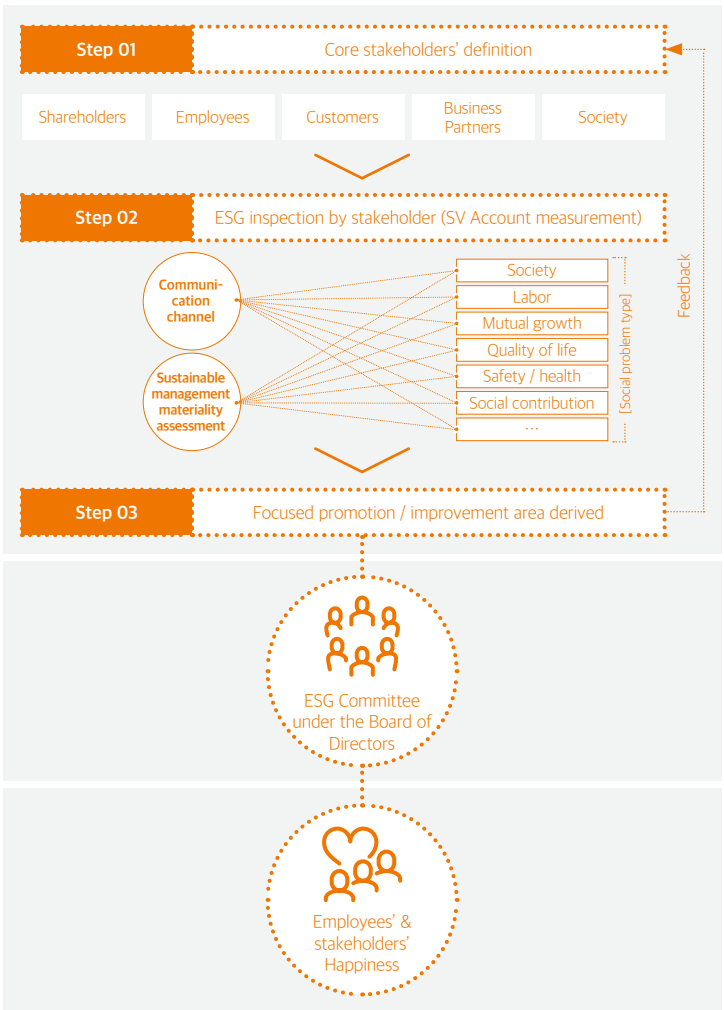

Stakeholders' ESG Needs identified

- Data accumulated through regular implementation
- Continued confirmation and supplementation of stakeholders' needs

Decision making

- Management activities reflected

Direction

Communication channel by stakeholder

- SK Inc. defines shareholders, employees, customers, business partners, and the society as major stakeholders based on the SKMS management philosophy, and operates various communication channels to actively communicate with stakeholders.

Stakeholders	Communication channel	Frequency of operation
Shareholders	Shareholders' meeting	Regular
	IR (company presentation)	Regular
	Disclosure	As necessary
Employees	Management council	Quarterly
	HR system Improvement (Happiness) consultative group	5 times a year
	Mobile communication platform, 'H.App'	Always
	'Happiness Designer' selected within organization	Always
Customer	Culture Survey	Regular
	Customer satisfaction survey	Annual
	DT related consulting (https://support.cloudz.co.kr)	Always
Business Partners	Customer center (skcenter@sk.com)(02-6400-0114)	Always
	Purchasing information system	Always
	Mutual Growth Day	Regular
Society	Biz Partner CEO seminar	Regular
	Local government of local community (official in charge of economy / social welfare, education etc.)	Always
	Institution / organization (Social Welfare Council, Volunteer Service Center, Sustainable Development Council, etc.)	Always

Stakeholders' communication strategy enhancement

- SK Inc. develops strategic and differentiated communication based on market data
- Stakeholder requirements are timely confirmed, and the position as a 'Sophisticated Value Investor' is secured in the market.
- Stakeholders' opinions are actively gathered and reflected in management activities.

Stakeholders' Response

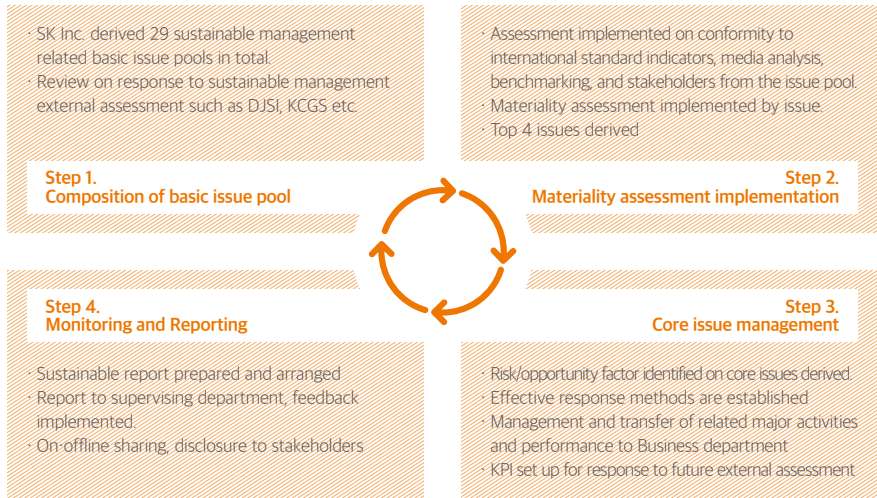

Materiality assessment

Materiality assessment and core issue

SK Inc. implements annual materiality assessment to identify issues of interest to stakeholders from all walks of life and to reflect them effectively in our management activities. 29 issues of economy, environment, and social areas, which were primarily covered in the past reporting papers were composed into a pool of basic issues, with the priority for each issue determined in consideration of conformity level to sustainability management related international standard indicators, media analysis, benchmarking of complex industrial corporate group, and internal / external stakeholder surveys, etc. The issues finalized through this series of procedures are transparently disclosed through the sustainable management report.

Materiality assessment process

SK Inc. conducted a Materiality Assessment through the procedure of 4 stages below, based on the Global Reporting Initiative (GRI) Reporting Principle, a global sustainability reporting guideline, to determine the core reporting contents of sustainable management reporting and to identify sustainable management issues to be managed in a focused manner.

- Media analysis: Jan. to Dec. 2020. Major media reports 12,744 cases
- Benchmarking analysis: 8 domestic and overseas complex industrial group companies (7 overseas, 1 domestic company)
- Domestic and external stakeholders assessment
 - SK Inc. employees and external stakeholders, sustainable management specialist assessment

Materiality assessment and result

Through materiality assessment, SK Inc. selected 4 issues with high priority according to management activities impact level and stakeholders' attention level.

Material Issue and business relevance

	Material issue	Business relevance
1	Project portfolio management focused on future growth strengthened	The appearance of our society that has changed since COVID-19 has caused a rapid change in the management environment. The increase in environmental crisis due to climate change is also implying the requirement of a new project model that is different from existing management activities. SK Inc. is restructuring project portfolio as a method of concentrating project capacity into four major areas of advanced materials, green, biopharmaceutical, and digital in order to actively respond to rapid changes in management activities. The four newly reorganized areas are expected to become the core of SK Inc.' future growth and management strategy.
2	Climate change response and greenhouse gas reduction	Anomalies caused by climate change and extreme weather events are increasing every year. SK Inc. participates in group-level greenhouse gas reduction efforts, while comprehensively analyzing the impact of climate change on our business and responds preemptively. For this end, an ESG Committee has been installed within the Board of Directors to determine the direction for climate change response, and regularly monitors the greenhouse gas emissions, energy consumption, and voluntary re-use indicators and manages the performance.
3	Technology innovation and R&D investment for sustainable BM Conversion	The development of digital technologies such as AI, Big Data, Cloud, and IoT is leading to the growth of the IT service market. Accordingly, IT service companies are actively proceeding with advancement into the global market while expanding their projects into the digital transformation market based on IT capacity. Therefore, technology innovation and R&D investment efforts in this area are very important for SK Inc.' sustainable BM creation, and we are responding to the future by increasing the amount and percentage of R&D every year.

Policy & Principles

Corporate Governance

SK Inc. discloses information about corporate governance in a transparent way as follows

1. Independence of the Board of Directors

SK Inc. complies with the Commercial Act of the Republic of Korea to incorporate transparent management by organizing and operating an independent Board of Directors (BOD). In this regard, we defined independence of the BOD, and disclose the status of the BOD as follows. We believe that the BOD, consisting of a majority of independent directors is independent. We also believe that the BOD cannot obtain independent qualifications if the independent director falls under the conditions set forth below. Therefore, we do not appoint anyone who meets the following conditions:

- ① Directors, executive directors and employees who are engaged in the regular business of the relevant company, or directors, auditors, executive directors and employees who have engaged in the regular business of the relevant company within the past two years;
- ② The principal, his/her spouse, lineal ascendants, and lineal descendants, in cases where the largest shareholder is a natural person;
- ③ Directors, auditors, executive directors, and employees of the corporation, in cases where the largest shareholder is a corporation;
- ④ The spouses, lineal ascendants, and lineal descendants of directors, auditors, and executive directors;
- ⑤ The directors, auditors, executive directors, and employees of a parent company or a subsidiary company of the relevant company;
- ⑥ Directors, auditors, executive directors, and employees of a corporation which has a significant interesting the relevant company, such as business relations with the company;
- ⑦ Directors, auditors, executive directors, and employees of another company for which directors, executive directors, and employees of the relevant company serve as directors and executive directors.

In order to ensure fairness and independence when appointing independent directors, we appoint them at the general shareholders’ meeting after a rigorous examination by the Independent Director Candidate Recommendation Committee. Directors are elected through the general shareholders’ meeting. The candidates for directors to be elected at the general shareholders’ meeting are selected by the BOD (executive/non-executive directors) and the Independent directors Candidate Recommendation Committee (independent directors), and submitted to the general shareholders’ meeting.

2. Election Ratio of Independent Directors

SK Inc. consists the BOD with the aim of having more than 51% of independent directors in the BOD. Currently, our BOD has five independent directors, representing 56% of all directors. This structure contributes to maintaining independence from large shareholders and management.

3. Diversity Policy of the Board of Directors

In order to promote a diverse and non-discriminatory corporate culture, SK Inc. is committed to ensuring that all employees, including board members, are not discriminated on the basis of race, gender, disability, religion, or nationality, for all employees including recruitment, compensation, evaluation, promotion, and education and is considering priority form minorities.

4. Efficient Operation of BoD

In 2020, the average participation rate of directors in the board of directors has been 99.2%. The minimum participation rate required for all directors is 80%, and all of the 5 independent director limited other duties to 4 or less. The board of directors of SK Inc. regularly and independently evaluates the performance of the board of directors by sharing the execution results of its decisions and committee activities and discussing on areas of improvement. Directors are appointed annually, and at the time of appointment, the appointment case of each director is put to a vote. The pros and cons as well as the proportion are disclosed. The average tenure of directors is 3 years, and the number of independent director with industrial experience is four.

5. Performance Compensation of Management

SK Inc. efficiently measures the performance of our top management and pays compensation accordingly. Performance compensation uses indicators such as sales, operating profit, debt ratio, cash dividend payout ratio, total share price return, credit rating, growth rate, and sustainability rate, etc. The period for which we pay performance compensation to top management is three years. Moreover, we introduced stock options for executives to directly link corporate value enhancement and compensation in order to maximize the growth of corporate value by building a consensus between management and shareholders.

Policy & Principles

Guidelines for guaranteeing independence of board of directors

SK Inc. follows the local commercial law in ratifying the independence of its directors. It has applied the more stringent standards under US NYSE regulations to the requirements for their independence. It follows the given requirements for determining the independence of director candidates or existing directors.

Some directors who fail to satisfy the company's independence requirements may be qualified based on the Republic of Korea regulations based on the relevant statute to significantly contribute to the board and the company by demonstrating competence, experiences and wisdom.

All directors of SK Inc. board of directors are equipped with independence by satisfying all of the below-listed standards:

- The candidate should not have been hired by the company as an officer within the past three years;
- The candidate should not be a partner or employee of the company's independent auditor;
- The candidate should not be a partner or employee of an organization that has signed a key advisory contract or a technical alliance agreement with the company;
- The candidate should not be the company's adviser or consultant or a member of the company's high-ranking management team;
- The candidate should not be a partner or employee of an organization that currently is at party to or has signed a contract for an amount exceeding 5% of the company's total revenue in the past three accounting years; or
- The candidate should not have any conflict of interest on an agenda item of the company's board of directors

In addition to the above, the board of directors will inclusively consider the director's independence, including the domestic and overseas situation and the position of the directors and the company.

Status of shares with differentiated voting rights (2020)

Voting rights per 1 share	Votes per share	Amount of Shares	Voting Power
No voting rights*	0	18,619,540	0
1 vote	1	52,306,892	52,306,892
Total	-	70,926,432	52,306,892

* Consisting of preferred and treasury shares under the Commercial Act

Guidelines for guaranteeing diversity of board of directors

SK Inc. well understands that a board of directors equipped with diversity can better reflect the benefits of its shareholders, customers and other stakeholders in making important decisions in a broad perspective.

At the end of each year, the board of directors decide on the next-year's direction for selection of director candidates and composition of the board in order to satisfy the below-listed diversity requirements:

1. Expertise

- ① Essential expertise: IT, business management (operation of organizations), economy, law, accounting
- ② Segmented expertise: Business management, economics, global IT industry expertise, risk management, sustainable management, administration
- ③ Expertise of independent directors: Understanding of director's duties

2. Diversity

- ① Nationality: Candidates of diverse nationalities considering the company's overseas projects
- ② Gender: Candidates of different genders reflecting the gender equality principle for operating the board in diverse perspectives
- ③ Age: Candidates belonging to diverse age groups for enhancing the board's efficiency while smoothly responding to changes in business conditions
- ④ Others: Candidates should not be discriminated based on their ethnicity, religion, race, nationality, and other diversity factors

3. Recommendation

An open approach is adopted for recommending independent directors to reflect the stakeholders' diverse interests.

When determining the direction of the Board of Directors, the Board verify whether the composition of Board of Directors reflects the diversity requirement through the diversity verification matrix.

SK Inc. will steadily exert to enhance the board's efficiency by adding diverse perspectives and experiences within the extent not violating the Republic of Korea law.

Policy & Principles

Ethical code

Basic principles of employees

We faithfully perform our duties in a posture representing the company at all times in our position with a pride as constituents of SK Inc.

- We perform our duties fairly by clearing distinguishing between public and private duties.
- We will develop an organizational culture where the constituents are mutually respected and are motivated to work willingly and voluntarily.

Attitude toward customers

We will gain trust from the customers by satisfying them continually and will ultimately develop together with the customers.

- We will respect the customers' diverse opinions to reflect them on the company's management activities.
- We will protect the customers' assets and information securely based on statutes and the company's policies.

Responsibilities toward shareholders

SK Inc. performs its management efficiently by enhancing its transparency while raising the corporate value to create the shareholders' value.

- SK Inc. maximizes the shareholders' value to share the achievements with the shareholders by efficient management through incessant reform.
- SK Inc. practices board-centered transparent management while respecting the shareholders' legitimate requests and proposals.
- SK Inc. creates its management data in accordance with various statutes and standards and discloses the relevant information faithfully based on statutes to protect the shareholders' benefits.

Roles toward the society

SK Inc. constituents contribute to the society with social and cultural activities while contributing to the country's economic development. They exert their best to manage its business in accordance with the social norms.

- SK Inc. constituents exert their best to make the entire society happy by actively participating in the company's CSR activities.
- SK Inc. constituents contribute to the development of the society through environmentally-friendly management.

Relations with business partners

SK Inc. pursues win-win development with its business partners and fairly compete with its competitors.

- SK Inc. provides fair trading opportunities to its partner companies, do not commit unfair acts using its superior position, and pursues mutual benefits and win-win development.
- SK Inc. competes with competitors fairly based on a spirit of mutual respect.

Addendum

- This ethical code will go into force on October 1, 2008.
- SK Inc. operates a separate "Guidelines for practicing ethical code" so that its constituents may interpret and practice the ethical code correctly.

Policy & Principles

Oath to Practice Ethical Management

Oath to Practice SK Ethical Management

I, the undersigned, hereby pledge to follow the following while fully understanding the company's "Anti-Corruption Policy" to participate in the development a transparent corporate culture by practicing ethical management with a pride and self-esteem as a constituent of SK Inc.

1. (Caring and respect) I will always maintain a mind of caring and respecting fellow constituents and stakeholders as a SK constituent.
2. (Prohibition of unethical/corrupted acts) I will not commit any unfair trading and unethical/ corrupted acts in performing my duties as well as complying with the company's regulations and related statutes, including the company's ethical code.
3. (Interpretation/application of company regulations) When I have any questions in connection with the interpretation/application of the ethical code and related company regulations in performing my duties, I will consult my department manager first and consult the company's organization responsible for ethical management to obtain advice when it is hard to make own judgment.
4. (Reporting/consultation) I will immediately report and consult the company organization responsible for ethical management when I notice any unfair trading and unlawful/corrupted acts of a constituent(s) while performing my duties or received an offer for unlawful/corrupted acts from a business partner or other stakeholders.
5. (Cooperation with investigation) When an investigation/diagnosis is conducted, I will render all possible cooperation, including provision of information or data (information required to investigate the unfair trading, unlawful acts/corruption, consent to review of personal information, etc.) and request for testimony.
6. (Disciplinary actions) I will endure any disciplinary actions based on the given procedures when I violate this oath or any of the company's regulations.
7. (Ethical conduct) As the contents of this ethical code and oath to practice it present the minimum guidelines required for ethical decision-making and conduct, I will voluntarily judge and act for matters other than those based on a more strict higher ethical standard based on the company's regulations, etc.

Human Rights Management Statement

SK Inc. is dedicated to realizing the value of respect for human rights throughout its entire management activities based on the Group's founding philosophy: "We will strive to continue to exist and develop through stable operation and growth as a workplace that pursues pursuit happiness of our employees and stakeholders."

SK Inc. officially supports and declares its compliance to standards and laws of labor and human rights related international organizations and bodies such as the 'Universal Declaration of Human Rights' and 'UN Guiding Principles on Business and Human Rights; Ruggie Framework, and the 'International Labour Organization Agreement'. Furthermore, the company requests all stakeholders in the value chain such as employees, business partners, community and customers to comply with the above international regulations on human rights and labor.

SK Inc., as a signee of the UN Global Compact, shall be equipped with organization, operating structure, monitoring, measures and internal-external reporting processes according to procedures defined by 10 principles and UN affiliates and human rights implementation principles. For this, the company has set up the following human rights business principles and detailed operating principles to make 'SK Inc. where human rights and happiness are guaranteed to all stakeholders' through constant implementation efforts.

President & CEO,
SK Inc.

Policy & Principles

Detailed principles for human rights oriented management

Humanitarian Treatment

SK Inc. shall respect all its employees as humans, and endeavor not to compromise human rights. If inhumane treatment occurs, we will take strict measures in accordance with the relevant regulations.

Prohibition of Forced Labor

SK Inc. shall respect employee's free will. The company shall not force labor against an employee's free will through mental or physical oppression, imprisonment, human trafficking, or slavery. The company also strictly complies with the Labor Standards Act in relation to labor contracts.

Prohibition of Child Labor

SK Inc. shall comply with the regulations on child labor, ensure the appropriate procedures and support in accordance with the laws and regulations of minors, and continuously check compliance with laws and regulations.

Prohibition of Discrimination

SK Inc. shall respect the diversity of all employees, and ensure that discrimination does not occur in recruitment, wage, promotion, and other personnel processes for reasons such as gender, race, age, gender identity, academic backgrounds, disability, religion, political orientation, or social status.

Working Hours Compliance

SK Inc. shall comply with working hours regulations of relevant regions in terms of regular, overtime, and holiday work. Amendments to laws and regulations shall be managed on an ongoing basis to prevent the occurrence of illegal acts.

Wage and Welfare

SK Inc. shall pay more than the minimum wage prescribed in relevant regions along with the payroll statement, and provide compensation for overtime work carried out under mutual agreement between labor and management.

Freedom of Association

SK Inc. shall promote sound organizational development through smooth and continuous communication between labor and management. In accordance with labor relations laws and regulations on labor relations in relevant regions, freedom of association shall be guaranteed, and unfair treatment shall not be applied on the grounds of membership, or activities, of trade unions.

Privacy Protection

SK Inc. shall protect the personal information of stakeholders including customers in accordance with local laws and regulations to protect human rights of all stakeholders. The company shall not use personal information for any other purpose without the consent of the person concerned.

Local Community

SK Inc. shall identify potential impacts on communities near our worksites, listen to feedback of local communities to prevent problems from occurring, and strive for continuous communication.

Environment, Safety & Health

SK Inc. shall comply with local and overseas legal regulations, set measurable goals to improve the environment, while periodically checking whether the goal is appropriate with the aim of protecting the environment and preventing pollution.

Policy & Principles

Code of Conduct of Business Partners

Preface

SK Inc. expects a high level of operation standards to working environment of its business partners. Hence, in order to strengthen the compliance management as the foundation of accompanied growth between business partners and SK Inc., the company enacted the Code of Conduct of Business Partners (hereinafter “Code”). Also, business partners of SK Inc. shall strictly observe all applicable laws and regulations, secure a safe working environment, build a business environment that respects employees and run business in an ethical manner.

This Code presents what SK Inc. expects from its business partners. The Code is applicable to organizations of all forms that design, sell, manufacture or provide ingredients and services used to produce services and products. All business partners shall comply with the Code, and shall demand all subsidiary supply chains that provide ingredients and services to relevant business partners.

SK Inc. or external institutions designated by SK Inc. may visit business partners to assess the compliance status of business partners. In case a critical violation of a business partner on this Code has not been improved within the requested period, the trade with SK Inc. may be suspended or the contract may be cancelled.

Also, in accordance with any changes in SK Inc.’ business partner management policy or standards, this Code may be amended. In case of conflict of this Code and local laws, more strict standards shall prevail.

1. Human Rights and Labor

Business partners shall protect human rights of workers and guarantee their dignity to internationally accepted standards. This shall be applicable to all forms of workers including temporary workers, migrate workers, trainees and dispatched workers. Workers shall be guaranteed for legal service and protection of rights in accordance with local laws.

1-1. Prohibition of Forced Labor

All services shall be voluntary. A company shall not use forced laborers, workers under confinement contract (including confinement for debt servicing), involuntary convict laborers and human trafficking laborers. This includes all acts of moving, employing and transferring

social minorities by threatening, forcing, compulsion, kidnapping and committing fraud for the purpose of labor exploitation. Companies shall not demand for the transfer of government-issued identification cards, passports or work permits for employment condition. Business partners or manpower dispatch companies shall not demand workers for commissions (for job placement, etc.) or surety. Also, they shall document and deliver work conditions in languages understandable by the worker.

1-2. Underage Worker Protection

Use of child labor is strictly prohibited. “Child” means someone below the age of 15, the age of completing mandatory education or the minimum legal employable age according to local laws. In the case of an underage worker, business partners shall take prompt countermeasures. Employment of underage worker shall cease and the age-confirmation process be improved. If any apprentice program is in effect, it shall comply with local laws and regulation. Juvenile workers over the legal minimum age can be hired, but workers under age 18 shall not perform any dangerous tasks, including overtime, and night shifts, for their health and safety

1-3. Compliance of Working Hours

The weekly working hours shall not exceed the maximum working hours regulated by laws. Moreover, the weekly working hours including any overtime hours may not exceed the working hours set by the Labor Standards Act except in emergency or special situations.

1-4. Wages and Employee Benefits

Wages given to workers shall include minimum wages, overtime compensation and legal employee benefits, and shall comply with local laws and regulations. All overtime services shall be done voluntarily with the agreement of workers, and higher overtime compensations than the hourly wages for regular working hours shall be given according to local laws and regulations. No pay cuts shall be permitted as sanctions. The wage standards and items of workers shall be provided in languages understandable by workers in a payslip or a document with wage payment details via document

Policy & Principles

1-5. Humanitarian Treatment

There shall be no harsh and inhumane treatment to workers including sexual harassment, sexual abuse, punishment, mental or physical coercion and abusive language, nor any treats for such treatment. Business partners shall define policies and procedures for guaranteeing humanitarian treatment to workers and fully explain on such policies and procedures.

1-6. Nondiscrimination

Business partners shall take measures to prevent bullying or illegal discrimination over workers. In employment customs including the recruitment process as well as wages, promotion, compensation and education opportunity, business partners shall not discriminate based on race, color, age, gender, sexual orientation, ethnicity, disability, pregnancy, religion, political inclination, union membership and marital status. Except where required by local laws or occupational safety, business partners shall not demand workers or employment candidates for medical checkups that may present grounds for discrimination.

1-7. Freedom of Association

In accordance with the local laws, business partners shall respect workers’ rights to organize, and join an employee council or a labor union, and the freedom of association with other workers for group agreement and peaceful assembly, and the rights not to participate in such activities. Also, business partners shall enable their workers and representatives to liberally exchange opinions and difficulties on working conditions and business policies with business partners without concerns about discrimination, revenge, threats or bullying.

2. Safety and Health

Business partners shall recognize that activities that guarantee safety and health of workers are essential in all activities in the course of company’s businesses. Business partners shall, according to local laws and regulations, strive to build and maintain safe and healthy worksites.

2-1. Occupational Safety

Business partners shall perform proper administrative control, preventive maintenance and consistent safety education to control workers’ exposure to potential safety hazards (e.g. electrocution, fire, car accident, falling hazards, etc.). In case hazardous elements cannot be sufficiently controlled by the above mentioned measures, proper personal protective gears shall be provided to workers. Workers shall be able to liberally present their safety concerns to the management board.

2-2. Preparation to Emergency Situations

Potential emergency situations and accidents shall be identified and evaluated in advance. Damage from emergency situation shall be minimized by setting up an emergency situation reporting system, worker notification and evacuation procedures, and by providing emergency drills of workers, evacuation facilities, fire detectors and fire-fighting equipment.

2-3. Body Burden Tasks

Business partners shall identify, evaluate and control workers’ exposure to body burden tasks including repetitive manual tasks for a long period, lifting heavy objects, standing and physically exhausting assembly tasks.

2-4. Safety and Health Education

Business partners shall perform proper safety and health education to workers in languages readily used by workers. Safety and health related information shall be published in a well visible area in the worksite.

3. Eco-friendly Management

Business partners shall strive to fully understand and reduce environmental pollutions from business operation and environmental effects from providing products and services to SK Inc.. They shall comply with environment related laws and regulations in terms of waste disposal, recycling, controlling industrial water and controlling greenhouse gas and atmospheric emissions.

3-1. Waste Water and Wastes

Business partners shall systematically identify, manage, reduce, dispose and recycle solid wastes (unharmful). Solid wastes shall be identified, monitored, managed and treated according to regulations and then discharged/disposed. Measures to reduce waste water shall be taken, and the treatment efficiency of the waste water treatment process shall be constantly monitored.

3-2. Energy Consumption and Greenhouse Gas Emissions

Business partners shall identify energy consumption and greenhouse gas emissions of the company and business sites in each step. Also, they shall look for cost efficient ways to minimize energy consumption and greenhouse gas emissions while raising energy efficiency.

Policy & Principles

4. Business Ethics

In operation of business sites, business activities of business partners shall comply with all local laws and regulations, and SK Inc. shall demand its business partners to maintain the highest standards of ethics.

4-1. Integrity

In the trade relations with all companies, business partners shall maintain the highest level of integrity. They shall not conduct illegal acts such as all forms of corruption, extortion, embezzlement, bribery, tributes, and gifts including money gifts or other forms of benefits to related personnel for the purpose of affecting the decision making process. Also, they shall not give or receive any means of gaining unjust or improper benefits, and shall practice autonomous compliance to anti- graft law by providing supervision and crackdown on such practices.

4-2. Disclosure

Information on labor affairs, safety and health, environmental management status, business activities, governance structure, financial status and performance of business partners shall be disclosed according to applicable laws and general industrial practices. Any forgery of records or omissions of status and customs in the supply chain shall not be permitted.

4-3. Intellectual Property Protection

Intellectual property rights shall be respected. The transfer of technology or knowhow shall be performed in a manner of protecting intellectual property rights, and information of SK Inc. shall be securely protected.

4-4. Personal Information Protection

Business partners shall take reasonable efforts to protect the personal information of all personnel including business partners related with businesses, clients, consumers and employees. Also, they shall comply with the laws related with personal information protection and information security in collecting, storing, processing, transmitting and sharing personal information.

Information Security Policies

Various threats that emerge with the development of IT technologies may seriously affect the information assets of SK Inc., which provides comprehensive IT services to the customers. The information security activities or, information security, has become essential and indispensable to the efforts of SK Inc. that strives to provide the best-in-class products as a global IT service leader. Therefore, all SK Inc. employees should place priority in developing measures to protect important information assets from internal and external hacking or data leakage by thoroughly considering the various legal, social and ethical repercussions in addition to the possible loss of important information assets and delay or degradation of processes.

Hence, SK Inc. information security policies satisfy the following points:

- ① We protect SK Inc. information assets from illegal access or leakage.
- ② We maintain the confidentiality, integrity and availability of SK Inc. information assets.
- ③ SK Inc. complies with the statutory security requirements related to information security protection.
- ④ All SK Inc. constituents should be able to duly prevent, detect and address accidents by realizing the importance of information security.
- ⑤ SK Inc. periodically analyzes, inspects and audits risks related to information security.

SK Inc. invests time and resources to comply with the information security policies as well as, establishes and operates an organization that manages information security. The organization is responsible for the development, maintenance, inspection, and education of security regulations, guidelines, and procedures. Information security, however, cannot be conducted by a single organization. It requires the participation and responsibility by all personnel. Therefore, all employees must understand and comply with the declared policies with steady attention is critical in realizing sound information security.

Global Initiative

To contribute to the propagation of ESG investment, SK Inc. has keenly reviewed initiatives and partnerships in cooperation with local communities, NGOs, and governments. It has also performed and upheld corporate social responsibility through disclosures based on GRI/SASB and signing onto the U.N. Global Compact.

In December 2020, SK Inc. participated in the ‘RE100’ and promoted SASB disclosure, the first in Korea to do so. In 2021, declared Net Zero 2040, and has implemented TCFD disclosure.

SK Inc. plans to increase its participation in the ESG Global Initiative every year by reflecting the nature of its business.

The U.N. Global Compact (UNGC) is the world's largest voluntary initiative of corporate citizens adopting 10 key principles in the areas of human rights, labor, environment, and anti-corruption. SK Inc. strives to follow the 10 UNGC Principles, while pursuing social responsibility by participating in the relevant initiatives. It will discharge its duties as a corporate citizen to realize a sustainable world by taking part to uphold the UNGC 10 Principles and regularly disclosing its performance.

It is a voluntary initiative to replace 100% electricity power consumed in business with renewable energy. To participate in the response to climate change the world demands, SK Inc. participated in the 'RE 100' initiative membership in December 2020 and set its RE100 2040 targets, the first in Korea to do so.

Reflecting the UN's urging for the implementation of net zero at the national level and the Financial Society's demands to respond to climate change for companies, SK Group intends to solidify its ESG management leadership by declaring the group-level Net Zero for the first time in Korea. (June 22 Extended Management Meeting)

Initiative	Invested amount	Remark
UNGC	\$7,500	General membership fee
RE100	\$3,500	General membership fee
RE100 and Net Zero	₩2,427,000,000	Green Premium in 2021, Amount for expanding solar energy, etc.
CDP	\$975	Assessment preparation expenses

Third Party's Assurance Statement

To the Readers of 2021 SK Inc. Sustainability Report:

Foreword

Korea Management Registrar Inc. (hereinafter “KMR”) has been requested by of SK Inc. Co., Ltd (hereinafter “SK Inc.”) to verify the contents of its 2021 Sustainability Report (hereinafter “the Report”). SK Inc. is responsible for the collection and presentation of information included in the Report. KMR's responsibility is to carry out assurance engagement on specific data and information in the assurance scope stipulated below.

Scope and standard

SK Inc. describes its efforts and achievements of the corporate social responsibility activities in the Report. KMR performed a type2, moderate level of assurance using AA1000AS (2008) and SRV1000 from KMR Global Sustainability Committee as assurance standards. KMR's assurance team (hereinafter “the team”) evaluated the adherence to Principles of Inclusivity, Materiality and Responsiveness, and the reliability of the selected GRI Standards indices as below, where professional judgment of the team was exercised as materiality criteria.

The team checked whether the Report has been prepared in accordance with the ‘Core Option’ of GRI Standards which covers the followings.

- GRI Standards Reporting Principles
- Universal Standards
- Topic Specific Standards
 - Management approach of Topic Specific Standards
 - GRI 201: Economic Performance
 - GRI 413: Local Communities

This Report excludes a data and information of partner company, contractor etc. which is outside of the organization, i.e. SK Inc., among report boundaries.

Our approach

In order to verify the contents of the Report within an agreed scope of assurance in accordance with the assurance standard, the team has carried out an assurance engagement as follows:

- Reviewed overall report
- Reviewed materiality test process and methodology
- Reviewed sustainability management strategies and targets
- Interviewed people in charge of preparing the Report
- Reliability evaluation on Performance information of report, data sampling
- Reliability evaluation of information based on outer independence source such as Financial Supervisory Service public database Data Analysis, Retrieval and Transfer System and public database.

Limitation and overcome

KMR's assurance engagements are based on the assumption that the data and information provided by the client to us as part of our review have been provided in good faith. Data verification was conducted by checking the basis in a limited scope, including inquiry, analysis, and limited sampling method, on the data collected by SK Inc. To overcome this, quality and Reliability of information was verified based on outer independence source such as Financial Supervisory Service public database Data Analysis, Retrieval and Transfer System and National Greenhouse-gas Management System, and public database.

Third Party's Assurance Statement

Our conclusion

Based on the results we have obtained from material reviews and interviews, we had several discussions with SK Inc.s on the revision of the Report. We reviewed the Report's final version in order to confirm that our recommendations for improvement and our revisions have been reflected. When reviewing the results of the assurance, SK Inc.'s sustainability Report was prepared according to the Core Options of GRI Standards, and the assurance team could not find any inappropriate contents in the Report to the compliance with the principles suggested in the AA1000AP(2018). Followings are the opinions of the assurance team on the principles.

Inclusivity

SK Inc. is developing and maintaining stakeholder communication channels in various forms and levels in order to make a commitment to be responsible for the stakeholders. The assurance team could not find any critical stakeholder SK Inc. left out during this procedure, and verified that SK Inc. endeavors to appropriately reflect stakeholders' opinion and expectation in the group's strategy.

Materiality

SK Inc. is determining the materiality of issues on the sustainability performance found out through its own evaluation process, and the assurance team could not find any critical issues left out in this process.

Responsiveness

SK Inc. is reporting the performances, counter measures, and future plan in an inclusive and balanced way, and the assurance team could not find any evidence that SK Inc.'s counter measures were inappropriately recorded in the Report.

Effects

The assurance team verified that SK Inc. is monitoring direct and indirect effects of major issues identified through materiality assurance, and reporting the effects in measurable form within reasonable bound. We recommend to keep developing measuring model of Social Value suitable for SK Inc.'s business property and sophisticating the sustainable sustainability management system to increase effectiveness of social activities.

Fidelity and quality of specific information of sustainability performance

The assurance team conducted verification on fidelity of economic, environmental, and social performances related to sustainability. Related managers were interviewed to verify the relevant information and data, and verified its fidelity through data sampling, evidential documents, outer source and public database. The assurance team could not find any intentional errors or inaccurate description in the sustainability performance information.

Eligibility and Independency

KMR is, according to ISO/IEC 17021:2015 Conformity assessment — Requirements for bodies providing audit and certification of management systems, maintaining inclusive quality management system including documented policies and procedures. With the exception of providing third party assurance services, the assurance team, which is consisted with sustainability experts, is not involved in any other SK Inc.'s business operations that are aimed at making profit in order to avoid any conflicts of interest and to maintain independence.

Greenhouse Gas Verification Report

Introduction

Korea Productivity Center was required to verify ‘2020 Greenhouse Gas (GHG) emissions Statements (hereinafter ‘Statement’), of which reporting years was defined as January 1, 2020 to December 31, 2020, by SK Inc.

Levels of Assurance

Assures that the relevant risks are below acceptable levels during the verification process

Verification Scope

The verification team verified greenhouse gas emissions (Scope 1, 2 ,3) at workplaces of SK Inc. in 2020

Verification Criteria

- GHG Energy Target Management Guideline
- IPCC Guideline:2006, WRI/WBCSD GHG Protocol:2004
- ISO14064-3:2006 standard

Conclusion

- The verification team confirmed that the ‘Statements (2020)’ was being reported in accordance with the self-inspection guideline based on the GHG Energy Target Management Guideline and IPCC Guideline
- Appropriate corrective action was taken by SK Inc. in accordance with investigation results from the verification team.
- The verification team confirms that the ‘Statements (2020)’ was being reporting ‘appropriately’ in accordance with relevant verification standard.

The verification team verified greenhouse emissions (Scope 1, 2 ,3) at workplaces of SK Inc. in 2020

Division	Greenhouse Gas Emissions (tCO ₂ eq)
1. Fuel-and energy-related activities (not included in Scope 1 or Scope 2)	0
2. Upstream transportation and distribution	12
3. Waste generated in operations	12
4. Business travel	914
5. Employee commuting	8
6. Upstream leased assets	4,691
Total Emissions	5,637

* In order to report the greenhouse gas emissions as an integer, the rounded number on the statement might be different from the number on the system with ± 1 tCO₂e

July, 2021

KPC Chairman
AHN Wan Gi

Division	Greenhouse Gas Emissions (tCO ₂ eq)
Direct Emissions (Scope1)	205.4
Indirect Emissions (Scope2)	63,808
Other Indirect Emissions (Scope3)	5,637

Awards and Recognition / Membership

Awards and Recognition

No.	Awards	Awarding organization	Date
1	Included in DJSI(Dow Jones Sustainability Indices) World for 9 consecutive years and selected as the Industry Leader[Ranked No. 1 in the Industrial Conglomerates sector]	S&P Global Dow Jones Indices	2020
